

DID YOU KNOW?

You can use “grey water”- used water from baths, washing machines and other safe sources to flush your toilet and water your garden.

WATER SAVING TIPS

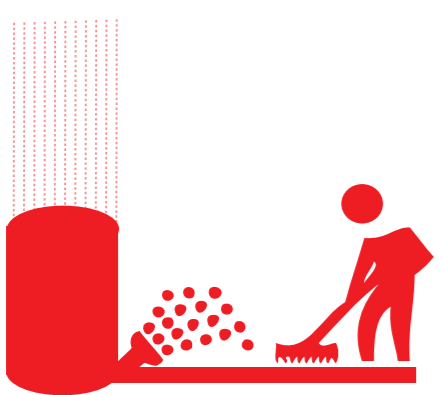

- Take a five minutes shower a day, instead of a bath.

- Turn off the tap between washing your face, brushing your teeth or shaving.

- Fix leaking taps in your house and in your work place.

- Install water harvesting tanks and collect rain water for watering your garden and other non-drinking functions.
