"Specific goals" means specific goals as contemplated in section 2(1)(d) of the PPPFA Act which may include contracting with persons, or categories of persons, historically disadvantaged by unfair discrimination on the basis of race, gender and disability including the implementation of programmes of the Reconstruction of Development Programme as published in *Government Gazette* No. 16085 date 23 November 1994.

- ii. A deaf person, whose hearing is impaired to such an extent that he/she cannot use it as a primary means of communication;

Therefore, this Tenderer will obtain 60% of the points allowable for this goal.

The nature and extent of the work is to be ascertained by reference to all the documents comprising the Contract. Where Clause references are contained in item descriptions, these are given for guidance only and are not exclusive to other relevant provisions of the Contract.

State the rates and prices in Rand unless instructed otherwise in the tender conditions.

Any entry made by the Tenderer in the Bill of Quantities, form, etc., which the tenderer desires to change, shall not be erased or painted out. A line shall be drawn through the incorrect entry and the correct entry shall be written above in black ink and the full signature of the Tenderer shall be placed next to the correction.

Reasonable unit rates and prices shall be entered in the Bill of Quantities as these will be used for the assessment of payment for any additional work that may have to be carried out.

All prices shall be tendered in accordance with the units specified in this schedule. Where a value is given in the "Quantity" column, a Rate and Price is required to be inserted in the relevant columns. Each item shall be priced and extended to the "Total" column by the Tenderer, with the exception of the items for which "rate only" is required or items which already have Prime Cost or Provisional Sums affixed thereto. Check responsive tenders for discrepancies between amounts in words and amounts in figures. Where there is a discrepancy between the amounts in figures and the amount in words, the amount in words shall govern.

Check the highest ranked tender or tenderer with the highest number of tender evaluation points after the evaluation of tender offers in accordance with 6.11 for

- the gross misplacement of the decimal point in any unit rate,
- omissions made in completing the pricing schedule or bill of quantities, or
- arithmetical errors in

Initial _____

- 1) line-item totals resulting from the product of a unit rate and a quantity in bill of quantities or schedules of prices, or
- 2) the summation of the prices.

Notify the tenderer of all errors or omissions that are identified in the tender offer and either confirm the tender offer as tendered or accept the corrected total of prices.

Where the tenderer elects to confirm the tender offer as tendered, correct the errors as follows:

- d) If a bill of quantities or pricing schedules apply and there is an error in the line-item total resulting from the product of the unit rate and the quantity, the line-item total shall govern, and the rate shall be corrected. Where there is an obviously gross misplacement of the decimal point in the unit rate, the line-item total as quoted shall govern, and the unit rate shall be corrected.
- e) Where there is an error in the total of the prices either as a result of other corrections required by this checking process or in the tenderer's addition of prices, the total of the prices shall govern, and the tenderer shall be asked to revise selected item prices (and their rates if bill of quantities apply) to achieve the tendered total of the prices.

Consider the rejection of a tender offer if the tenderer does not correct or accept the correction of errors in the required manner.

9. PROVISIONAL ITEMS

All items described as "Provisional" shall be used as directed by the Employer and measured and valued or paid for. No work for which "Provisional" items are allowed shall be commenced without written instructions from the Employer.

C4.5 GEOTECHNICAL REPORT

1. INTRODUCTION

The DWS CN Materials Laboratory was required to establish the rock formation on the center of the piers of the bridge. The DWS drilling team from Polokwane were also requested to assist in the required scope of works. This report will briefly to the point provide the drilled level of the rock formation of all the coordinated points and the reduced levels.

2. THE METHOD OF INVESTIGATION

The achievement of the drilling was done collectively by the DWS intergarted teams as follows:

- Survey: All the points to be investigated were surveyed by DWS survey team,
- The Site Team: The Construction team assisted in the clearing and levelling of the ground where setting out of drilling equipment was to be placed.
- The Drilling Team: they did setting out of the drill equipment and the operation and data acquisition. Typical setting out of the drill equipment in pic 1.
- The Lab team: they interected with the drilling team for sampling of cores, data collection and analysis.
- Security: the security safe guarded the equipment day and night and avoiding us to dismantle and set out the equipment again.

5. REPORT CONCLUSION

The drill team was required to drill to a depth of 6m for the Geotechnical investigation to profile the anticipated rock formation. We extended the drill to the depth as reflected on the core drill report to ascertain that we reach the rock formation.

It is imperative that the Geotech and Design Engineer can make their assessment of the report and their final conclusions of the intended foundation of Mulenzhe bridge design parameters.
