The definition and measurement of the goals above is as follows:

Women, disability, and youth:

This will be measured by calculating the pro-rata percentage of ownership of the bidding company which meets this criterion. E.g., Company A has five shareholders each of whom own 20% of the company. Three of the five shareholders meet the criterion, i.e. they are women/disability/youth. Therefore, this bidder will obtain 60% of the points allowable for this goal.

Location of enterprise

Local equals province. Where a project cuts across more than one province, the bidder may be located in any of the relevant provinces to obtain the points.

B-BBEE status level contributors from level 1 to 2 which are QSE or EME

Measured in terms of normal BBBEE requirements.

Note: Formula for calculating points for specific goals

Preference points for entities are calculated on their percentage shareholding in a business, provided that they are actively involved in and exercise control over the enterprise. The following formula is prescribed:

PC= Mpa X <u>P-own</u> 100

Where

PC= Points awarded for specific goal

Mpa= The maximum number of points awarded for ownership in that specific

category

P-own = The percentage of equity ownership by the enterprise or business

PHASE 4 - PRICE AND SPECIFIC GOALS

Table 3: The 80/20 Preferential Procurement System will be used in evaluation these bids

	POINTS
PRICE	80
Specific goals	20
Total points for Price and Specific goals must not exceed	100

Price

A maximum of 80 points are allocated for price on the following basis:

$$Ps = 80 \left(1 - \frac{Pt - P \min}{P \min}\right)$$

Where:

Ps = Points scored for comparative price of bid under consideration

Pt = Comparative price of bid under consideration

Pmin = Comparative price of lowest acceptable bid

Preference point system

Procurement Requirement Required Proof Documents Women Full CSD Report Full CSD Report Disability Youth Full CSD Report Location Full CSD Report B-BBEE status level contributors from Valid BBBEE certificate/sworn affidavit level 1 to 2 which are QSE or EME Consolidated BEE certificate in cases of Joint Venture Full CSD Report

The definition and measurement of the goals above is as follows:

Women, disability, and youth:

This will be measured by calculating the pro-rata percentage of ownership of the bidding company which meets this criterion. E.g., Company A has five shareholders each of whom own 20% of the company. Three of the five shareholders meet the criterion, i.e. they are women/disability/youth. Therefore, this bidder will obtain 60% of the points allowable for this goal.

Location of enterprise

Local equals province. Where a project cuts across more than one province, the bidder may be located in any of the relevant provinces to obtain the points.

B-BBEE status level contributors from level 1 to 2 which are QSE or EME

Measured in terms of normal BBBEE requirements.

Note: Formula for calculating points for specific goals

Preference points for entities are calculated on their percentage shareholding in a business, provided that they are actively involved in and exercise control over the enterprise. The following formula is prescribed:

PC= Mpa x <u>P-own</u> 100

Where

PC= Points awarded for specific goal

Mpa= The maximum number of points awarded for ownership in that specific category

P-own = The percentage of equity ownership by the enterprise or business
