The definition and measurement of the goals above is as follows:

Women, disability, and youth:

This will be measured by calculating the pro-rata percentage of ownership of the bidding company which meets this criterion. E.g., Company A has five shareholders each of whom own 20% of the company. Three of the five shareholders meet the criterion, i.e. they are women/disability/youth. Therefore, this bidder will obtain 60% of the points allowable for this goal.

Location of enterprise

Local equals province. Where a project cuts across more than one province, the bidder may be located in any of the relevant provinces to obtain the points.

B-BBEE status level contributors from level 1 to 2 which are QSE or EME

Measured in terms of normal BBBEE requirements.

Note: Formula for calculating points for specific goals

Preference points for entities are calculated on their percentage shareholding in a business, provided that they are actively involved in and exercise control over the enterprise. The following formula is prescribed:

$$PC = Mpa \times \frac{P-own}{100}$$

Where

PC= Points awarded for specific goal

Mpa= The maximum number of points awarded for ownership in that specific category

P-own = The percentage of equity ownership by the enterprise or business

REVIEW OF THE STRATEGIC FRAMEWORK FOR WATER SERVICES

1 INTRODUCTION AND BACKGROUND

The Strategic Framework for Water Services (SFWS) is one of the relevant Strategies seen as part of the Policy concept for Water Services. The SFWS outlines a robust approach to the management of water services to the people of South Africa. This framework emanates from the provision in the Constitution of the Republic of South Africa (Act 108 of 1996), which lays down specific fundamental rights in terms of water provision. The SFWS was developed in attempt to redress the racial imprints of apartheid that were associated with water services and address the water issues from equity and gender perspectives.

Before 2001, regulation, management, and implementation of water services (collectively referring to water supply and sanitation) was the responsibility of the central government, chiefly the Department of Water and Sanitation (then called Department of Water Affairs and Forestry). From 2001 onward, South Africa experienced a shift in the management structure of water services in the country. As per Constitutional requirements, the responsibility for providing water services devolved to the local government. The regulation and monitoring responsibility remained with the national government.

With the shift in roles and responsibilities in the water services sector, South Africa introduced the Strategic Framework for Water Services (SFWS). The SFWS provided a comprehensive approach to providing water services in South Africa, including services across the range of settlement types' (i.e. from small communities to large regional schemes). The SFWS outlined the changes of approach needed to achieve the Constitutional role of local government in providing water services and achieving policy goals and imperatives in this sector.

The purpose of the Strategic Framework was thus to put forward a vision for the water services sector in South Africa with a reviewable 10-year strategic timeline. The first SFWS was published in 2003 and outlined the framework that would enable the sector vision to be achieved between 2003-2013. The review of the SFWS was supposed to be in 2014.

The Strategic Framework set out a suite of goals, targets, and frameworks for the sector, including:

- An institutional framework
- A financial framework
- A planning framework
- National norms and standards
- A regulatory framework.

The SFWS outlined a robust approach to the management of water services to the people of South Africa.

1.2 STUDY MOTIVATION

The SFWS get its mandate from the provision in the Constitution of the Republic of South Africa (Act 108 of 1996), which lays down specific fundamental rights in terms of water provision. Section 154(1) calls on National and Provincial governments, by legislative and other measures, to support and strengthen the capacity of municipalities to manage their own affairs, to exercise their powers and to perform their functions. In addition, the Water Services Act of 1997 (Act No. 108 of 1997) under section 3(1) stipulates that “everyone has a right of access to basic water supply and basic sanitation”. Section 3(2) says that “every water services institution must take reasonable measures to realise these rights”. It is through these legislative prescripts that the development of SFWS emanate from to redress the racial imprints of apartheid that were associated with water services and address the water issues from equity and gender perspectives.

South Africa introduced the Strategic Framework for Water Services (SFWS) in 2003 to provide a comprehensive approach to the provision of water services, as constitutionally required, across the range of settlement types in the country. It has been more than nineteen years of implementation of the SFWS. Thus, it is time to review the strategy in the context of achievements, impacts, gaps and challenges, success factors, and new developments in the water sector and policy/legislative environment in the country.

The review of the SFWS is informed by the recent extensive paradigm shift in terms of water services provisions. This includes, amongst others:

- a) The shift was informed by the National Development Plan (NDP) and Medium Term Strategic Framework (MTSF) with their goals and targets; Strategic Infrastructure Project 18; Sustainable Development Goals (SDGs) of the United Nations; National Water Policy Review of 2013 with its new water imperative; National Sanitation Policy (2016); National Water and Sanitation Master Plan; Water Services Amendment Bill; National Water Resource Strategy 3; National Sanitation Framework; National Norms and Standards which are underway.
- b) Consideration in the new requirements for sanitation management across the sanitation value chain.
- c) A shift in achieving water and sanitation provisions that are more than just basic (moving up the ladder).
- d) Adopting a sector approach with associated sector involvement, commitment and obligations.
- e) An outcome and delivery-based approach.
- f) Mobilizing Private Partnerships to aid in infrastructure investment

The scope and extent of the above task to be completed in a limited timeframe is such that it cannot be implemented in-house alone due to lack of capacity and limited Human

Resources. The Specialist Unit: Water Services Policy, Strategy and Evaluation is currently running on limited human resources with limited knowledge in the field of finance, engineering to name a few. Moreover, the Specialist Unit: Water Services Policy, Strategy and Evaluation is currently running other massive projects internally and thus will need assistance with the review of the SFWS through a Professional Service Provider. The review of the SFWS will require specific and significant support in various areas. DWS will maintain the leadership and coordinating role, assisted by an extended task team to support activities on preparatory and operating levels. The task team will include specialist support to the Directorate and the Strategic Framework for Water Services review team.

The SFWS strategic coordination role implies extensive consultation of and support to all departmental sections involved in their respective roles in the entire water and sanitation value chain of water resources management and water services provision oversight. The review of the SFWS and subsequent implementation of it, also requires extensive water use sector mobilisation.

2. OBJECTIVES OF THE PROJECT

The objectives are to:

- Review the current SFWS
- Develop an implementation plan to assist the water and sanitation sector to implement the provisions of the SFWS
- Stakeholder participation or a Public Consultative Process
- Initiate and provide support during the review process as required.

This project is to support and facilitate the achievement of these objectives.

3. SCOPE OF WORK / METHODOLOGY

The detailed tasks for the project are discussed in this section.

3.1 PROJECT INCEPTION

The primary purpose of this phase is to allow the scope of work to be clearly defined from the onset. The inception phase is intended to provide an opportunity for the identification, assessment and interpretation of the nature and scope of the project and to document all the relevant information available to support the review of the SFWS. The inception task must include:

- The definition of all the role-players
- Project scope
- Interfacing with other relevant initiatives and the study budget
- Stakeholder engagement plan
- Capacity building and mentorship plan.

3.2 STRATEGIC FRAMEWORK FOR WATER SERVICES DATA GATHERING AND REVIEW

In this task, the existing literature, reports, and any other relevant information for the review of the SFWS must be reviewed. This project will build from the assessment of the impact of SFWS done/completed by WRC in 2016. It is expected that this task be run concurrently with the inception phase as the outcome of the information gap analysis will guide the rest of the project programme. This task therefore includes the following:

- Compile a comprehensive literature review on the water and sanitation delivery mechanisms such as but not limited to the Institutional Frameworks, Financial Frameworks, Planning Frameworks, National Norms and Standards, and the Regulatory Frameworks.
- Provide gap analysis of the identified water and sanitation delivery mechanisms
- Provide a report with proposed recommendations on the water and sanitation delivery mechanisms
- Conduct robust stakeholder engagements on the review of the SFWS

3.3 COMMUNICATION AND LIAISON

The process of reviewing the SFWS is underpinned by a robust stakeholder engagement. Stakeholder and public consultation process should take place throughout the duration of the project. The appointed PSP should budget and make provision for a stakeholder engagement plan to engage with all relevant stakeholders throughout the duration of the project. A register of all stakeholders that need to be consulted should be compiled and a database should be created to capture all the comments received during the project. The scope of the communication and liaison services to be provided by the PSP will include, but not be limited to the following:

- Consolidated stakeholder database.
- Establishment, in consultation with the Client, of appropriate institutional arrangements to facilitate the progress of the project
- Sectoral Meetings/Workshops (Minimum of 1 per sector)
- Project Management Committee (PMC): these meetings should be held on a quarterly basis. This committee will be comprised of relevant Departmental officials, WRC officials and the PSP team; these officials will be identified by the DWS project manager.
- Project Steering Committee (PSC): a minimum of 5 meetings throughout the project period. The PSC will be comprised of members from various sectors with interest in the project including municipalities; their role is to provide strategic direction and guidance on the study process and tasks; they also serve as

representatives of their stakeholder bodies and organisations and are therefore expected to report back to their organisations on an ongoing basis regarding the study decisions and results.

- Public consultation sessions (minimum of 19 (two in each province and one national consultation).
- Development of appropriate communication material and information products for media and website promotional material.
- Maintenance of the communication database.
- Consolidated issues and response reports.

3.4 REPORTING

The appointed PSP shall produce at least the following project management outputs:

- Monthly Progress reports required to properly inform the Client on progress shall be compiled by the PSP and should document the following:
 - The progress of work against the programme
 - Actual expenditure against cash flow estimates
 - Significant findings and outcomes thereof
 - Corrective actions taken in respect of work programme and
 - Cash flow estimates
 - Ensure that a complete record of proceedings of the project meetings is maintained and appropriately documented.
 - Technical progress reports should be provided after each defined deliverable in the form of an interim milestone report. These reports shall describe the procedures; methodologies followed; the results achieved and shall be prepared and submitted to the Client according to the milestone programme. These reports will be used as supporting documents towards the compilation of the main study report.
 - The report/s should be provided after each defined deliverable and will need to be approved by the client.
 - Report on study progress (technical and human resources) at project management meetings and at other forums.

3.5 CAPACITY BUILDING

In terms of building capacity and ensuring skills transfer within the DWS, it will be the responsibility of the PSP to establish a capacity building programme aligned to the skills developmental needs of identified officials responsible for water and sanitation services within DWS. During the inception phase, a capacity building framework should be

established between DWS and the PSP containing the required learning areas that will ensure broadening of the skills base of identified officials. Capacity building can be realised through the participation of relevant DWS officials in the project so that they develop an understanding of the development of strategic documents of this magnitude. This will contribute to the broadening of the skills base through participants being involved in the day to day running of the project.

To ensure skill transfer within the DWS, it is expected that capacity building be offered at 2 different levels, namely:

- mentorship programme,
- capacity building workshops and

The mentorship programme must be designed in a way that will allow the mentee(s) to have technical tasks and responsibilities whose output will feed into the overall technical milestones/deliverables of the project.

The capacity-building workshops will cater for a larger group and will consist of DWS personnel. The topics to be covered for such workshops will be finalised with the PSPs in consultation with the Department. The DWS will second officials to be included in the project team composition as trainees. This is done in order to achieve the departmental objectives of skills transfer. Details of the secondment will be provided at the inception meeting.

8.2 PHASE 2: PRICE AND PREFERENCE POINT SYSTEM (SPECIFIC GOALS).

Price

The 80/20 Preferential Procurement System will be used in evaluating these bids:

Evaluation element	Weighting (Points)
SPECIFIC GOALS	20
PRICE	80
Total	100

Price

A maximum of 80 points are allocated for price on the following basis:

$$P_s = 80 \left(1 - \frac{P_t - P_{\min}}{P_{\min}} \right)$$

Where:

P_s = Points scored for comparative price of bid under consideration

P_t = Comparative price of bid under consideration

$P_{\min}$ = Comparative price of lowest acceptable bid

Preference point system

SPECIFIC GOALS	NUMBER OF POINTS TO BE ALLOCATED
Women	5
People with disability	5
Youth (35 and below)	5
Location of enterprise (Province)	2
B-BBEE status level contributors from level 1 to 2 which are QSE or EME	3
Total points for SPECIFIC GOALS	20

Documents Requirement for verification of Points allocation: -

Procurement Requirement	Required Proof Documents
Women	Full CSD Report
Disability	Full CSD Report
Youth	Full CSD Report
Location	Full CSD Report
B-BBEE status level contributors from level 1 to 2 which are QSE or EME	Valid BBBEE certificate/sworn affidavit Consolidated BEE certificate in cases of Joint Venture Full CSD Report

The definition and measurement of the goals above is as follows:

Women, disability, and youth:

This will be measured by calculating the pro-rata percentage of ownership of the bidding company which meets this criterion. E.g., Company A has five shareholders each of whom own 20% of the company. Three of the five shareholders meet the criterion, i.e. they are women/disability/youth. Therefore, this bidder will obtain 60% of the points allowable for this goal.

Location of enterprise

Local equals province. Where a project cuts across more than one province, the bidder may be located in any of the relevant provinces to obtain the points.

B-BBEE status level contributors from level 1 to 2 which are QSE or EME

Measured in terms of normal BBBEE requirements.

Note: Formula for calculating points for specific goals

Preference points for entities are calculated on their percentage shareholding in a business, provided that they are actively involved in and exercise control over the enterprise. The following formula is prescribed:

$$PC = \frac{Mpa \times P\text{-own}}{100}$$

Where

PC= Points awarded for specific goal

Mpa= The maximum number of points awarded for ownership in that specific category

P-own = The percentage of equity ownership by the enterprise or business

Conditions:

- Bidders are further requested to provide separate financial and technical proposals.
- Bidders are requested to provide a clear agreement regarding joint venture/consortia. The percentage involvement of each company in the joint venture agreement should be indicated on the agreement. A trust, consortium or joint venture must submit a consolidated B-BBEE Status Level Verification Certificate for every separate bid.
- Bidders are required to submit original and valid B-BBEE Status Level Verification Certificates or copies thereof together with their bids, to substantiate their B-BBEE rating claims.
- The Department will conduct due diligence to ensure company stability.
- Bidders are requested to submit a list of interns or candidates mentored by the company in order to complete their studies or become registered professionals. Provide the list with signed employment agreement, agreement letters with academic institutions or with a regulatory body if any e.g., SACNASP, ECSA, SAICA, CIMA, ACCA, IRBA and other. The service provider will be expected to provide a number of interns recruited or planned to recruit to participate in this project within 14 days of receiving an appointment letter from the Department of Water and Sanitation.
