

NATIONAL ASSEMBLY

FOR WRITTEN REPLY

QUESTION NO 73

DATE OF PUBLICATION IN INTERNAL QUESTION PAPER: 8 FEBRUARY 2008
(INTERNAL QUESTION PAPER NO 1)

73. Mr M M Swathe (DA) to ask the Minister of Water Affairs and Forestry:

What is the (a) name, (b) location, (c) capacity in megalitres and (d) current work capacity in megalitres of each water sanitation plant?

N432ENG

---00000---

REPLY:

It was not clear what the Honourable Member meant by “water sanitation plant” and it was assumed he refers to Waste Water Treatment plants, commonly known as sewage works.

There are approximately 1 619 Waste Water Treatment plants in the country (comprehensive lists, per province, are attached to this reply). Most of them are owned and operated by local authorities, some are still, owned and operated by the Department of Water Affairs and Forestry while a small fraction are privately owned or owned by other government departments and agencies.

My Department is regulating the Waste Water Treatment system by developing norms and standards for the effluent discharged and monitoring the quality of effluent so discharged from these works and through the licensing process.

My Department does, however, not monitor whether a specific Waste Water Treatment plant actually receives more sewage than what it was designed for. It is suggested that the Honourable Member should now, with these lists in hand, interrogate the specific municipality.

PROVINCE:
