

INVITATION NATIONAL EUTROPHICATION MANAGEMENT STRATEGY ONLINE WEBINAR

The Director-General of the Department of Water and Sanitation, Dr Sean Phillips, recently approved the Eutrophication Management Strategy for South Africa (EMSSA), which primarily deals with the management of anthropogenic eutrophication. The Strategy aims to mitigate excessive nutrient enrichment in water bodies, protect water ecosystems and secure water resources that are suitable for various uses. It also addresses nutrient inputs from agricultural, industrial, mining, and urban sources, along with wastewater treatment plants. The strategy aligns with national goals, including the Integrated Water Quality Management Strategy (IWQMS) and the National Water Resource Strategy (NWRS), aiming to transform the water and sanitation sector regarding eutrophication management and pollution prevention.

You are invited to an online webinar, which will focus on creating awareness about the EMSSA and outline plans that are in place for its effective implementation.

DATE : 20 MARCH 2024

TIME : 09:00 – 13:00

https://teams.microsoft.com/l/meetupjoin/19%3ameeting_NGM2ODMwZGItnzA0NS00ZjI0LThkYTQtNzQ0ZjI2YmU4MmFl%40thread.v2/0?context=%7b%22Tid%22%3a%22c0491358-a254-4466-ab3dff428faea29%22%2c%22Oid%22%3a%2299a41266-5743-4a2a-a1fb-7824674ca83b%22%7d

Meeting ID: 315 871 142 310 Passcode: rxCzkm

The objectives of the Webinar are:

- To disseminate and raise awareness about the approved EMSSA.
- To streamline the reporting process in relation to Eutrophication Management.
- To position the sector for partnerships and collaboration.
- To share lessons and best practices in eutrophication management.
