CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

1. BACKGROUND

The Department of Water and Sanitation (DWS) is facing a number of challenges with managing its server and desktop assets. These challenges increase the costs and complexities of managing the environment and decrease the return on investment.

The following challenges are being experienced with the current Systems Centre Configuration Manager (SCCM), 2007 environment:

- ✓ Inability to target user instead of a device when distributing software
- ✓ Lack of user device affinity
- ✓ Inability to check the client health status of the client agent from the configuration manager
- ✓ Failure to remote control hosts which include multi-monitor support
- ✓ Lack of application catalogue server role which grant end user the ability to request software

The above challenges and the fact that Microsoft (Pty) Ltd will soon be discontinuing support for the (SCCM) 2007 has necessitated the Department of Water and Sanitation to consider a new design and deployment of the Systems Centre Configuration Manager 2012. **This will provide the following capabilities and efficiencies to DWS:**

- ✓ Improve hardware and software inventory capabilities.
- ✓ Improve license management capabilities by comparing what has been purchased with what has been deployed.
- ✓ Show usage trends for applications that have been deployed.
- ✓ Define organisational standards and report on compliance or non-compliance against those standards.
- ✓ Use the systems management platform to determine asset location.
- ✓ Enable centralised administration of organisational assets.

With the design and deployment of the SCCM 2012, DWS intends to continue to leverage from the benefits of SCCM as follows:

- ✓ Improved software distribution.

- ✓ Software updates management.
- ✓ Ensure high security levels through effective and proactive monitoring.
- ✓ Monitor configuration baselines to understand and maintain the state of computers.
- ✓ Remote support for users.
- ✓ Inventory management.
- ✓ Alignment to DWS's current architectural and operational practices.
- ✓ Software usage metering.
- ✓ Software license compliance.

- ✓ The successful bidder must configure and deploy one Windows 7 image on bare hardware. The successful proponent must also configure and deploy a minimum of 3 applications as part of demonstrating that the system is successfully deployed.
- ✓ The successful proponent will complete testing in the production environment where possible

The successful proponent must provide demonstration to DWS IT staff of the SCCM 2012 in the following areas:

- ✓ Push applications, packages, and updates to devices off campus

- ✓ Operating system deployment/capturing

All Sites in scope and estimated number of desktop workstations (Computer users) is attached as **Annexure A**. Also attached is the DWS Virtual Private Network (VPN) layout.

3. SPECIFIC MATTERS FOR CONSIDERATION

The DWS IT architecture comprises of two domains namely DWAF and DWA. There is a trust relationship between the two domains. The two domains are consisting of a variety of servers for File & Print, Applications, back-up etc. Some servers run Microsoft 2003 while others run the 2008 R2 operating system.

To date all users have been moved to the new DWS domain. DWS is busy with a project to migrate some business application servers that are still linked to the old domain. This is aimed at consolidating all users and peripheral infrastructure into the new domain and also to eliminate the technical and operational challenges that are currently experienced due to the fact that users are operating from the DWS domain while most business applications servers are in the old DWAF domain.
