

Implementation of the HydroNET Water Control Room for all CMA's

**South African
Weather Service**

Michelle Hartslief

HydroNET

Content of presentation

- **Background**
 - Introduction of HydroNET
 - Demonstration at IUCMA
- Roll-out to all CMA's: implementation plan
- Tasks and responsibilities per partner
- Activity plan for the coming months
- Any other business

Drought & over allocation

Floods

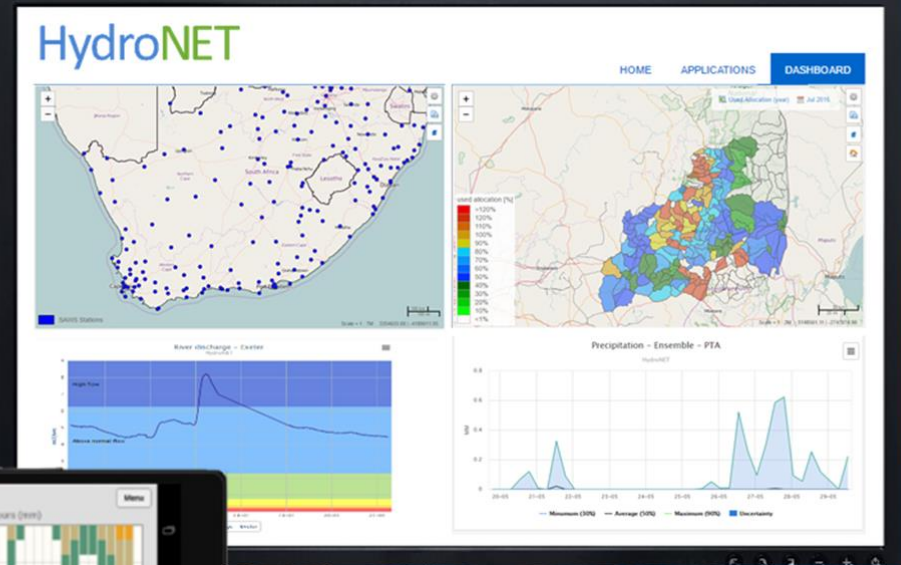

Pollution & eco system losses

Towards climate resilience:

- Operational decision support tools for the sustainable management of water resources
- Reporting tools to inform internal/external stakeholders

HydroNET

Web-based operational decision support system that transfers weather & water data into sophisticated dashboards and reports

2013: Demonstration of the HydroNET Water Control Room for IUCMA

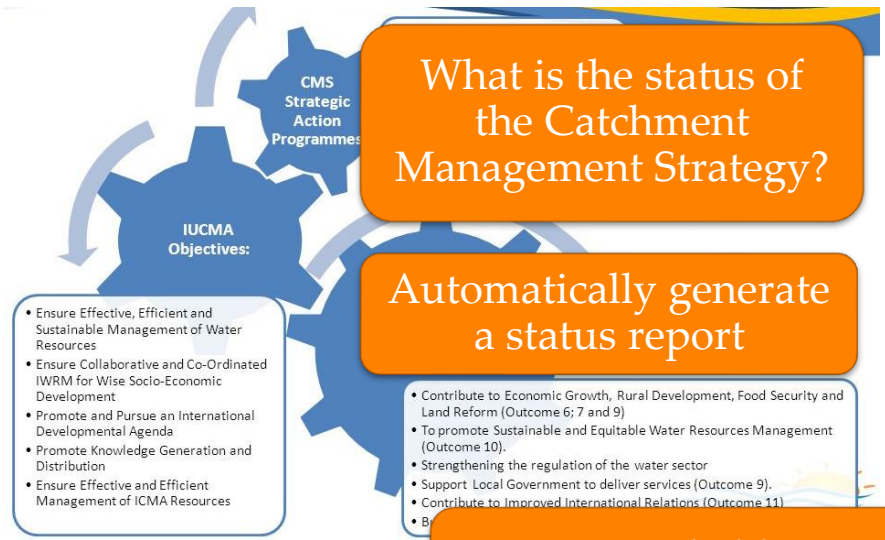

HydroNET

User requirement workshops

Insight in current and forecasted water availability: how to optimally distribute water resources?

Access to reliable weather & climate information is of key importance

Reduce water use: empower the water users

Water quality: who are the main polluters?

Conclusions

- HydroNET Water Control Room tailored to the needs of South African CMA's
- Successfully operational for IUCMA, PUCMA and other SA clients
- All Accessible via web:
 - No software or hardware required
 - Free automatic upgrades paid by the HydroNET community

HOME APPLICATIONS **DASHBOARD**

Subscription stage: month 4 - month 24

- Maintenance of platform, applications and data connections
 - Monitoring, Security, Accessibility

- Monthly upgrades of the software (no additional costs)

- Helpdesk
 - Front office: SAWS
 - Back office: IUCMA or HydroLogic

- Yearly Training at WMA

- HydroNET user forums

Configuration

Subscription

HydroNET forum meeting

- Coordinated by IUCMA
- 2 meetings per year with specialists
 - Share lesson's learned & user experiences
 - Discuss advances and collective benefits for the water sector
 - Collect wish list for new functionality
- Benefit from the HydroNET community

Tasks and responsibilities:

- Main contractor
 - Account management
 - Administration & Invoicing
- Present at steering committies
- First line helpdesk during office hours
 - Backend support from IUCMA/ HydroLogic
- Training of Weather applications to make WeatherSMART decisions
- Provision of Weather and Climate data (services)

Tasks and responsibilities: HydroNET

- Provide 24/7 access to the platform and applications
- Automatic software updates
- Configuration of applications
- Technical helpdesk
- Establish and maintain data connections
- Training and user manuals

Tasks and responsibilities: CMA's

- Provide shapefiles
 - Areas (e.g. quinary catchments)
 - Irrigated farms
- Provide per farm: allocation and crop type
- Provide local knowledge
- Attendance at Workshop, Training and Forum meetings
- Hosting of trainings
- Provide user feedback and experiences

Tasks and responsibilities: others

- eLEAF
 - Provision of monthly irrigated water use
 - Training Water Auditing application
- IUCMA
 - Training and capacity building
 - Coordination of HydroNET user forums
 - Coordination of new user requirements
- Kingfisher partners
 - Participate in trainings to bring in experience on the use of HydroNET to support water management decisions

DWS & regional heads

- DWS
 - Contact persons
 - Project manager: first point of contact
 - IT first point of contact
 - Marketing first point of contact
 - Internal and external promotion
- Regional heads
 - Arrange training venues
 - Get the right CMA persons to attend the trainings
- IT requirements
 - Allow HydroNET to access the DWS databases

Content of presentation

- Background
 - Introduction of HydroNET
 - Demonstration at IUCMA
- Roll-out to all CMA's: implementation plan
- Tasks and responsibilities per partner
- **Activity plan for the coming months**
- Any other business

Activities for the coming 3 months

Sep: Configuration of Weather Applications for all 7 CMA's

Oct: Training on making WeatherReady and ClimateSmart decisions at all CMA's

Oct: Launch of this project

- Launch plan
- 23rd of October (?)
- Venue (icw dutch embassy?)

Oct/Nov: Technical meeting on data connection

Training: making WeatherReady and ClimateSmart Decisions

- Experiences IUCMA and Kingfisher with weather & climate applications
- Training on weather and measurement methods by SAWS
- Training on usage of HydroNET Weather Applications
- Duration training: 2 days per CMA
- Planning: next slide

Proposed training plan

Monday	Tuesday	Wednesday	Thursday	Friday
15-10	16-10	17-10	18-10	19-10
PUCMA day 1	PUCMA day 2		DWS day 1	DWS day 2
22-10	23-10	24-10	25-10	26-10
Vaal day 1	Launch	Vaal day 2	Limpopo + Olifants day 1	Limpopo + Olifants day 2
29-10	30-10	31-10	01-11	02-11
Orange day 1	Orange day 2		Breede-Gouritz day 1 (optional)	Breede-Gouritz day 2 (optional)
05-11	06-11	07-11	08-11	09-11
Berg-Olifants day 1	Berg-Olifants day 2		Tsitsikamma day 1	Tsitsikamma day 2

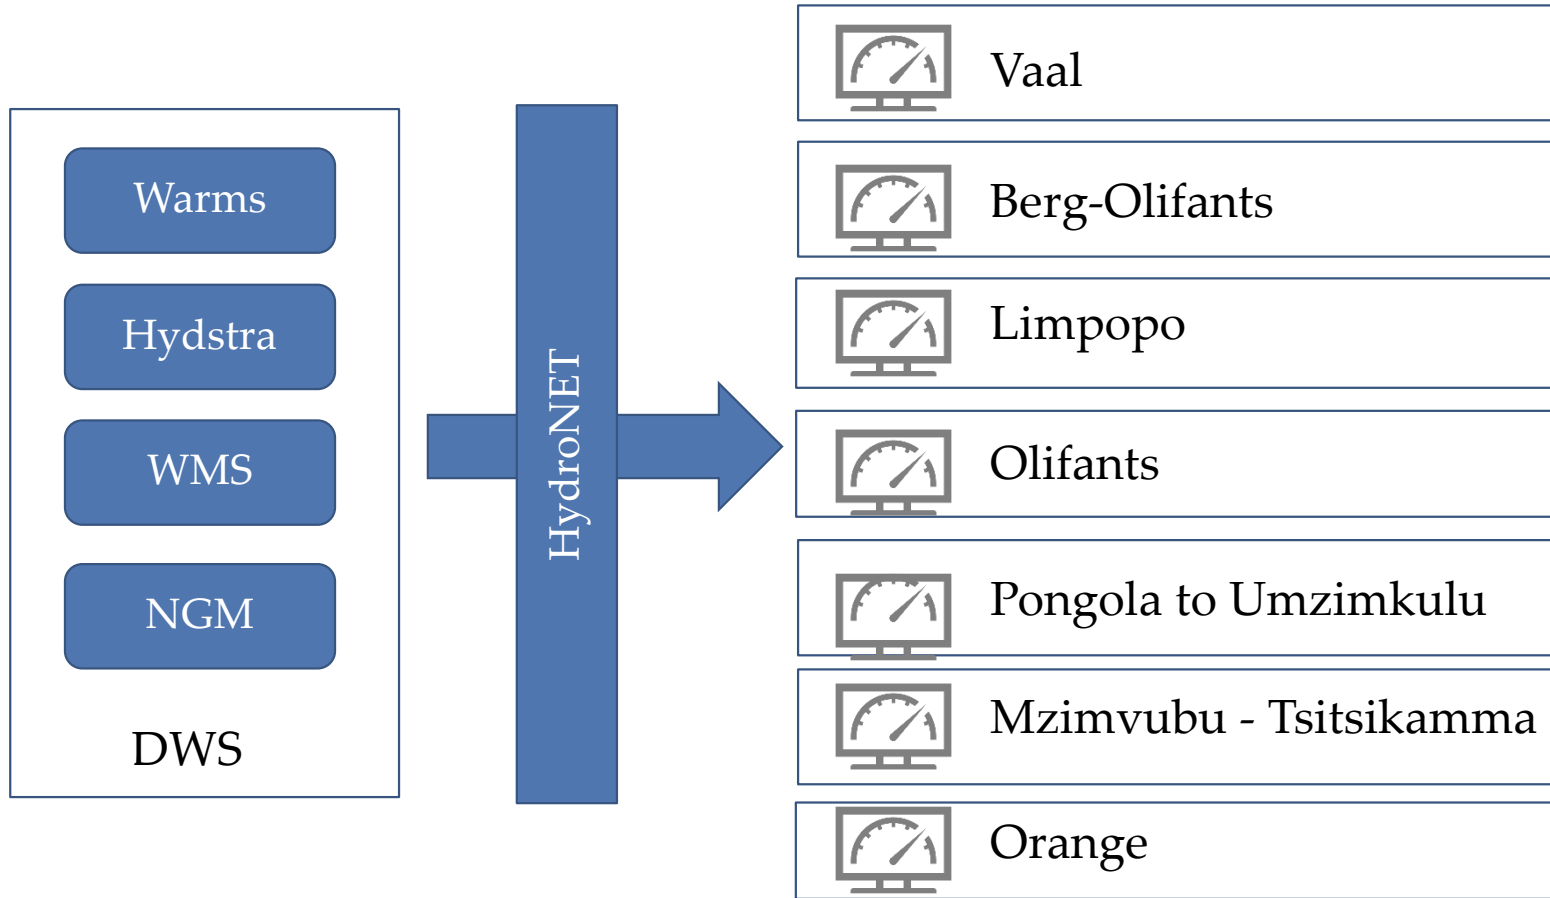

We need support from DWS!

- Facilitate venue per CMA
- Provide list with participants per CMA
- Provide shape files of different catchment levels
