WEEKLY UPDATE: GAUTENG WATER SECURITY DASHBOARD

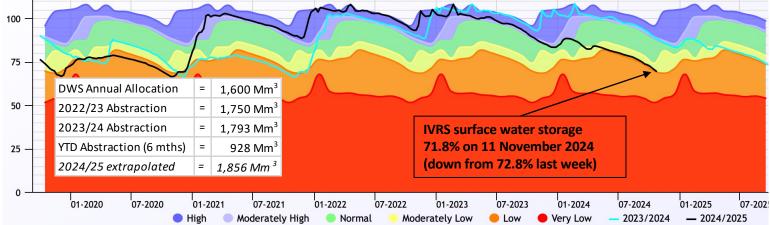

1. METRO WATER CONSUMPTION	TOTAL	Joburg	Ekurhuleni	Tshwane	Emfuleni
This Week Average Daily Use (MLD)	3,799	1,676	1,036	772	315
Last Week Average Daily Use - corrected (MLD)	3,885	1,717	1,015	844	309
Water Use Efficiency Target Use (MLD)	3,283	1,356	1,022	666	239
DIFFERENCE BETWEEN TARGET AND ACTUAL (MLD)	516	320	14	106	76
% Deviation from target use	16%	24%	1%	16%	32%
Gross Per capita use (Icd)	268	275	255	194	436
Increase/Decrease from previous week	-	→	1		1

- - Decrease from last week, but above target
- Increase from last week, but in target
- Decrease, within target
- Increase

- MLD = millions of litres per day, the common measurement of total water use for cities
- WUE = Water use efficiency targets is the target demand that matches the licence conditions of Rand Water. This is shown as target demand in dotted lines on the graph. The three metros & Emfuleni comprise ±90% of the WUE target
- Weekly demand figures are from Rand Water meter readings. System balancing and reconciliation due to meter inaccuracies sometimes result in corrections to previous weekly readings.
- Metro water use has decreased overall in the past week, with combined use now 16% above target. All major users are using more water than their water use efficiency targets.

2. OVERALL WEEKLY CONSUMPTION / WATER USED FOR JOHANNESBURG, TSHWANE, EKURHULENI METROS & EMFULENI Actual 1,676 1600 320 MLD OVER **JOBURG** Target 1,356 Actual 1,036 **EKURHULENI** 1100 14 MLD OVER Target 1,022 Actual 772 600 TSHWANE **106 MLD OVER** Target 666 Actual 3§5 **EMFULENI** 100 **76 MLD OVER** Oct 22 Jan 23 Apr 23 Jul 23 Oct 23 Jan 24 Apr 24 Jul 24 Oct 24 Target 239

3. IVRS SYSTEM STATUS – 5-year Vaal Major combined surface water storage

The 5-year Vaal Major system storage is shown as an indication that it is tracking lower than in the previous 3 years. DWS Restrictions are implemented on the IVRS when dam levels are below 60% at the beginning of the hydrological year starting in May of each year. Should over-abstraction continue, and rainfall be lower than normal, the DWS model is likely to indicate that restrictions be imposed in May 2025. Sources:

https://www.dws.gov.za/niwis2/SurfaceWaterStorage and https://www.dws.gov.za/Hydrology/Weekly/RiverSystems.aspx?river=IV

The weekly weather forecast shows warm to hot weather across Gauteng & fair amount of rain forecast for the next week. All water users are urged to use water sparingly; to refrain from using tap water to irrigate gardens, wash down hard-surfaces etc.
