

DEPARTMENT OF WATER AND SANITATION

Water is Life
Sanitation is Dignity

ANNUAL PERFORMANCE PLAN

VOTE 36

FOR THE FISCAL YEARS
2017 | 18 to 2019 | 20

water & sanitation

Department:
Water and Sanitation
REPUBLIC OF SOUTH AFRICA

Foreword by the Minister

The revised Strategic Plan of the Department Foreword by the Minister

The revised Strategic Plan of the Department of Water and Sanitation encapsulates the planning trajectory of the department towards the realisation of the objectives of the National Development Plan and Vision 2030. It does so by aligning the strategic framework to the 2014 – 2019 Medium Term Strategic Framework and the performance delivery agreement that I have signed with the Honourable President, Mr Jacob Zuma. In this context, I am committed to ensuring our work contributes to the radical-socio-economic transformation agenda of the 5th administration of government.

Given the service delivery environment we are functioning in; I am acutely aware of the formidable challenges towards the achievement of the vision of “equitable and sustainable water and sanitation that supports socio-economic growth and development for the well-being of current and future generations.” One of the most pressing challenges South Africa is currently facing is the strongest El Nino on record which has also put water and food production under threat. We are working together with other sectors of government, civil society and the private sector to alleviate the devastating impact of the drought.

A number of solutions such as desalination plants for our coastal towns; drilling of new boreholes

and refurbishment of existing boreholes are being considered to ensure continued supply of water. Although significant rains at the beginning of 2017 improved levels of water stored in our reserves in eight of the nine provinces; this does not translate to an indication of a recovery from the drought. Full recovery is only anticipated in about three years' time. Recognising that South Africa is a water scarce country; what is required of us is to change the mindset in the way we use water and seek innovative means to incorporate smart technologies to conserve water as much as we can in the present while planning for the future.

As we continue to consolidate the gains made since the advent of our democratic dispensation and ensuring that South Africa becomes a better place live, it is important to acknowledge that hard work is still required to address the triple challenge of poverty, unemployment and inequality. Therefore, investing in the youth and mainstreaming women in all the work and outputs of the water and sanitation sector is a vital component of this strategic plan. One such programme is the Women in Water Incubator Programme which is aimed at creating a supportive environment where existing and new women entrepreneurs, particularly those from previously disadvantaged groups, are able to start-up and develop their businesses from available opportunities in the water and sanitation sector.

As a cross-cutting sector; we have an important role to play in ensuring the success of the drivers and enablers of the nine-point intervention plan announced by the President at his SONA 2015. Cooperation with our sister departments and all spheres of government must assist us to deliver services to our people in a coordinated fashion. Together with our water and sanitation sector entities; that remain a critical backbone as repositories of additional skills and capacity; we will continue to enhance the development of new skills with particular emphasis on the previously disadvantaged, in all areas of expertise spanning the sector value chain.

The Department of Water and Sanitation will continue to play a leading role in creating the environment for the achievement of the goals stated in this Strategic Plan in partnership with all stakeholders, social partners as well as the private sector. We will continue to work with and be guided by the Parliamentary Committees responsible for oversight over our work. This oversight and attention is necessary for our focus on the broader necessities and requirements of the electorate.

Together with the rest of the team in the Department, led by the Director General, Dan Mashitisho, are committed to ensuring that we effectively transform the water and sanitation sector as well as provide quality water and decent sanitation to our people.

I recommend this Revised Annual Performance Plan for 2017/18 to 2019/20 to Parliament, and also to the people of South Africa.

Mrs N P Mokonyane
MINISTER OF WATER AND SANITATION

Message from the Deputy Minister

The programme of change and transformation in the Department of Water and Sanitation continues with new approaches introduced and new role players identified in conducting our business.

The existing Water Boards are to be aligned in relation to the various provinces and will now be at the centre of the work we do in the local municipalities. The Department will work towards clear segregation of duties between the Water Boards, the District Municipalities and the Local municipalities.

In the last financial year the Department worked very closely with individual municipalities in the various provinces. The District Municipalities have since been charged with a responsibility to coordinate water and sanitation services backlogs in their area of operation.

Presently, in the Eastern Cape we have managed to source information on the water and sanitation services backlogs in Joe Gqabi, Amathole and Chris Hani District Municipalities. In this financial year we will engage all District Municipalities in the country to collect this data and avail to the Department these water and sanitation services backlogs.

This will be done through interactions in meetings with individual district municipalities. This will be coupled with provincial water and sanitation conferences. These conferences will be a platform

to continuously share the vision of the Department and mobilise districts to work together with local municipalities in their jurisdiction.

Together with the Water Research Commission, the Department will allow new partners in the water and sanitation space to showcase and present new technology in the market that could assist in alleviating water and sanitation challenges.

Our work in the management of the water resource will continue through youth and women targeted projects. The National Youth Water and Sanitation Summit will now be positioned better to attract more youth and student formations.

This year's Summit will include more schools, out of school youth formations and many young professionals coming from both the private and the public sector. The information that will be shared in the Summit will be based on the experiences and knowledge acquisition on topical water and sanitation sector issues in the various provinces.

The 2020 Vision for Water and Sanitation Programme aimed at educating schools about water conservation and promotion of water sector careers will be enhanced. Provinces will be required to demonstrate their footprint of this project in each local municipality.

The War on Leaks Programme aimed at eradicating water leaks whilst creating jobs for the youth will in this financial year take in additional 7000 trainees into the system. The 3000 trainees who were part of the 2015 intake will be placed in training institutions closer to their homes and in service training be arranged with their local municipalities.

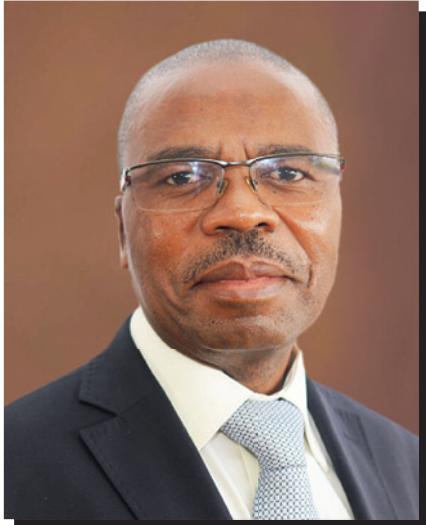

The Adopt a River Project aimed at addressing pollution in the rivers whilst empowering women through job creation and skills development will be sourced with resources such as personnel that will oversee the project implementation and with funding for provisioning of the project.

The Departmental Unit working on the transformation of women will be assisted to achieve these targets through engagements and joint planning sessions.

In 2017 all our efforts will be directed at mitigating the severe drought conditions that have been experienced recently. The Department will ensure that the challenges of water and sanitation are tackled by all caring and freedom loving South Africans going forward.

Mrs P Tshwete (MP)
DEPUTY MINISTER OF WATER AND SANITATION

Overview of the Accounting Officer

Mr Dan Mashitisho
DIRECTOR-GENERAL
Department of Water and Sanitation

The nature of the department and the mandate thereof as derived from the country's Constitution, together with the political direction of two very well respected and "steeped in community service" leaders embodied in the Minister and Deputy Minister, leads me to believe that all of us have to roll up our sleeves and keep in step and in line with our political leaders.

The communities we serve are varied and therefore as the Department of Water and Sanitation team we must ensure that the plans and delivery timelines must release the communities from the frustrations of the society we come from. Our freedom and that of the people we serve cannot be complete until as a team, we realise and understand that what we are about is the comfort of the communities, wherever they may be.

Whilst the delivery of basic services must happen quickly, we must also strictly adhere to all governance processes and requirements. The service delivery tools in our hands, from the Constitution, to the National Water Act, Water Services Act, Water Research Act, including all the relevant policy mandates and strategies, form a solid basis upon which to build our plans for the next financial years.

The department's planning process for the 2017/18 medium term has been intensive by also including representatives from the department's public entities. This process critically reviewed and recommended changes to the strategic framework of the Department and indeed the broader water and sanitation sector .

Informing this process was the need to strengthen the situational analysis and performance environment. Most importantly was the need to respond to emerging policy in the form of the National Water Resources Strategy-2, National Sanitation Policy and to strengthen alignment to the Medium Term Strategic Framework (the MTSF) as per the Minister's Performance Agreement.

All the major water infrastructure projects currently underway including sanitation services must be steered towards completion in the allocated timeframes. Proper and timely support to local government must happen within the allowed parameters whilst being conscious of the need to address the communities' patience and right to services.

All of us have a duty to the people of South Africa. We have to stand together, give all the technical support to our principals, and most importantly, have pride in what I believe we can all achieve together.

The plan seeks to better assert the role of the department as a sector leader and it is in line with the National Development Plan, Vision 2030, the MTSF 2014-19, and in support of the radical socio-economic transformation agenda of the government of the day. In addition, this plan sets out our transformative ambitions for the water and sanitation sector, and the mechanisms through which we will guide and support its development – as a participatory and collaborative water and sanitation sector.

Mr Dan Mashitisho
DIRECTOR-GENERAL

Official sign off

This annual performance plan was developed by the sectoral management of the Department of Water and Sanitation under the guidance of the Executive Authority.

It takes into relevant policies, legislation and other mandates for which the Department is responsible and accurately reflects the strategic outcome oriented goals and objectives which it will endeavour to achieve over the 2017 medium term period.

Part A:

Strategic Overview

Strategy map of the DWS

1 Updated situational analysis

South Africa has adopted the United Nation's post-2015 development agenda that identified 17 Sustainability Development Goals (SDGs). The right to water and sanitation for all is identified in goal six (6) and the 2030 targets are listed as follows:

- Achieve universal and equitable access to safe and affordable drinking water for all
- Achieve access to adequate and equitable sanitation and hygiene for all and end open defecation, paying special attention to the needs of women and girls and those in vulnerable situations
- Improve water quality by reducing pollution, eliminating dumping and minimizing release of hazardous chemicals and materials, halving the proportion of untreated wastewater and substantially increasing recycling and safe reuse globally
- Substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater to address water scarcity and substantially reduce the number of people suffering from water scarcity
- Implement integrated water resources management at all levels, including through trans-boundary cooperation as appropriate
- By 2020, protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers, aquifers and lakes
- Expand international cooperation and capacity-building support to developing countries in water- and sanitation-related activities and programmes, including water harvesting, desalination, water efficiency, wastewater treatment, recycling and reuse technologies
- Support and strengthen the participation of local communities in improving water and sanitation management

This brief contextual overview sets the tone for the critical review of the performance environment of the DWS and the broader water and sanitation sector.

1.1 Performance environment

South Africa is located in a predominantly semi-arid part of the world that is characterised by a highly uneven natural availability of water due to poor spatial rainfall distribution (see illustration in the figure 1 below). This is further compounded by the strong seasonality rainfall as well as high within-season variability over the entire country.

The country has no real large or navigable rivers and the combined flow of all rivers is estimated at 49 000 million cubic metres per year (m^3/a). Surface runoff is also highly variable resulting in the streamflow of the country's rivers at relatively low levels for most of the time. The sporadic high flows that do occur limit the proportion of streamflow that can be relied upon to be available for use. These circumstances also have implications for water-related disasters such as droughts and floods.

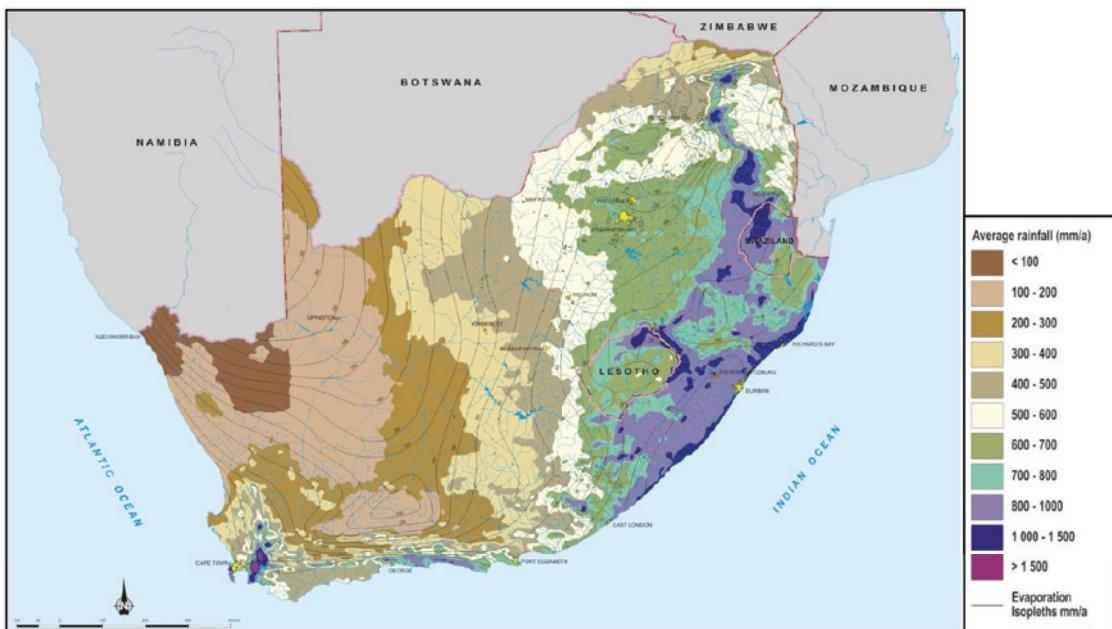

Figure 1: Water management areas

South Africa shares four (4) of its main rivers (i.e. Limpopo, Inkombati, Pongola, and Orange) with other countries, making their judicious joint management of paramount importance. To facilitate the management of water resources, the country has been divided into nine (9) management areas (WMAs) as illustrated in the figure below. The analysis will be thus based on these WMAs.

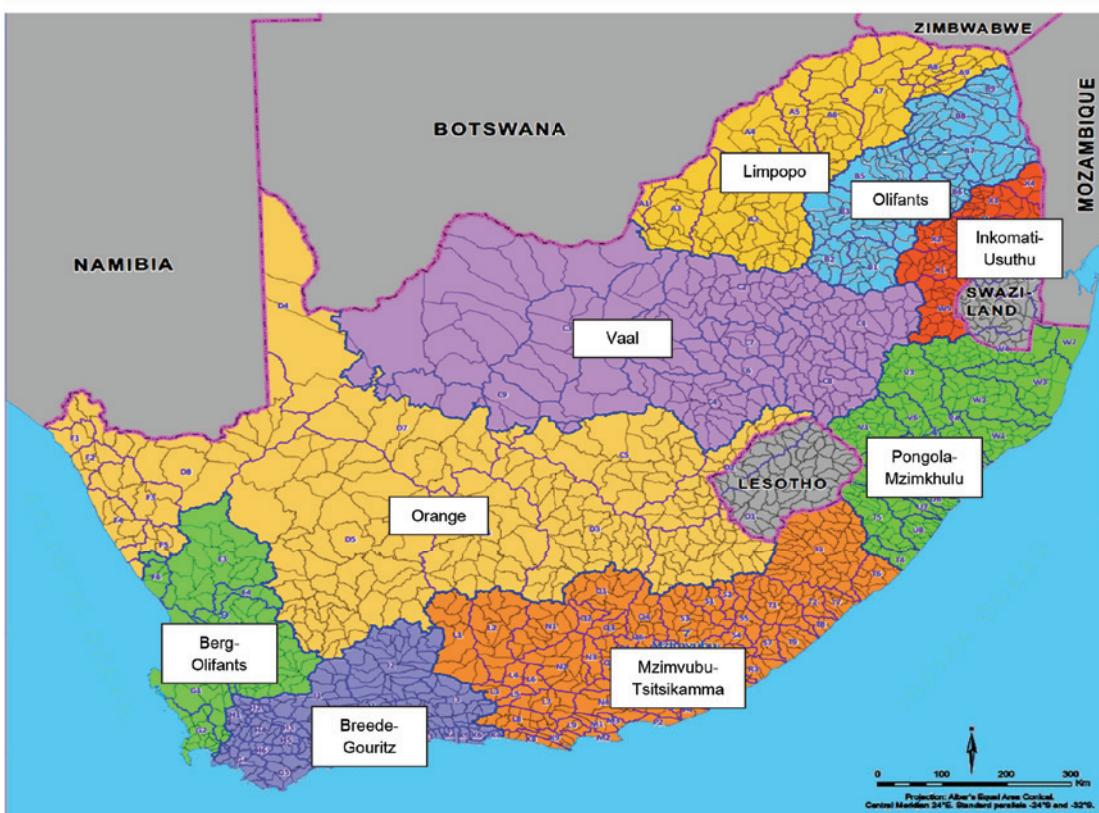

Figure 2: Water management areas

Status of the country's dams

South Africa is still heavily reliant on surface water and its further development with more than two thirds of the country's mean annual runoff already stored in dams. Ground water currently reflects only 16% use and is underutilised, undervalued and not well managed. Approximately 7,500 million m³/a of groundwater is available for further development and between 3,000 and 4,000 million m³/a is currently in use. The Climate Change Response Strategy for the water sector describes highly unpredictable and variable climate conditions characterised by floods and prolonged droughts.

South Africa has been experiencing below normal rainfall since the 2014 summer rainfall season and steadily building up into the 2015 summer rainfall season leading to the worse drought in decades. Subsequent to the global declaration of the El Nino event in March 2015, the drought in the country dramatically intensified in November and December 2015 with large parts of KwaZulu-Natal, Mpumalanga, Free State, North West, Gauteng, the southern parts of Limpopo, northern parts of Northern Cape, northern parts of Eastern Cape and south western parts of the Western Cape severely impacted by severe to extreme drought.

As a result of the drought, dam levels experienced a downward trend from a national average storage of 93.3% in March 2014 to a recorded 51.4% during September 2016. A total of 211 dams are being monitored country-wide and as at 06 February 2017, with the percentage of full capacity for 19 dams below 10%. A total of 46 dams are between 10% and 40% and 39 dams are above 100%. Overall, the national average for dam levels has slightly increased by 0.6% to 55.56% compared with the same time last year.

The provincial dam storage levels compared to the previous two weeks reflect a decrease for three (3) provinces with the remaining six (6) reflecting an increase. The Eastern Cape, Northern Cape and Western Cape dam levels are down by 0.8% to 56.9%, by 0.1% to 93.6% and by 1.7% to 36.2% respectively. The Free State, Gauteng, KwaZulu-Natal, Limpopo, Mpumalanga and North West dam levels on the other hand are up by 0.5% to 57.2%, by 0.1% to 86.7%, by 0.1% to 47.1%, by 2.4% to 66.1%, by 1.9% to 67.8% and by 0.6% to 73.8% respectively.

Operations of water resource systems

The water requirements in all user sectors have been increasing while the opportunities for augmenting supplies to meet the needs are diminishing. The water supply systems comprising a number of interlinked sources with major storage dams and interlinking aqueducts and pumping installations are becoming very complex. It is therefore important to operate water resources infrastructure optimally to meet sometimes conflicting requirements and to reduce water wastage in the system.

The department developed guidelines for water supply systems during normal, drought and flooding conditions. Also, formal operating rules have been developed for a number of water supply systems in the country such as the Integrated Vaal River System, the Orange River System, the Algoa System, the Amatole system, the Western Cape system and the Groot Letaba system.

The monitoring of the water supply systems as at 06 February 2017, can be summarised as follows:

- Algoa system: the 5 dams serving the Nelson Mandela Bay reflected a decrease of 1.2% to 52.2%. This is a 37.9% decrease compared to the same period last year where the system was at 90.1%.
- Amathole system: the 6 dams serving the Buffalo City were steady at 72.4%. Although this is a 20.5% decrease compared to the same period last year (which was at 92.9%), there are no restrictions in place.

- Bloemfontein system: the 4 dams serving mainly Mangaung were steady at 37.9% compared to 30.3% at the same period last year. There is still inflow in Caledon River and pumping from Tienfontein pump station is still continuing. There are restrictions of 30% for urban and 75% for irrigation in place.
- Western Cape system: the 6 dams serving mainly the City of Cape Town decreased by 1.6% to 36.9%. This is a 8.1% reduction compared to the same period last year (which was at 45%). There are restrictions of 20% for the domestic sector and 30% for agriculture with the municipality introducing level 3B restrictions to meet the target of 8 Megalitres per day.
- Crocodile West system: the 6 dams serving mainly Tshwane, Madibeng and Rustenberg had a decrease of 1.9% to 96.2%. The system was at 96.2% at the same time last year.
- Integrated Vaal River system: the 14 dams serving mainly Gauteng, Sasol and Eskom increased by 0.8% to 65.56% compared to 59.8% the same time last year. The system gained 89 million cubic metres week-on-week. There are restrictions of 15% for urban use and 20% for irrigation.
- Polokwane system: the dams in this system increased by 2.1% to 52.2% which is the same as the previous year. There are restrictions of 20% for all users in place
- Umgeni system: the 5 dams mainly serving eThekwinin and Msunduzi were steady at 47.3%. There is a 11.1% reduction compared to the same period last year (which was at 58.4%). There are restrictions of 15% for domestic users, 50% for irrigation and 15% for industry in place
- Orange River system: the Gariep dam is at 53.6% which is an increase of 1.2% whilst the Van Der Kloof dam is at 51.7% which is a decrease of 0.9%

Reconciling water use and meeting the demand for water resources

Section 21 of the National Water Act provides for the registration of water uses identified therein. This enables the department to gather information necessary to manage the country's water resources (i.e. ascertain how much water can be used without compromising the aquatic ecosystems health).

As at September 2016, the registered national water use per sector is depicted in the figure below

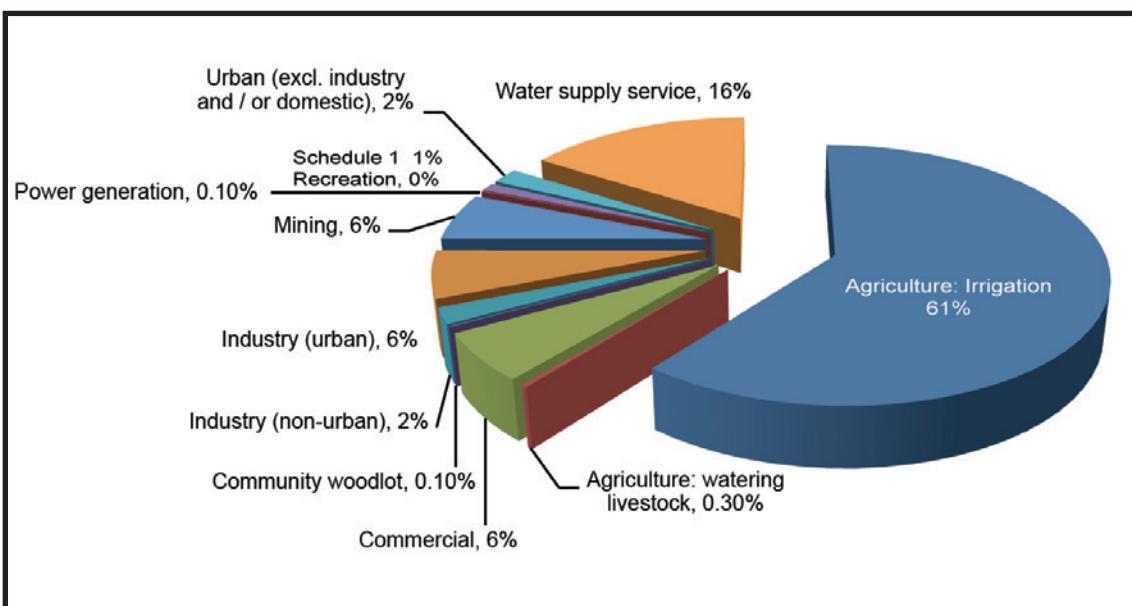

Figure 3: Registered national water use per sector

The water management areas that had the highest water uses as at September 2016 are Pongola-Umzimkhulu, Inkomati-Usuthu and Olifants. The percentages of registered water uses per water management area are presented in the figure below:

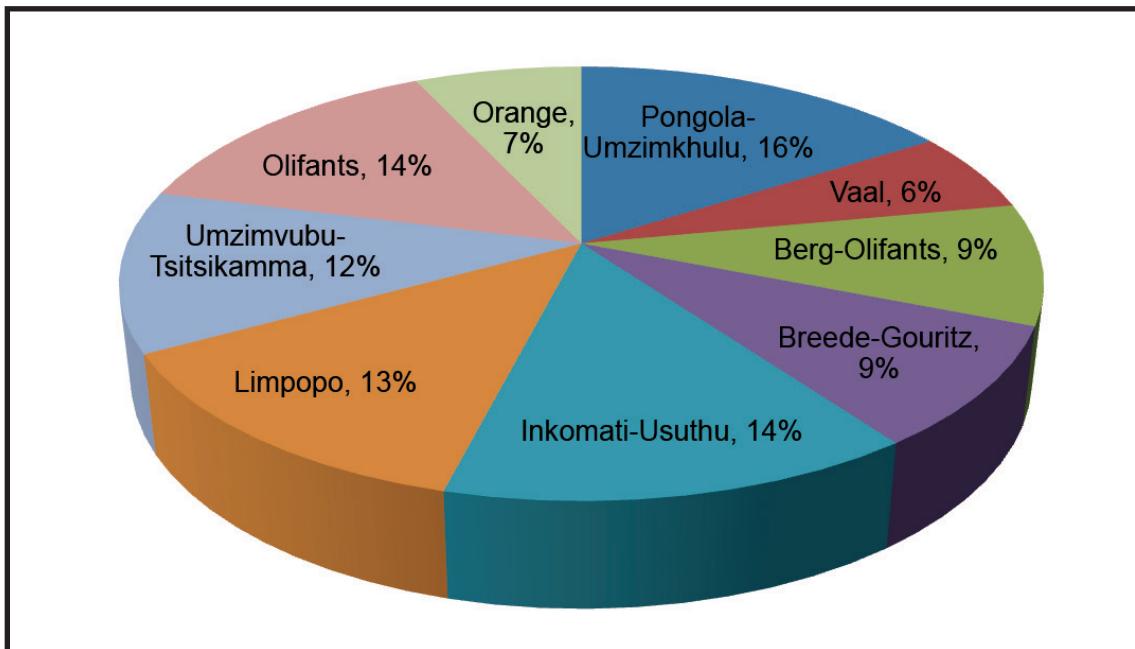

Figure 4: Percentage of water registered water use volumes per water management area

In an effort of reconciling the water requirements with water availability, the department implements water conservation and water demand management (WCWDM) in 8 large water supply systems. The WCWDM interventions and targets are set during the development of the associated reconciliation strategies. The analysis from water balance information obtained from December 2015 to June 2016 is summarised below:

- Integrated Vaal River System: municipalities (e.g. City of Tshwane, Ekurhuleni, City of Johannesburg etc.) within the system managed to achieve 10.9% savings which exceeded the targeted saving by 0.8%
- Crocodile West River water supply system: the municipalities (e.g. Thabazimbi, Bela-bela, Madibeng etc) within this system did not achieve the targeted savings of 11% but only managed to reduce their savings by 4.6%
- KwaZulu-Natal Coastal Metropolitan water supply system: the municipalities (e.g. eThekweni Metro, Msunduzi, uMgungundlovu etc) managed to reduce their savings by 5.1%.
- Western Cape water supply system: the municipalities (e.g. City of Cape Town) within this system managed to reduce their savings by 19.1% and thus exceeding their targeted savings by 7.1%
- Algoa water supply system: the municipalities (e.g. Nelson Mandela Metro) within this system achieved a 10.6% savings
- Amatole water supply system: the municipalities within this system (e.g. Buffalo City Metro) achieved a 10.6% savings
- Greater Bloemfontein water supply system: the municipalities within this system (e.g. Mangaung Metro) achieved a savings of 7.8%
- Olifants River water supply system: the municipalities within this system (e.g. Polokwane, City of Tshwane etc) achieved a savings of 1.2%.

Infrastructure in terms of water resources and water services

There is a well-developed infrastructure, with more than 4,395 registered dams in South Africa, including 350 dams belonging to the department, and a number of large-scale inter-basin water transfer schemes. Water services infrastructure covers more than 35,000km of bulk pipelines and 200,000km of reticulation systems that are managed by 152 water service authorities and providers.

However, this existing infrastructure needs maintenance and the country is already experiencing challenges with lack of focus on sustainable asset management. The schemes also require efficient and effective operations, for which specialised skills and capabilities at all levels are needed. Major challenges are experienced with regard to the capabilities of water services authorities to effectively manage the schemes on a sustainable basis. This issue needs to be dealt with decisively through a review of the mandates and policies in relation to the management of water infrastructure, and available capacity.

Work is also required in terms of rolling out the establishment of appropriate institutions, such as Regional Water Utilities, as well as to better leverage private sector support. Non-revenue water is also a challenge to be dealt with.

Medium to long term capital investment plans must be based on up-to-date reconciliation of changing water requirements and water availability from surface water, groundwater, re-use, desalination of seawater and rainwater harvesting sources. In this revised strategic plan, a large focus is placed on increasing bulk water supply through effective project planning, project implementation, as well as strengthened demand management planning processes; for optimal budget spend towards meeting targeted completed dates for bulk projects.

Water quality and environmental protection

Water quality refers to the physical, chemical and biological characteristics of water. It describes how suitable the water is for its intended purpose in nature or use by different water users. Different ecosystems and different user groups can have widely variable water quality requirements.

The major contributors to water quality problems facing South Africa's surface water are eutrophication, faecal pollution, salinisation and acid mine drainage (AMD).

Eutrophication is the process of nutrient enrichment usually as a result of run-off from surrounding land resulting in excessive plant growth (e.g. algae, plankton) in water bodies. Certain parts of the country, like KwaZulu-Natal, Eastern Cape and Limpopo tend to be hypertrophic (i.e. extraordinary algae multiplication causing water to be unsuitable for drinking). The Crocodile (West) and Marico (that is part of the Limpopo catchment) is one such example containing many hypertrophic sites that has been occurring for a number of years. The department must conduct regular educational campaigns on the reduction of aquatic pollution for the settlements in this catchment.

Salinity is a measurement for the concentration of salt in a given volume of water. A number of the country's rivers are polluted due to the disposal of untreated solid waste and wastewater. The disposal of effluent from mining and industries into public water bodies depletes dissolved oxygen, thus affecting the normal environment supporting the aquatic biota. This threatens and has in many cases already altered the ecological status of most rivers. This said, the chemical pollutants in most parts of the country are still in good and fair state.

Provision of basic services in terms of water and sanitation

As compared to the rest of Africa, South Africa is performing relatively well in the provision of basic water and sanitation services. However, as acknowledged by government and through the National Development Plan, more work is still required to extend this basic service to the entire population.

The global scorecard from the 2016 Environmental Performance Index (EPI) indicates that the number of people without access to water has been nearly cut in half from 960 million in 2000 to 550 million. In addition, 23% of countries have no wastewater treatment with more than 80% of the world's discharged wastewater untreated when released into the environment. The EPI therefore recommends that countries need to invest in wastewater treatment infrastructure to reach the Sustainable Development Goal 6 of halving the proportion of untreated water by 2030.¹

Although the EPI reflects that South Africa performs better than countries in the Sub-Saharan region, more still needs to be done in relation to the provision of water and sanitation. The Index ranks South Africa at 81st of 180 countries in its overall ranking.

While it is primarily the function of local government to ensure the provision of basic water and sanitation; the DWS supports the activities related to achieving the MTSF targets of 90% access to basic water and sanitation, as well as the eradication of the bucket system by 2019. This support is through the construction of 109 water and wastewater infrastructure to support a number of water service authorities.

The DWS is also committed to supporting COGTA in its "back to basics programme" by providing technical support to local government and intervening directly in priority areas where local government lacks the capacity and capability to provide basic water and sanitation services.

Further environmental factors impacting on the work of the sector

A comprehensive environment analysis was conducted as part of the strategic planning process, detailing the key issues impacting on the work of the Department. The detailed PESTEL is attached to the strategic plan as an annexure with the below reflecting the salient points requiring a response by the Department over the period.

Strengthening the regulatory environment

The impact of change in the environment is not confined to only water issues but extends to socio-political and socio-economic imperatives that warrant a review of the regulatory environment. Of late, this includes the fact that South Africa has adopted the UN's sustainability development goals and committed to the outcomes of COP21. Combined with the policy direction of the country and particularly the policy implementation challenges, a policy shift and review of legislation informing the mandate and service delivery orientation of the Department and the broader water and sanitation sector is necessary.

Currently, the National Water Act and the Water Services Act are the two legal prescripts addressing the water value chain. The time is opportune to review these pieces of legislation and to consolidate them into a single, comprehensive Act for improved responsiveness to the geo-political and regulatory environment. It is envisaged that having a single, consolidated legislative prescript will enable the Minister, the DWS, water management and services institutions, and water users to have a clearer understanding of the legislative aspirations and requirements regarding water across the full water and sanitation value chain; with due consideration for the latest developments in sustainability and water mix diversification. A single Act for the water value chain will also eliminate any confusion associated with having to cross-read between two Acts.

¹ Source: Global Metrics For The Environment (2016), www.epi.yale.edu

In the water resource management environment, issues have emerged in which policy is not definitive and thus unable to effectively ensure its sustainable management. These could therefore impede effective service delivery and sustainable management of water resources if not addressed through a policy statement; a process the DWS is leading in collaboration with other key departments and stakeholders.

The National Water Act provides for the establishment and transformation of institutions to help the DWS to give effect to its core mandate. There are challenges that have been broadly documented regarding the lack of accountable and efficient management of regional water infrastructure and also problems with the delivery of water services by local government. The process of rationalising institutions and establishing regional water authorities is underway.

Equity is critical in ensuring that water reform in South Africa is realised. In the water sector, equity implies justice in the management of water, responding to social and economic needs of all South Africans. The existing legal framework and policy does not adequately respond to the objective of redress in terms of making water available and advancing equity considerations. It is imperative that provisions within the NWA should not only protect the interest of existing water rights, but should also provide mechanism to make water available for redress. This is to be addressed by the new Water and Sanitation Act.

The sanitation sector is currently regulated by three policy documents, namely the White Paper on Water Supply and Sanitation (1994); the White Paper on a National Water Policy of South Africa (1997) and the White Paper on Basic Household Sanitation (2001) that provide a suit of procedures, rules and allocation mechanisms for sanitation in the country. The Department is in the final stages of finalising the reviewed single Sanitation Policy. This will be followed by the finalisation of a consolidated Water and Sanitation Policy.

As sanitation is a critical link in the water value chain and is not currently accounted for in the NWRS-2, the Department has commenced with the process to review the NWRS-2 to include the sanitation function and thus to ensure that the full value chain of water is incorporated in the planning processes of the water and sanitation sector.

A key regulatory measure being pursued by the Department is the development of an appropriate model for the regulation of water tariffs, this includes the establishment of an economic regulator for the water sector and the development of a water tariffs mechanism that entitles consumers to a basic level of provision, after which a tariff would be applicable.

Contributing to socio-economic development

The role of water and sanitation in the socio-economic development of the country is explicitly defined in the NDP and, as reflected in earlier sections of this strategic plan, the Department drives a number of activities that contribute to this macro-economic outcome; firmly expressed in the mission of the Department. This role has been given further credence in the nine-point economic intervention plan in defining the crucial contribution water and sanitation as a cross cutting priority to support all economic programmes.

As the economy grows, so does the demand for water and sanitation, requiring not only the roll out of new infrastructure but also interventions to curtail the high levels of financial losses. This is evidenced by *inter alia*: high water leakages; poor infrastructure planning; weak investment; weak operations and maintenance; inefficient revenue and debt management; and pollution of the resource leading to high treatment costs. Efficiency and cost management is thus a key imperative of the Department in leading the sector, as in asserting its position as the custodian of water in the sector.

A number of issues further define the socio-economic delivery environment including, among others, inequality in water allocation and access to water services and sanitation; the growing

impatience of communities as reflected by increases in service delivery protests; the affordability of water against the constitutional right to water; unemployment; and the unique circumstances that rural communities face.

It is well documented that women bear the brunt of poor service delivery, particularly in rural areas. Furthermore, unemployment and the concomitant lack of skills development and job opportunities have the highest impact on the youth of the country. The DWS is therefore committed to alleviating the plight of women through its programmes and to ensuring it invests in the youth through skills development, targeted procurement and the provision of job opportunities.

The Department specifically supports and leads the rural development programme through the roll out of rainwater harvesting programmes; providing financial support to resource poor farmers in support of enhanced access to water; and by driving a variety of related job creation initiatives. Skills development across the sector is prioritised in this revised strategic plan, aimed at affording the youth opportunities to enter the sector through available bursary schemes and the graduate programme.

Advancing technology and innovation in support of the water and sanitation sector

The challenges of the water and sanitation sector cannot be addressed by utilising existing technologies alone. As signatories to the UN's sustainability development goals and the commitments of COP21, compounded by the harsh realities of water scarcity and drought, the need to rapidly attain water security and access to water and sanitation services for all in the country is highly reliant on the adoption of new technologies and innovation. The research into, and adoption of, new technologies in the areas of sanitation, water quality monitoring, infrastructure development, maintenance and operations are thus critical to the sector.

The DWS, through its entity the Water Research Commission (WRC), plays a vital role in understanding the needs and priorities of the sector and stimulating and funding research, promoting the transfer of information and technology and enhancing knowledge and capacity building in the water sector. The focus is also on integrated water resources management, water-linked eco-systems, water use and waste management and water use in agriculture.

The key areas of research being undertaken by the WRC in support of the DWS strategic plan include among others, water sensitive design; environmental goods and services; dam safety; climate change adaptation; non-flush sanitation; as well as support on the development of water and sanitation policy, legislation and strategy. A design school of infrastructure has also been established to support the sector with smart technologies and innovation in infrastructure operations, maintenance and development.

The adoption of new technologies does however have implications and requires a comprehensive training and development plan in light of the skills gap that exists to operate these new technologies. A sector skills development plan is under development, and the DWS has designed an internal skills development, retention and succession plan to enhance its human resource development capacity.

1.2 Organisational environment

In April 2016, the Department commenced a project that aims to review the organisational structure through analysing and realigning the department's functions and resources in line with the mandate and the Medium Term Strategic framework (MTSF) priority outcomes of Government in support of the National Development Plan. This project not only focuses on reviewing the organisational structure but is also focuses on reviewing the existing business processes and conducting an organisational functionality assessment (OFA). As at the end of the 2016/17 financial year an organisational diagnostic review, business process analysis (as-is and to-be), the OFA (including

the formulation of a macro design structure) have been concluded. This project should be concluded by July 2017 with an organisational structure that supports the mandate of the department. Once the revised structure has been finalised, the department will be reviewing its current Integrated Human Resource Plan.

During the 2017/18 financial year, the department will continue to work on the formulation of a framework for the establishment of the Catchment Management Agencies as approved by Cabinet.

As from the 2017/18 financial year, and with approval from National Treasury, the department has made amendments to its budget structure, in essence reducing the budget structure from 5 to 4 programmes. These amendments also aim to align the budget structure with the organisational structure.

Arising from significant cost containment measures, the budget cuts on the employee compensation budget for the 2017 MTEF has necessitated a review of the critical posts that will have to be filled in future. In 2016, shortly after the lifting of the moratorium for the filling of posts, the department has made significant progress in filling some of the most critical posts. In the 2017/18 financial year the department will continue to reduce the vacancy rate in respect of engineers and scientists. A target of not more than 10% will be maintained.

Indicated below is a table that illustrates the status of the filled posts vs. vacant posts. As a result of the reduced employee compensation budget, some of the posts on the establishment will have to be abolished, thereby ensuring that only funded vacant posts are filled in future.

FILLED AND VACANT POSTS PER BRANCH				
Branch	Filled	Vacant	Total	% vacancy
Corporate Management	590	220	810	27.16
Finance E/A	206	40	246	16.26
Finance Water Trading	141	0	141	0.00
Internation Water Copoeration	39	6	45	13.33
Minister/ Deputy Minister/ DG /Internal Audit/ PMU	137	40	177	22.60
Operational Integration	2386	627	3013	20.81
National Water Resources Infrastructure	1868	0	1868	0.00
Planning & Information	384	67	451	14.86
Regulation	176	73	249	29.32
Sanitation Services	21	7	28	25.00
Grand Total	5948	1080	7028	15.37

Although the Department has made significant progress in addressing employment equity, (especially in respect of ensuring 50% female representation at senior management level), plans of ensuring that other key transformation targets are met will be rolled out during the 2017/18 financial year.

Indicated below are graphs that illustrate the current representivity status at senior management level in Department:

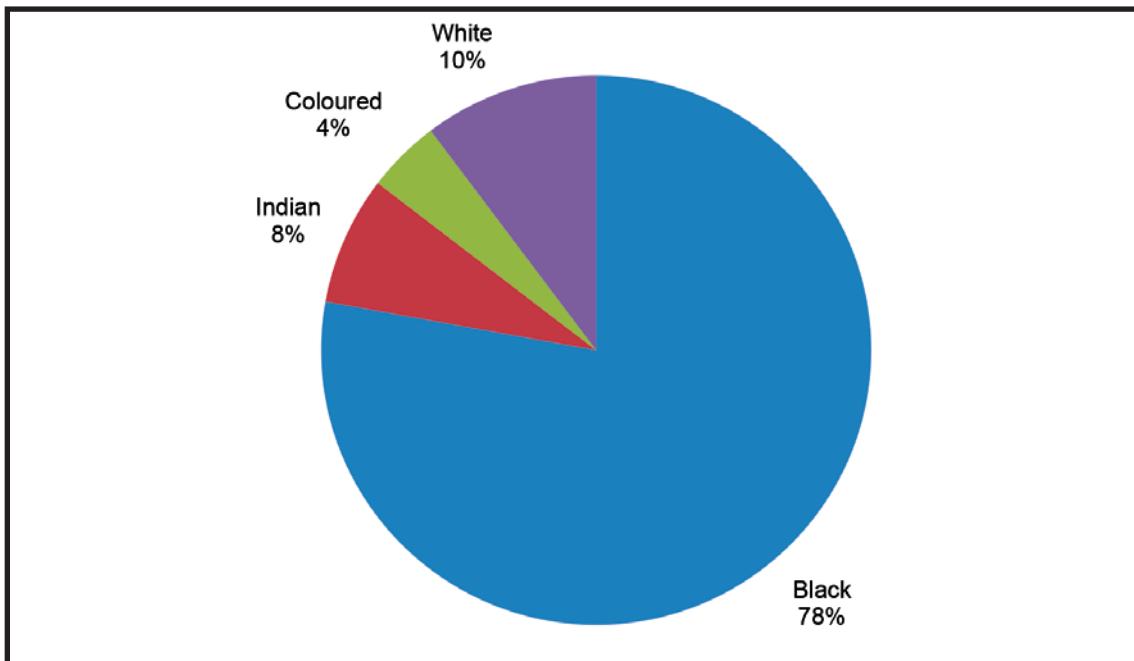

Figure 5: Analysis of Senior Management Service race equity

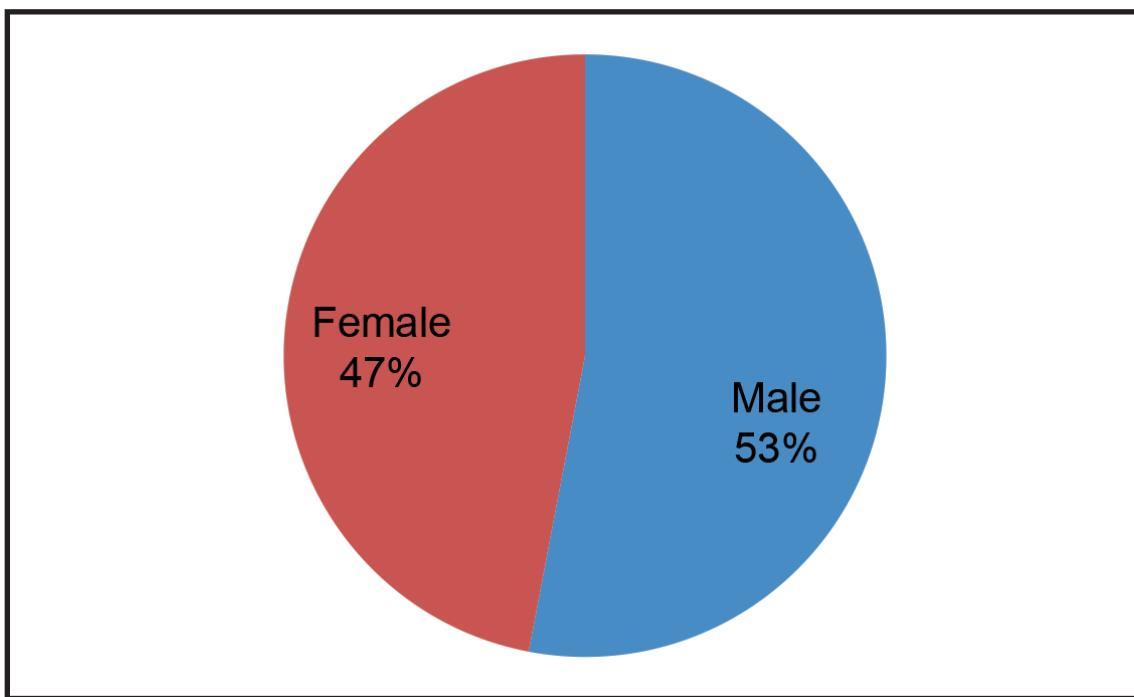

Figure 6: Analysis of Senior Management Service by gender

In the 2016/17 financial year, the department started a project of subjecting SMS members to the generic core management competency framework instrument which aims to address the development areas of senior managers in the Department. In the 2017/18 financial year the department will be rolling out training interventions in line with the training gaps that have been identified in the previous financial year. In addition, an annual Workplace Skills Plan will be developed in line with the individual training and development interventions as identified through employees' personal development plans. An amount equal to 1% of the employee compensation budget has also been provided for the funding of training and development interventions.

Furthermore, in 2017/18, the department will continue with the review of its policies, processes and systems to optimise individual and organisational performance and to improve areas of compliance and performance management.

Main Account Fiscus Funded

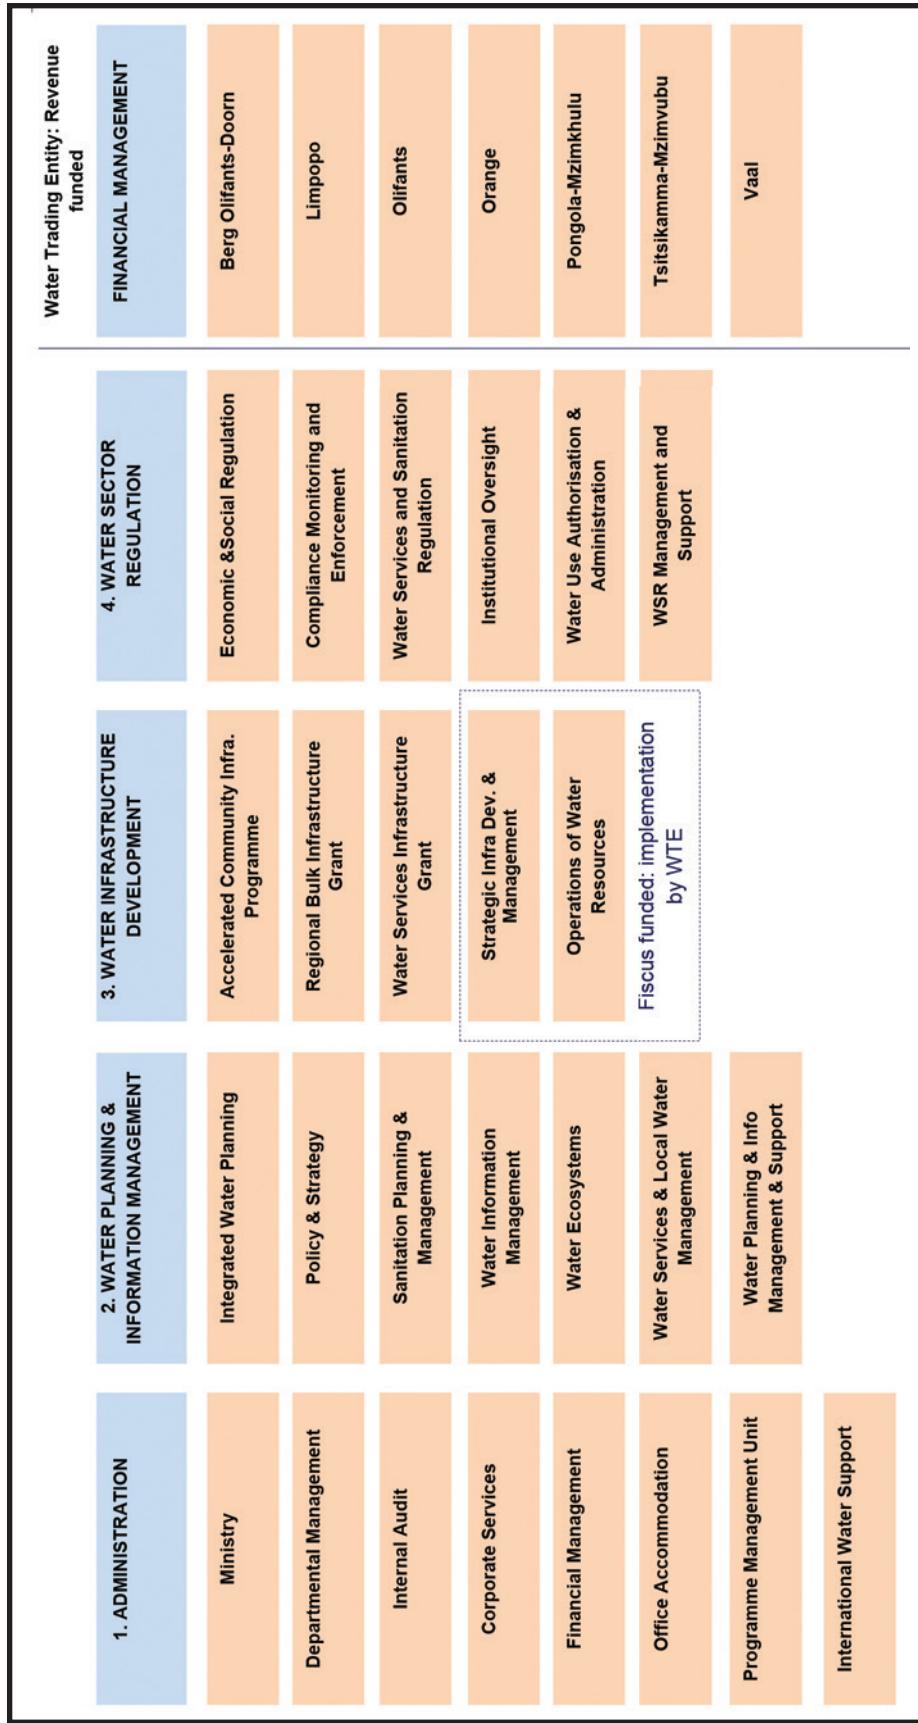

Figure 7: Budget structure of the department

In considering the ongoing relevance of the above structure, a detailed internal-environment analysis was conducted as part of the strategic planning process, detailing the key issues impacting on the work of the Department. The detailed stakeholder analysis and SWOT analysis are attached as annexures, with the below reflecting the salient points for the Department over the medium term period.

Given the constraints on the fiscus, the structure must ensure that focus and priority is given to the core issues defined in the mandate, namely:

- Delivering on time quality Water Resources Infrastructure;
- Best planning for and addressing water demand management;
- Ensuring water quality enhancement and eco-system protection; and
- Driving the delivery of water and sanitation services and addressing water sanitation backlogs.

In this regard, the capacity, capabilities and therefore structure of the DWS must ensure consideration is given to:

- Water user licensing as a priority, which must be a demonstration of progress in dealing with these issues and capacity must be deployed to deliver in this area;
- Massifying the use of conditional grants in local communities through support to the 5 pillars of the “back to basics programme”;
- Reconsideration and ensuring alignment of the mandates and focus areas of the directorates of the Department and the Entities:
 - » Ensuring that the Department focuses on its mandate for policy, regulation and providing leadership to the sector;
 - » Building the capacity of the state through the use of agencies/ entities as implementation agents: Consideration to be given to the establishment of a National Water and Sanitation Infrastructure Agency, as an entity of the DWS;
 - » Consider the merging of certain Water Boards where necessary in view of the capacity constraints and governance costs associated with separate Boards;
 - » Closer participation and engagement with communities so as to keep them informed, each step of the way, as the implementation of projects progresses;
 - » Corporate support functions are indeed acting in that role; and that no corporate support function operates separately from the core delivery mandate (eg: International Relations - responsible for implementation of mandate aligned agreements and therefore ensure all trips are directly relevant to the mandate of the Department; HR – ensure all human resources management and development strategies and programmes are specifically aligned to needs of programmes on the ground; ICT – ensure systems are informed by and integrated and aligned with work of DWS and entities, etc.)
 - » Building capacity and capability to secure the “crowding in” of partners from both the international and regional and national space, to support DWS and the sector in achieving its developmental agenda;
 - » Ensuring capacity and capability for research, innovation and technological transfer across the DWS operations is enhanced and supported.
 - » Strengthening supply chain processes / models and budget prioritisation to ensure supportive supply chain processes, a strategic demand management plan in line with master plans that resolves multi-year project issues, and budgets that are managed in line with approved master plans.
 - » Enhancing governance, control and internal operations so as to get the basics right and achieve a clean audit outcome for the main account and WTE; achieve MPAT objectives across the operations and implement streamlined internal systems and processes supportive of effective and efficient delivery of the core service delivery mandate of the Department and the sector.

1.2 Description of the strategic planning process

The DWS strategic planning session was held on 22-23 August 2016, attended by the Senior Management of the Department. The purpose of the session was to:

- Appreciate the strategic context of the role and work of DWS and the broader sector;
- Assess and respond to shifts in the environment, in particular, to consider and mainstream key policy frameworks pertaining to the priorities and focus for the period;
- Assess and respond to shifts in the sectoral delivery environment, towards the development of a sector-wide, rather than DWS, strategic plan for the planning period;
- Review and refine the strategic framework and architecture of DWS and the sector it leads, in particular, the vision, mission, values and strategic goals of the sector.
- Prepare first drafts of the 2017/18 Annual Performance Plan – as per Treasury requirements and associated timelines, for submission to DPME and National Treasury on 31 August 2016.

A further session was held on 14 and 21 November 2016 with the Senior Management to comment on the draft documents and revise as required. The final revisions to the documents based on further inputs from the National Treasury will result in the approved documents by the Minister and the final tabling in Parliament by March 2017.

The department's Top Management further met with the Executive Authority on 12 and 14 December 2016 to present plans for the 2017/18 medium term with a particular focus on the priority areas since the department had not received an additional allocation to fund all the projects.

The department's executive committee further convened a session on 23 January 2017 to align the performance and financial information for the 2017/18 medium term.

The Executive Authority also met with Members of Executive Committee (MECs) for Cooperative Governance and Traditional Affairs on 24 January 2017 to discuss the department's plans over the 2017/18 medium term.

The draft 2017/18 APP was thus submitted to the office of the Auditor-General on 31 January 2017 for review and auditing.

2 Revisions to legislative and other mandates

2.1 Development of the Water and Sanitation Policy Framework

The development of the National Water and Sanitation Policy Framework aims to consolidate the various water and sanitation policies into a single, cohesive policy framework to guide the water and sanitation sector. This is to include a clarification of the roles and responsibilities of all role-players across the three spheres of government and the water management institutions to facilitate enhanced cooperation and collaboration in the rollout of bulk water resources, water supply and sanitation services.

2.2 Development of the National Water and Sanitation Act

The National Water and Sanitation Act is intended to bring in a consolidation of the National Water Act and Water Services Act into one piece of legislation. A consolidation of these Acts will enable everyone within the water sector to have a clearer understanding of the legislative framework regarding water management across the entire water and sanitation value chain. It is also necessary to obviate the need for the cross reading between the two Acts.

The National Water and Sanitation Act (the Act) will seek to empower the Minister to have full oversight and authority over the entire water and sanitation value chain. It also seeks to transform and rationalise the water management institutions. The Act will incorporate aspects relating to sanitation with the aim of enhancing service delivery by using water as a mega nexus. The Act will introduce an efficient and cost effective dispute resolution mechanism in relation to water use applications or decisions taken by the responsible authority.

A number of activities have been undertaken and completed as per the legislative roadmap approved by the Minister. The first draft (version 1) of the Bill was produced in May 2015. Inputs were sought internally and this was followed by further refinements to the Bill. The refinements to the Bill are completed and it will be presented to Extended Top Management at the earliest available date. The drafting of the Bill is at an advanced stage, and its finalisation depends on the outcome of the presentation of the Bill to Top Management and the finalisation of the National Sanitation Policy.

We envisage submitting the Bill to Cabinet for Cabinet to approve that the Bill be gazetted for public comments in March 2016. At the end of September 2016, following Cabinet approval of the final Bill, it will be introduced in Parliament.

The National Water and Sanitation Act will be passed into an Act of Parliament and signed into law by the President in the year 2017/18.

2.3 Review and Development of the National Water and Sanitation Resources and Services Strategy (NWSRSS)

Subsequent to the reconfiguration of the Department to include the sanitation function, the second edition of the NWRS will be reviewed to incorporate the sanitation function. Allowing for all legislated processes, including involved in the development of such strategy, the aim is to table the NWSRSS to Cabinet for approval in the year 2017/18.

2.4 Review of the Water Research Act

The review of the Water Research Act is at an advanced stage and seeks to enhance the mandate and governance of the Water Research Commission, and to better align the Act with all other applicable legislation informing the service delivery orientation of the water and sanitation sector; legislation that was not in place at the time the WRA was promulgated in 1971.

2.5 Review of the water pricing strategy

The Water Pricing Strategy sets out government's approach to raw water pricing. The strategy review seeks to improve the financial viability of government's bulk raw water business to ensure that this scarce resource is valued by all citizens. The major change of the review is to move from the Return on Asset method of infrastructure costing to a method of pricing based on Future Infrastructure Built over 10 years per province.

2.6 Development of the funding model

The intention of the development of a funding model is to determine the variety of financing mechanisms or models adopted in South Africa and internationally to fund infrastructure. The project will look at the principles of infrastructure funding and financing and help to identify the lessons learnt that could shape future investment decisions in the South African water sector.

Apart from identifying key success factors, the review is also expected to explore innovative and off-budget financing mechanisms, in order to consider their suitability for the South African water sector.

3 Overview of the 2017 budget and medium term estimates

3.1 Expenditure estimates

Programme	Audited outcome			Adjusted appropriation	Medium term expenditure estimates		
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
Rand thousand							
Administration	1 355 392	1 335 593	1 448 058	1 591 895	1 628 414	1 657 975	1 755 333
Water Planning and Information Management	633 950	812 538	700 965	831 013	816 462	883 994	949 761
Water Infrastructure Development	7 941 412	9 310 937	13 147 003	12 782 445	12 251 746	13 499 286	14 318 348
Water Sector Regulation	575 162	157 614	260 948	319 244	410 827	519 544	491 369
Total	10 505 916	11 616 682	15 556 974	15 524 597	15 107 449	16 560 799	17 514 811

3.2 Expenditure trends

The DWS will over the medium term support the realisation of the National Development Plan (NDP) vision 2030 of managing, monitoring and protecting water resources for growth and sustainability; assuring water supplies by investment and reuse; implementing water conservation and demand management and finalising the institutional arrangements for water resource management.

To implement the NDP commitments, the Medium Term Strategic Framework (MTSF) provides the building blocks towards achieving the country's long term plan and contains priority actions within outcomes 6 (Economic Infrastructure) on the economic infrastructure built programme, outcome 9 (Local Government), on the provision of basic services and outcome 10 (Environment), on water resource protection.

To ensure the realization of outcomes 6 and 9 the DWS will continue to focus on the development of bulk raw water and water services infrastructure. To efficiently coordinate the management of infrastructure in the department, all infrastructure projects have been consolidated under the Water Infrastructure Development programme. The medium term budget for this programme therefore constitutes an average of 81.6% of the department's total budget with the plan to complete 410 small, large and mega projects over medium term such as dams, canals, water and wastewater treatment works, reservoirs and pipelines to households. Over the medium term, plans are underway to also eradicate the 25 382 bucket sanitation systems in formal settlements and 30 978 rural households with sanitation backlogs. To further support the provision of basic services within local government over the medium term, the department's Water Planning and Information programme plans to develop and maintain a national water and sanitation master plan with a ten (10) year horizon by the 2018/19 financial year.

To ensure the realisation of outcome 10 the DWS will over the medium term enhance its regulatory functions within the Water Sector Regulation programme by finalising the revision of the Water and Sanitation Bill. In addition, plans are underway for developing a water and sanitation services regulatory tool that will assess the compliance of water users such as the mining, industry, agriculture sectors as well as water service authorities. Furthermore, plans are underway in finalising the institutional arrangements for water resource management by establishing nine (9) Catchment Management Agencies and nine (9) wall-to-wall regional water and wastewater utilities. The DWS will also strengthen its regulatory function by finalising the pricing regulations for the full cost recovery of water schemes and continue with the process of establishing a water regulator. To support the realisation of these regulatory activities, the budget for this programme is expected to increase at an average annual rate of 10.9%.

Although the department's expenditure on the compensation of employees is expected to increase at an average annual rate of 6.3% over the medium term, it will remain within the reduced expenditure ceiling as plans are underway to reduce the staff complement by 293 non-core posts over the medium term.

Part B:

Programme and sub-programme plans

4 Programme 1: Administration

This programme provides strategic leadership, management and support services to the Ministry and the department; for the development promotion of international relations on water resources between neighbouring countries; and communications, stakeholder management and partnerships development.

4.1 Sub-programmes

To align the broader policy and strategy with the broader planning functions of the department, the Policy and Strategy sub- programme that was in this programme was moved to Water Planning and Information Management (i.e. programme 2). In addition, to align the acid mine drainage (AMD) activities with the economic and social regulation objective, the AMD activity that was part of the Programme management Unit (PMU) sub-programme was moved to Economic and Social Regulation sub-programme under Water Sector Regulation (i.e. programme 4).

4.2 Strategic objective annual targets

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance	Medium term targets		
		2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
3.3 Targeted procurement that supports black entrepreneurs in the sector	Spend 80% of the procurement budget on BBBEE compliant suppliers	-	-	-	30% per annum	30% per annum	50% per annum	70% per annum
4.3 An efficient, effective and high performing organisation	An unqualified audit outcome on the financial and non-financial data from 2016/17 onwards	Qualified audit outcome for 2013/14	Main Account: Qualified audit outcome for 2014/15	Main Account: Unqualified audit outcome for 2016/17	Unqualified audit outcome for 2017/18	Unqualified audit outcome for 2018/19	Unqualified audit outcome for 2019/20	

Strategic objective	5 year strategic plan target	Audited / Actual performance				Estimated performance	Medium term targets	
		2013/14	2014/15	2015/16	2016/17		2017/18	2018/19
4.4 Coordinated development of the skills pool across the sector	An evaluation on the effectiveness of the standardised workplace skills plan for the water sector	-	-	-	Water and Sanitation Sector Occupations (skills) framework developed	Water and Sanitation Sector Occupations (skills) registered in Organising Framework for Occupations (OFO)	Standardised water and sanitation sector occupations incorporated in workplace skills plan of LGSETA and EWSETA	An evaluation on the effectiveness of the standardised workplace skills plan for the water sector
5.1 Targeted and sustained African and Global cooperation in support of the national water and sanitation agenda	An evaluation on the effectiveness of the approved international relations programme	-	-	-	Approved 5 year Africa and global international relations programme	Annual analysis on the implementation of the approved Africa and global international relations programme	Annual analysis on the implementation of the approved Africa and global international relations programme	Annual analysis on the implementation of the approved Africa and global international relations programme
5.2 Informed and empowered communities and responsive government securing integrated and sustainable partnerships to support the water and sanitation development agenda	An evaluation of the Partnerships, Communications and Stakeholder Relations Programme	-	-	-	Annual assessment of progress against the Partnerships, Communications and Stakeholder Relations Programme	Annual assessment of progress against the Partnerships, Communications and Stakeholder Relations Programme	Annual assessment of progress against the Partnerships, Communications and Stakeholder Relations Programme	Annual assessment of progress against the Partnerships, Communications and Stakeholder Relations Programme

4.3 Programme performance indicators and annual targets for 2017/18

Programme performance indicator	Audited / Actual performance			Estimated performance 2016/17	Medium term targets	
	2013/14	2014/15	2015/16		2017/18	2018/19
Strategic objective 3.3: Targeted procurement that supports black entrepreneurs in the sector						
3.3.1 % of targeted procurement budget spent on qualifying small enterprises (QSE)	-	-	-	15%	15%	15%
3.3.2 % of targeted procurement budget spent on exempted micro enterprises (EME)	-	-	-	15%	15%	15%
Strategic objective 4.3: An efficient, effective and high performing organisation						
4.3.1 Percentage compliance with MPAT standards at the minimum targeted level 3	36% compliance (12 of 33 standards)	56% compliance (18 of 33 standards)	80% compliance (30 of 37 standards)	100% compliance	100% compliance	100% compliance

5 Programme 2: Water Planning and Information Management

The programme is responsible to ensure that the county's water resources are protected, used, developed, conserved managed and controlled in a sustainable manner for the benefit of all people and the environment by developing a knowledge base and implementing effective policies, procedures and integrated planning strategies for water resources and water and sanitation services.

5.1 Sub-programmes

To align the broader policy and strategy with the broader planning functions of the department, the Policy and Strategy sub- programme that was in the Administration (i.e. programme 1) was moved to this programme.

5.2 Strategic objective annual targets

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance 2016/17	Medium term targets	2019/20
		2013/14	2014/15	2015/16			
1.2 Enhanced management of water and sanitation information	An Integrated National Water Resources Monitoring network that enhances the reliability of water information in 9 water management areas	-	-	-	Integrated National Water Resources Monitoring strategy finalised	Draft resourced integrated national water monitoring plan covering 9 WMAs	Final resourced integrated national water monitoring plan covering 9 WMAs ⁴
1.3 The integrity of freshwater ecosystems protected	16 river systems with water resource classes and resource quality objectives	0	0	7		4	3
1.4 Enhanced water use efficiency and management of water quantity	8 large water supply systems annually monitored for water losses	-	-	8	8	8	8

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance 2016/17	Medium term targets		
		2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
2.1 A coordinated approach to water and sanitation infrastructure planning and monitoring and evaluation	National Water and Sanitation Master Plan (NWSMP) with a 10 year horizon	-	-	-	-	Draft National Water and Sanitation Master Plan	National Water and Sanitation Master Plan (NWSMP) finalised and implementation plan development	Monitoring and evaluation of the National Water and Sanitation Master Plan
2.2 Targeted and aligned planning for adequate water availability and the enhanced provision of water supply and sanitation services	Completed plans for 86 bulk water supply and sanitation services infrastructure projects	22	-	28	21	31	17	17
4.1 An enabling environment for the management of water resources and the provision of basic water and sanitation services across the sector	National Water and Sanitation Bill developed	-	-	-	Draft Bill for public consultation	Parliamentary process	Draft regulations developed	-

5.3 Programme performance indicators and annual targets for 2017/18

Programme performance indicator	Audited / Actual performance			Estimated performance 2016/17	Medium term targets	2017/18	2018/19	2019/20
	2013/14	2014/15	2015/16					
Strategic objective 1.2: Enhanced management of water and sanitation information								
1.2.1 Adopted Water Monitoring Network Implementation plan implemented ^v	-	-	-	-	Draft resourced Water Monitoring Network Implementation Plan	Final resourced Water Monitoring Network Implementation Plan	20% implementation of Integrated National Water Resources Monitoring in 9 WMAs ^a	
1.2.2 Integrated Water Quality Management Strategy ^y	-		Concept paper on integrated water quality management strategy	Stakeholder engagement completed	Integrated Water Quality Management Strategy completed	Integrated Water Quality Management implementation plan developed	Integrated Water Quality Management implementation plan monitored	
Strategic objective 1.3: The integrity of freshwater ecosystems protected								
1.3.1 Number of river systems with water resources classes and determined resource quality objectives	70% completion of the RQO determination of the Olifants-Doorn and 60% for Lower Vaal	0	0	• Four draft resource quality objective reports developed	7 • Letaba and Inkomatini	4 • Mvoti, Mzimkulu, Crocodile (West), Marico, Mokolo & Matlabas	2 • Berg, Breede	3 • Umzimvubu • Usuthu to Mhlathuze • uThukela

6 Programme 3: Water Infrastructure Development

The programme is responsible to develop, rehabilitate and refurbish raw water resources and water and sanitation services infrastructure to meet the socio-economic and environmental needs of South Africa.

6.1 Sub-programmes

To comply with the transparency and accountability for allocations stipulated in the Guidelines on Budget Programmes, the previous Water Services Infrastructure sub-programme was separated into three (3) sub-programmes namely the Regional Bulk Infrastructure Grant, Water Services Infrastructure Grant and Accelerated Community Infrastructure Programme. In addition, the Strategic Asset management sub-programme within the Water Trading Entity was merged with the Infrastructure Development and Rehabilitation sub-programme to create the new Strategic Infrastructure Development and Management sub-programme.

6.2 Strategic objective annual targets

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance 2016/17	Medium term targets		
		2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
2.3 Adequate water availability and enhanced provision of sustainable and reliable water supply and sanitation services	457 153 households served with bulk water supply and sanitation services infrastructure	-	-	87 456	89 592	91 292	93 579	95 234
2.4 Safe, reliable and sustainable water supply and water and sanitation services infrastructure	National Asset Management Plan (NAMP) implemented with unscheduled maintenance kept at 10% and below	-	-	Draft National Asset Management Master Plan (NWRI)	Approved National Asset Management Master Plan (NWRI)	National Asset Management Plan (NAMP) implemented with unscheduled maintenance kept at 10% and below	National Asset Management Plan (NAMP) implemented with unscheduled maintenance kept at 10% and below	National Asset Management Plan (NAMP) implemented with unscheduled maintenance kept at 10% and below

2.3.11 Number of small ACIP projects completed ^{xii}	-	-	20	55	48	40		
2.3.12 Number of small WSIG projects under construction ^{xii}	-	-	316	182	215	230		

Programme performance indicator	Audited / Actual performance			Estimated performance 2016/17	Medium term targets		
	2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
2.3.13 Number of small WSIG projects completed ^{vii}	-	-	-	60	41	62	67
Strategic objective 2.5: Enhanced provision of sustainable and dignified basic sanitation							
2.5.1 Number of existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services per year ^{viii}	4 393	20 581	1 838	4 455 ⁵	25 382	-	-
2.5.2 Number of rural households served to eradicate sanitation backlogs as per norms and standards	11 858	9 347	3 708	9 456	10 032	10 141	10 805
Strategic objective 3.2: Targeted rural development initiatives that support smallholder farmers							
3.2.1 Number of Resource Poor Farmers financially supported to enhance access to water	1589	1462	699	1239	706	750	725
3.2.2 Number of tanks installed to harvest water for food production and other household productive use	4068	2409	1552	1500	1500	1200	1200
3.2.3 Number of job opportunities created through the Resource Poor Farmer and Water Harvesting programmes	270	326	284	262	247	220	215

⁵ The 2016/17 estimation is based on the preliminary third quarter figures that factors in the previous 2015/16 backlog

Programme performance indicator	Audited / Actual performance			Estimated performance 2016/17	Medium term targets		
	2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
Strategic objective 2.4: Safe, reliable and sustainable water supply and water and sanitation services infrastructure							
2.4.1 Number of dam safety rehabilitation projects completed	0	3	5	1	1	3	4
				• Hammarsdale Dam	• Roodekoppies Dam	• Casteel dam	• Rietspruit Dam
						• Nkadimeng dam	• Weltevreden Dam
						• Ncora dam	• Tsojana Dam
							• Mhlanga Dam
2.4.2 Percentage of projects completed as per AMP aligned maintenance Plan (Planned Maintenance) ¹⁴	-	-	-	90%	90%	90%	90%
2.4.3 Percentage unscheduled maintenance projects completed as a proportion of planned maintenance projects	-	-	-	≤10%	≤10%	≤10%	≤10%
2.4.4 Number of kilometres of conveyance systems rehabilitated per annum	-	-	-	36km	15km	45km	50km
Strategic objective 3.4: Job opportunities created that expand economic opportunities for historically excluded and vulnerable group							
3.4.1 Number of job opportunities created through implementing infrastructure projects	32 056	7 592	6 922	4 512	2 800	3 500	3 500

⁵ The 2016/17 estimation is based on the preliminary third quarter figures that factors in the previous 2015/16 backlog

6.4 Quarterly targets for 2017/18 per sub-programme

Strategic Infrastructure Development and Management sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.3.1	Number of bulk raw water projects ready for implementation	Quarterly (Non-cumulative)				
	Tzaneen	Tender documentation for spillway raising completed	Tender for spillway raising advertised	Tender for spillway raising awarded	-	-
	Cianwilliam	Tender evaluation completed	Tender awarded	-	-	-
	Nwamitiwa	Detailed dam engineering design continues	Detailed dam engineering design completed	Land acquisition commenced	Tender documentation for dam completed	
	Mzimvubu	Tender documentation for Ntabelanga completed	-	-	<ul style="list-style-type: none"> Tender documentation for Ntabelanga BDS completed Tender documentation for Lalini Dam and HEP completed 	
			Detail design for Ntabelanga WTW completed	Detail design for Ntabelanga BDS completed	<ul style="list-style-type: none"> Detail design for Ntabelanga BDS completed Detail design for Lalini Dam and HEP completed 	-
	ORWRDP 2E, 2F	Tender design continues	Tender design continues	Tender design completed	Tender documentation completed	

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.3.2 Number of bulk raw water projects under construction	Quarterly (Non-cumulative)	4	Tzaneen Clanwilliam	Stockpiling of material completed - PKW keys construction continues Operational anchors installation continues Grout curtain installation continues	Demolishing works on spill way completed - PKW keys completed Operational anchors completed Grout curtain installation completed	Construction commenced Construction completed Construction completed - Site establishment completed
2.3.3 Number of bulk raw water projects completed	Annual	1	(Hazelmere)	-	-	1 (Hazelmere)
3.4.1 Number of job opportunities created through implementing augmentation infrastructure projects	Quarterly	2 800	300	600	850	1 050

Operations of Water Resources sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.4.1 Number of dam safety rehabilitation projects completed	Quarterly (Cumulative)	1	Roodekoppies Dam	40% completion	60% completion	80% completion
2.4.2 Percentage of projects completed as per AMP aligned maintenance Plan (Planned Maintenance)	Quarterly (Non-cumulative)	90%	5%	25%	20%	40%
2.4.3 Percentage unscheduled maintenance projects completed as a proportion of planned maintenance projects	Quarterly (Non-cumulative)	≤10%	≤10%	≤10%	≤10%	≤10%
2.4.4 Number of kilometres of conveyance systems rehabilitated per annum	Quarterly (Non-cumulative)	15km	3km	5km	5km	2km
3.4.1 Number of job opportunities created through implementing operations of water resources infrastructure projects	Quarterly (Non-cumulative)	270 jobs opportunities	67 jobs opportunities	67 jobs opportunities	68 jobs opportunities	68 jobs opportunities

Regional Bulk Infrastructure Grant sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.3.4 Number of mega regional bulk infrastructure project phases under construction	Quarterly (Non-cumulative)	15	15	15	15	15
2.3.5 Number of mega regional bulk infrastructure project phases completed	Quarterly (Non-cumulative)	3	-	-	-	3
		Jozini (Pongolapoort) BWS				
		OR Tambo KSD BWS Phase 2 of 2				
		Sebokeng WWTW Phase 1 of 2				
2.3.6 Number of large regional bulk infrastructure project phases under construction	Quarterly (Non-cumulative)	53	53	53	53	53
2.3.7 Number of large regional bulk infrastructure project phases completed	Quarterly (Non-cumulative)	26	-	-	-	26
2.3.8 Number of small regional bulk infrastructure project phases under construction	Quarterly (Cumulative)	41	41	41	39	38
2.3.9 Number of small regional bulk infrastructure project phases completed	Quarterly (Non-cumulative)	20	-	2	1	17

Water Services Infrastructure Grant sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.5.1 Number of existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services per year	Quarterly (Non-cumulative)	25 382	6 853	7 868	5 330	5 331
2.5.2 Number of rural households served to eradicate sanitation backlogs as per norms and standards	Quarterly (Non-cumulative)	10 032	-	-	3 009	7 023
2.3.12 Number of small WSIG projects under construction ^(xi)	Quarterly (Non-cumulative)	182	182	182	182	182
2.3.13 Number of small WSIG projects completed ^(xii)	Quarterly (Non-cumulative)	41	-	-	-	41

Accelerated Community Infrastructure sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
2.3.10 Number of small ACIP projects under construction	Quarterly (Non-cumulative)	55	-	55	55	55
2.3.11 Number of small ACIP projects completed	Quarterly (Non-cumulative)	55	-	-	-	55
3.2.1 Number of Resource Poor Farmers financially supported to enhance access to water	Quarterly (Non-cumulative)	706	23	357	187	139
3.2.2 Number of tanks installed to harvest water for food production and other household productive use	Quarterly (Non-cumulative)	1500	40	425	646	389
3.2.3 Number of job opportunities created through the Resource Poor Farmer and Water Harvesting programmes	Quarterly (Non-cumulative)	247	15	84	89	59

6.5 Reconciling performance targets with the budget over the medium term

Sub-programme	Audited outcome			Adjusted appropriation 2016/17	Medium term expenditure estimates		
	2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
Strategic Infrastructure Development and Management	2 391 702	2 755 177	1 758 960	1 731 912	1 606 704	2 291 533	2 419 859

Total	7 941 412	9 310 937	13 147 003	12 782 445	12 251 759	13 499 286	14 318 348

7 Programme 4: Water Sector Regulation

The programme is responsible for ensuring the development, implementation, monitoring and review of regulations across the water and sanitation value chain in accordance with the provisions of the National Water Act (1998), the Water Services Act (1997) and related water and sanitation policies.

7.1 Sub-programmes

To align the acid mine drainage (AMD) activities with the economic and social regulation objective, the AMD activity that was part of the Programme management Unit (PMU) sub-programme was moved to Economic and Social Regulation sub-programme under this programme. In addition, the Compliance Monitoring and Enforcement sub-programmes were merged to create the Compliance Monitoring and Enforcement sub-programme.

7.2 Strategic objective annual targets

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance 2016/17	2017/18	2018/19	Medium term targets	2019/20
		2013/14	2014/15	2015/16					
1.1 Water resources protected through water supply and sanitation services regulation, compliance, monitoring and enforcement	<p>Sector performance against regulatory requirements</p> <p>Achieve 65% compliance level for mines measured against individual water use entitlements</p>	-	-	-	Draft water and sanitation services regulatory compliance and assessment tool developed	Water and sanitation services regulatory compliance and assessment tool finalised and piloted	Baseline for water users' compliance against the regulatory compliance and assessment tool established	Level of performance of water users using regulatory compliance and assessment tool determined and monitored	65%

Strategic objective	5 year strategic plan target	Audited / Actual performance			Estimated performance 2016/17	Medium term targets		
		2013/14	2014/15	2015/16		2017/18	2018/19	2019/20
1.5 Freshwater eco-systems protected from mine water impacts	National Mine Water Management Strategy implemented in 9 catchments	-	-	-	Mine water management strategy developed for two catchments	Mine water management strategy developed for two catchments	Mine water management strategy developed for three catchments	Mine water management strategy developed for three catchments
3.1 Equitable water allocation and availability for socio-economic development	Water allocation reform implemented within 9 water management areas	-	-	-	Validation of existing lawful use in 2 water management areas	Validation and Verification of existing lawful use in 6 water management areas (WMA)	Validation and Verification of existing lawful use in 6 water management areas (WMA)	Compulsory licensing implemented in identified catchments within the 9 WMAs
4.2 Sound governance	Performance evaluation of the DWS entities against their performance agreement	-	-	-	Annual appraisals of shareholder compacts and business plans for 13 entities	Annual appraisals of shareholder compacts and business plans for 13 entities	Annual appraisals of shareholder compacts and business plans for 13 entities	Annual appraisals of shareholder compacts and business plans for 13 entities

7.3 Programme performance indicators and annual targets for 2017/18

Programme performance indicator	Audited / Actual performance			Estimated performance	Medium term targets		
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
Strategic objective 1.1: Water resources protected through water supply and sanitation services regulation, compliance monitoring and enforcement							
1.1.1	Number of wastewater systems assessed for compliance with the Green Drop Regulatory standards	963	967	0	0	963	963
1.1.2	Number of non-compliant wastewater systems monitored against the Green Drop Regulatory tool	-	-	-	260	260	260
1.1.3	Number of water supply systems assessed for compliance with Blue Drop Regulatory standards	931	913	0	500	1036	1036
1.1.4	Number of non-compliant water supply systems monitored against the Blue Drop Regulatory tool	-	-	-	250	250	250

Programme performance indicator	Audited / Actual performance			Estimated performance	Medium term targets			
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19	2019/20
1.1.5 Number of dams evaluated for compliance with dam safety regulations by Approved Professional Persons (APPs)	188	167	150	160	160	160	160	160
1.1.6 Number of water users monitored for compliance	-	203	221	370	384	421	421	421
1.1.7 Number of water management institutions monitored for compliance with own water use entitlements and effective monitoring of affiliated water users ^{xv}	-	-	-	30	31	30	30	30
1.1.8 Percentage of reported non-compliant cases investigated	-	-	99% (266 of 269 cases)	100%	80% ⁶	80%	100%	100%

⁶ As a result of the merging of Compliance Monitoring and Enforcement chief directorates, the target for 2017/18 has been reduced affecting the compensation of employees budget for national and provincial offices

Programme performance indicator	Audited / Actual performance			Estimated performance	Medium term targets		
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
Strategic objective 1.5: Freshwater eco-systems protected from mine water impacts							
1.5.1	Number of WMAs assessed for Acid Mine Drainage (AMD) ^{xvi}	-	1 catchment • (Upper Vaal) assessment for AMD completed	1 catchment • Middle to Lower Vaal assessment for AMD completed and Olifants-Steelpoort assessment in progress	3 WMAs • Olifants-Steelpoort; Inkombati-Ustuhu; and Tugela to Usutu-Mhlathuze assessments for AMD completed	1 WMA • (Crocodile (West), Limpopo)	2 WMAs • Crocodile (West), Limpopo • Orange
1.5.2	Number of WMAs in which mitigation strategies for potential AMD are developed ^{xvii}	-	-	-	2 • Vaal • Olifants-Steelpoort	1 • Inkombati-Ustuhu WMA	1 • Pongola-Mzimkulu WMA • Crocodile West-Limpopo WMA
1.5.3	Completion of the Witwatersrand AMD long term project	-	-	-	EIA process instituted: scoping report published for public comments	EIA completed Construction of desalination facility	Commissioning of desalination facility

Programme performance indicator	Audited / Actual performance			Estimated performance	Medium term targets		
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
1.5.4 Mine water management technologies assessed ^{xxi}	-	-	-	-	Assessment of 5 AMD treatment technologies	Continuous assessment of the 5 initial AMD treatment technologies	Continuous assessment of the 5 initial AMD treatment technologies
Strategic objective 3.1: Equitable water allocation and availability for socio-economic development							
3.1.1 Percentage of applications for water use authorisation finalised within 300 days	-	48%	80%	80%	80%	80%	80%
3.1.2 Water allocation reform implemented	-	-	-	-	Draft regulations and programme developed	Approved regulations and programme published	
Strategic objective 4.2: Sound governance and oversight of the DWS public entities							
4.2.1 Number of public entities annually assessed ^{xviii}	-	-	-	13	13	13	10
				• 9 water boards • 2 CMAs • TCTA • WRC	• 9 water boards • 2 CMAs • TCTA • WRC	• 9 water boards • 2 CMAs • TCTA • WRC	• 6 water boards • 2 CMAs • TCTA • WRC

Programme performance indicator	Audited / Actual performance				Estimated performance	Medium term targets	
	2013/14	2014/15	2015/16	2016/17		2017/18	2018/19
4.2.2 National Water Infrastructure Agency established ^{xx}	-	-	Approved agency business case	Concept note for the establishment of the National Water Infrastructure Agency finalised	Due diligence for the establishment of the National Water Infrastructure Agency finalised	Draft business case for the establishment of the National Water Infrastructure Agency finalised	Business case for the establishment of the National Water Infrastructure Agency finalised
4.2.3 Number of Catchment Management Agencies gazetted for establishment	1	3	2	0	3	-	-
			<ul style="list-style-type: none"> • Inkombati-Ukuthu • Breede-Gouritz • Vaal • Limpopo/NW • Olifants • Phongola-Mzimkhulu • Mzimvubu-Tsitsikamma • Orange 				
4.2.4 Number of regional water and wastewater utilities gazetted for establishment	-	-	1 proto-regional water utility (Rand Water)	0	0	<ul style="list-style-type: none"> • (Due diligence for the KwaZulu-Natal proto-regional water utility developed) 	<ul style="list-style-type: none"> 1 regional water utility • (KwaZulu-Natal)
4.2.5 Water economic regulator established ^{xx}	-		Draft implementation strategy on economic regulation chapters and gap analysis have been developed but not finalised	Economic regulation strategy finalized	Draft business case for the establishment of the independent economic regulator	Approved business case for the establishment of the independent economic regulator	Legislation for the establishment of the independent economic regulator

Programme performance indicator	Audited / Actual performance			Estimated performance	Medium term targets		
	2013/14	2014/15	2015/16		2016/17	2017/18	2018/19
4.2.6 Water tariffs in the value chain approved	-	-	-	Raw water charges and bulk tariffs for 2017/18 approved	2018/19 Raw water charges and bulk tariffs approved	2019/20 Raw water charges and bulk tariffs approved	2020/21 Raw water charges and bulk tariffs approved
4.2.7 Water pricing regulations implemented	Draft pricing strategy developed	• Stakeholder comments incorporated	Pricing strategy gazetted for public consultation	Final pricing strategy approved and gazetted	Pricing Strategy & Norms and Standards monitored	Pricing Strategy and Norms & Standards consolidated into pricing regulations	Pricing regulations approved

7.4 Quarterly targets for 2017/18 per sub-programme

Economic and Social Regulation sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
1.5.1 Number of WMAs assessed for Acid Mine Drainage (AMD)	Quarterly (Cumulative)	1 WMA (Crocodile (West), Limpopo)	50 % platinum mines assessed in Crocodile (West), Limpopo	100% platinum mines assessed in Crocodile (West), Limpopo	-	-
1.5.2 Number of WMAs in which mitigation strategies for potential AMD are developed	Quarterly (Non-cumulative)	1 Inkombati-Usutu WMA	Draft 1 strategy for Inkombati-Usutu	Draft 2 strategy for Inkombati-Usutu	Strategy for Inkombati-Usutu reviewed by panel of experts	Final Inkombati-Usutu WMA mitigation strategy
1.5.3 Completion of the Witwatersrand AMD long term project	Quarterly (Non-cumulative)	EIA completed	EIA specialist studies initiated	EIA public participation concluded	EIA report submitted to Dept. of Env. Affairs	EIA completed (i.e. Record of Decision issued)
1.5.4 Mine water management technologies assessed	Quarterly (Non-cumulative)	Assessment of 5 AMD treatment technologies	Contractual agreements finalised	Site establishment finalised	Pilot plants commissioned	First assessment report of the 5 AMD treatment technologies
4.2.5 Water economic regulator established	Quarterly (Non-cumulative)	Approved business case for the establishment of the independent economic regulator	Consultations on the draft business case for the independent economic regulator	Consultations on the draft business case for the independent economic regulator	Revise business case for the establishment of the independent economic regulator	Approved business case for the establishment of the independent economic regulator

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
4.2.6 Water tariffs in the value chain approved	Quarterly (Non-cumulative)	2018/19 Raw water charges and bulk tariffs approved	-	Raw water charges for 2018/19 approved	-	Bulk water tariffs for 2018/19 approved and tabled in Parliament
4.2.7 Water pricing regulations implemented	Quarterly (Non-cumulative)	Pricing Strategy & Norms and Standards monitored	Awareness campaign on approved pricing strategy & Norms and Standards	Implementation of the revised pricing strategy monitored during the 2018/19 raw water charge determination	Implementation of the revised pricing strategy evaluated	Implementation of the Norms and Standards Monitored in the 2018/19 bulk water tariffs

Water use Authorisation and Administration sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
3.1.1 Percentage of applications for water use authorisation finalised within 300 days	Quarterly (Non-cumulative)	80%	80%	80%	80%	80%

Water Supply Services and Sanitation Regulation sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
1.1.1 Number of wastewater systems assessed for compliance with the Green Drop Regulatory standards	Annual	963	-	-	-	963
1.1.2 Number of non-compliant wastewater systems monitored against the Green Drop Regulatory tool	Quarterly (Non-cumulative)	260	50	100	50	60
1.1.3 Number of water supply systems assessed for compliance with Blue Drop Regulatory standards	Annual	1036	-	-	-	1036
1.1.4 Number of non-compliant water supply systems monitored against the Blue Drop Regulatory tool	Quarterly (Non-cumulative)	250	50	100	50	50

Compliance Monitoring and Enforcement sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
1.1.5 Number of dams evaluated for compliance with dam safety regulations by Approved Professional Persons (APPs)	Quarterly (Non-cumulative)	160	40	36	36	48
1.1.6 Number of water users monitored for compliance	Quarterly (Non-cumulative)	384	86	99	99	100
1.1.7 Number of water management institutions monitored for compliance with own water use entitlements and effective monitoring of affiliated water users	Quarterly (Non-cumulative)	31	7	3	3	18
1.1.8 Percentage of reported non-compliant cases investigated	Quarterly (Non-cumulative)	80%	80%	80%	80%	80%

Institutional Oversight sub-programme

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
4.2.1 Number of public entities annually assessed	Quarterly (Non-cumulative)	13	9 water boards	-	Business plans (BPs) and Shareholder Compacts (SHC) analysed	Annual Reports (ARs) analysed and tabled in Parliament -
			2 CMAs	Shareholder Compacts / or business plan submitted for approval	Annual Reports (ARs) analysed and tabled in Parliament -	Final SHC of 2 CMAs received
			TCTA	Shareholder Compacts / or business plan submitted for approval	Annual Report analysed and tabled in Parliament -	-
			WRC	Corporate Plan submitted for approval	Annual Report analysed and tabled in Parliament -	-
4.2.2 National Water Infrastructure Agency established	Quarterly (Non-cumulative)		Due diligence for the establishment of the National Water Infrastructure Agency finalised	Tender documentation for the due diligence finalised	Service provider to conduct the due diligence contracted	Draft due diligence for the establishment of the National Water Infrastructure Agency
						Due diligence for the establishment of the National Water Infrastructure Agency finalised

Programme performance indicator	Reporting period	Annual target 2017/18	Quarterly targets			
			Quarter 1 (Apr – Jun)	Quarter 2 (Jul – Sept)	Quarter 3 (Oct – Dec)	Quarter 4 (Jan – Mar)
4.2.3 Number of Catchment Management Agencies gazetted for establishment	Quarterly (Non-cumulative)	3	Berg Olifants -	-	Approval of gazette for establishment	Berg-Olifants CMA gazette for establishment
		Mzimvubu-Tsitsikamma	-	-	Approval of gazette for establishment	Mzimvubu-Tsitsikama CMA gazetted for establishment
		Orange	-	-	Approval of gazette for establishment	Orange CMA gazetted for establishment
4.2.4 Number of regional water and wastewater utilities gazetted for establishment	Quarterly (Non-cumulative)	0	Due diligence for the KwaZulu-Natal proto-regional water utility developed	Tender documentation for the due diligence finalised	Draft due diligence for the establishment for the KwaZulu-Natal proto-regional water utility	Due diligence for the KwaZulu-Natal proto-regional water utility developed

7.5 Reconciling performance targets with the budget over the medium term

Sub-programme	Rand thousand	Audited outcome			Adjusted appropriation 2016/17	Medium term expenditure estimates

Part C:

Links to other plans

8 Links to the long term infrastructure and capital plans

Tabulated below is the department's long term infrastructure and capital plans for the medium term

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
Mega projects (total project cost of at least R1 billion over the project life cycle)						
1 Pongolapoort (Jozini) bulk water scheme (Pipeline)	uMkhanyakude, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme (added Shemula)	SIP 6	Construction	1 376 048
2 Sedibeng bulk regional sewerage	Sedibeng, Gauteng	Wastewater Services	Construction of new wastewater treatment works	SIP 18	Feasibility	3 000 000
3 De Hoop: Greater Sekhukhune, Limpopo	Greater Sekhukhune, Limpopo	Bulk Water Supply	Construction of new bulk water infrastructure linking communities with the De Hoop Dam	SIP 1	Design	4 088 000
4 Mogalakwena bulk water supply phase 1	Waterberg, Limpopo	Bulk Water Supply	Upgrade of boreholes and construction of new bulk water scheme	SIP 1	Construction	1 650 000
5 Sebokeng Waste Treatment Works phase 1 and phase 2	Sedibeng, Gauteng	Wastewater Services	Upgrade of existing wastewater treatment works	SIP 18	Construction	1 123 584
6 Westonaria/ Randfontein regional bulk wastewater treatment works (Zuurbekom)	West Rand, Gauteng	Wastewater Services	Construction of new wastewater treatment works	SIP 18	Design	1 570 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
7 Mooinoek/ Tubatse bulk water supply	Greater Sekhukhune, Limpopo	Bulk Water Supply	Augmentation of existing bulk water scheme	SIP 1	Construction	1 000 000
8 Nebo bulk water supply	Greater Sekhukhune, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	1 400 000
9 Magalies water supply to Waterberg	Waterberg, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 1	Feasibility	1 891 000
10 Giyani Water Services phase 1 (Emergency)	Mopani, Limpopo	Bulk Water Supply	Construction of new bulk water scheme and upgrading of existing bulk water scheme	SIP 6	Construction	2 511 429
11 Mzimvubu water project	Eastern Cape	Dam and water supply	Development of a conjunctive scheme comprising of 2 multi-purpose dams and associated bulk water distribution infrastructure for domestic and irrigation water supply as well as hydro-generation	SIP 11	Construction	20 000 000
Mega projects (total project cost of at least R1 billion over the project life cycle): infrastructure transfers						
12 Olifants River water resources development project: De Hoop Dam (phase 2A)	Greater Sekhukhune, Limpopo	Dam	Supply of water to new mining developments; augmentation of domestic water supplies to urban and rural users in the middle of the Olifants River catchment area and to various communities on the Nabo Plateau and Sekhukhune	SIP 1	Construction	3 074 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
13 Olifants River water resources development project (phases 2B and 2G)	Greater Sekhukhune, Limpopo	Pumping stations, pipelines, balancing dams, operational infrastructure and appurtenant structures	Construction of Flag Boshield to Mokopane pipeline and second pipeline between Flag Boshield to Mokopane	SIP 1	Design/Feasibility	13 114 000
14 Olifants River water resources development project (phase 2C)	Greater Sekhukhune, Limpopo	Pumping stations, pipelines, balancing dams, operational infrastructure and appurtenant structures	Construction of bulk distribution works from Flag Boshield to Mokopane, De Hoop to Steelpoort, Steelpoort to Mooihook, Mooihook to Olifantspoort and Nebo Plateau to Rossenekal	SIP 1	Construction	3 400 000
15 Olifants River water resources development project (phase 2D)	Greater Sekhukhune, Limpopo	Pumping stations, pipelines, balancing dams, operational infrastructure and appurtenant structures	Construction of second pipeline between Steelpoort weir to and Mooihook	SIP 1	Feasibility	834 480
16 Olifants River water resources development project (phases 2E and 2F)	Greater Sekhukhune, Limpopo	Pumping stations, pipelines, balancing dams, operational infrastructure and appurtenant structures	Construction of second pipeline parallel to Lebalelo scheme and Lebalelo Scheme to Olifantspoort	Not related to SIPs	Design	2 412 240
17 Groot Letaba River water development project: Nwamitwa Dam	Mopani, Limpopo	Dam, Water Treatment Plant, Pipelines, Reservoirs	Meeting of projected growing primary supply requirements for 2025, improvement of water availability for the riverine ecosystem and building of Nwamitwa Dam	SIP 1	Design	1 325 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
18 Dam safety rehabilitation programme	National	Dam	Rehabilitation of assets and improvement of dam safety	Not related to SIPs	Design	2 800 000
19 Water resources project: Raising of Clanwilliam Dam	West Coast, Western Cape	Dam	Upgrading of existing dam to stabilise distortion and augmentation of agricultural water supply to meet increasing demands	SIP 5	Construction	2 500 000
20 Mokolo River and West Crocodile River water augmentation project (phases 2A)	Waterberg, Limpopo	Pumping stations, pipelines, balancing dams, operational and national Key Point infrastructure and appurtenant structures	Augmentation of domestic and industrial water supply to the new Eskom/independent power producer power stations to extend associated mining activities and accommodate growing population in the area	SIP 1	Design	11 267 000
21 Lusikisiki regional water supply scheme: Zalu Dam on the Xura River	OR Tambo, Eastern Cape	Bulk Water and Wastewater Infrastructure	Development of bulk water and wastewater infrastructure to enable the connection of municipal reticulation infrastructure	SIP 3	Feasibility	5 000 000
22 Acid mine drainage	National	Long term infrastructure	Construction of water treatment works	0	Feasibility	-

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
23 OR Tambo Mthatha King Sabata Dalindyebo District Municipality bulk water supply and sanitation (phase 2 of 2)	OR Tambo, Eastern Cape	Bulk Water Supply	Augmentation of existing bulk water scheme	SIP 6	Construction	3 001 534
24 Vaal Gamagara scheme phase 1	John Taolo Gaetsewe, Northern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 11	Construction	18 000 000
25 Polokwane wastewater treatment works	Capricorn, Limpopo	Wastewater Services	Upgrade of existing wastewater treatment works	SIP 18	Design	1 043 836
26 Polokwane bulk water supply	Capricorn, Limpopo	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 6	Construction	1 832 000
27 Umgeni Water Board: Lower Thukela bulk water supply scheme	uThukela, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	1 043 968
28 Umshwathi bulk water supply scheme phase 3 ¹	uMgungundlovu, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	2 308 734
29 Greater Mthonjaneni bulk water supply (phases 2)	uThunguleni, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	1 228 190
30 Ngcebo BWS (iLembe)	iLembe, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	1 420 678
Large projects (total project cost of at least R250 million but less than R1 billion over the project life cycle)						
31 Matoks bulk water supply	Capricorn, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Feasibility	880 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
32 Ndlambe bulk water supply	Sarah Baartman, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 18	Construction	879 000
33 Xhora east bulk water supply	Amathole, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	620 227
34 Meyerton wastewater treatment works phase 1	Sedibeng, Gauteng	Wastewater Services	Upgrade of existing wastewater treatment works	SIP 18	Construction	257 462
35 Mbizana regional bulk water supply	OR Tambo, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 6	Completed	910 843
36 Westonaria/ Randfontein regional bulk wastewater treatment works (Hannes van Niekerk)	West Rand, Gauteng	Wastewater Services	Upgrade of existing wastewater treatment works	SIP 18	Handed over	266 000
37 Western highveld regional (Rust de Winter) bulk water supply	Nkangala, Mpumalanga	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	IRS	486 000
38 Lebalelo central and North regional water supply	Greater Sekhukhune, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Feasibility	600 000
39 Nzhelele Valley bulk water supply	Vhembe, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Feasibility	600 000
40 Madibeng bulk water supply phase 2	Bojanala Platinum, North West	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 4	Construction	446 585

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
41 Upgrading of the Homevale wastewater treatment plant (Soli Plaatjie wastewater treatment works)	Frances Baard, Northern Cape	Bulk Water Supply	Upgrade of existing wastewater treatment works	SIP 18	Construction	298 000
42 Nketane bulk water supply Phase 1	Thabo Motlatsanyana, Free State	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 18	Construction	304 000
43 Sterkfontein Dam scheme (phase 1)	Thabo Motlatsanyana, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	330 000
44 Potchefstroom water treatment works upgrade	Dr Kenneth Kaunda, North West	Bulk Water Supply	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 4	Feasibility	400 000
45 Sinthumule Kutama bulk water augmentation phase 3	Vhembe, Limpopo	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Construction	751 603
46 Moutse bulk water supply phase1-5	Greater Sekhukhune, Limpopo	Bulk Water Supply	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 6	Construction	720 000
47 Glen Alpine bulk water supply	Capricorn, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 1	Feasibility	345 000
48 Lephalale/ Eskom: Bulk water augmentation	Waterberg, Limpopo	Bulk Water Supply	Augmentation of existing bulk water scheme	SIP 6	Feasibility	330 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
49 Moretele bulk water supply phase1 (Klipdrift) and phase 2 (Babelegi)	Bojanala Platinum, North West	Bulk Water Supply	Construction of new bulk water scheme	SIP 4	Construction	640 617
50 Bitou cross border bulk water supply	Eden, Western Cape	Bulk Water Supply	Construction of new bulk pipelines	SIP 18	Feasibility	250 000
51 West Coast desalination plant	West Coast, Western Cape	Bulk Water Supply	Construction of new desalination plant	SIP 18	Design	563 212
52 Mncwasa bulk water supply	Amathole, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Completed	264 188
53 Kalahari East to Mier pipeline phase 2	Siyanda, Northern Cape	Bulk Water Supply	Supply of water	SIP 18	Construction	468 100
54 Emalahleni bulk water supply phase 3	Nkangala, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	335 605
55 Ohrigstad bulk water supply	Greater Sekhukhune, Limpopo	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Feasibility	450 000
56 Northern Nsikazi bulk water supply phase 1	Ehlanzeni, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	367 286
57 Aganang bulk water supply	Capricorn, Limpopo	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Design	350 000
58 Sundwana water supply	Amathole, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Feasibility	591 000
59 Mpumalanga Lowveld feasibility studies	Ehlanzeni, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Feasibility	800 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
60 Ngwathe bulk sewer phase 1 (Vrededorp)	Fezile Dabi, Free State	Wastewater Services	Upgrade of existing waste water treatment works	SIP 18	Construction	300 000
61 Dihlabeng bulk water supply (phase 2)	Thabo Mofutsanyana, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	255 000
62 Dukuduku resettlement bulk water supply	uMkhanyakude, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	350 000
63 Giyani bulk water supply relief phase 1 (Nandoni Nsami)	Mopani, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	589 946
64 Mametya Sekororo bulk water supply phase 1	Mopani, Limpopo	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	310 718
65 Tokologo regional water supply (phase 2)	Lejweleputswa, Free State	Bulk Water Supply	Upgrade of bulk water scheme	SIP 18	Construction	320 000
66 Ngwathe boreholes	Fezile Dabi, Free State	Bulk Water Supply	Development of borehole to augment existing bulk water scheme	SIP 6	Handed over	250 000
67 Msukaligwa regional water supply scheme (phase 1)	Gert Sibande, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Design	407 000
68 Emalahleni water treatment works, (upgrade/ refurbishment)	Nkangala, Mpumalanga	Wastewater Services	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 18	Construction	335 605

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
69 Mafikeng South bulk water supply phase 2 (upgrade of water treatment works)	Ngaka Modiri Molema, North West	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	286 648
70 Mathjabeng bulk sewer (Welkom)	Lejweleputswa, Free State	Wastewater Services	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 18	Feasibility	420 000
71 Thembisile water scheme (Loskop)	Nkangala, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Feasibility	324 428
72 Western Highveld bulk water supply scheme (Rust de Winter)	Nkangala, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 6 and SIP 18	Feasibility	743 000
73 Welbedacht pipeline	Mangaung Metro, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Tender	500 000
74 Ngqamakhwe Bulk Water Supply	Amathole, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	IRS	370 000
75 Groot Letaba River water development project: Raising of Tzaneen Dam	Mopani, Limpopo	Dam, Water Treatment Plant, Pipelines, Reservoirs	Meeting of projected growing primary supply requirements for 2025; improvement of water availability for the riverine ecosystem and raising of Tzaneen Dam	SIP 1	Construction	125 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
76 Mdloti River development project: Raising of Hazelmere Dam	iLembe, KwaZulu-Natal	Dam (radial crest gates)	Augmentation of water supply to Umgeni Water for treatment, for KwaZulu-Natal North coast	SIP 2	Construction	360 000
77 Mopani district municipality emergency works	Mopani, Limpopo	Dam	Refurbishment of dilapidated infrastructure	Not related to SIPs	Construction	80 000
78 Mzimkulu River: Ncwbeni off-channel storage	uGu, KwaZulu-Natal	Dam, Water Treatment Plant, Pipelines, Reservoirs	Assurance of a reliable water supply to the Northern part of the lower KwaZulu-Natal South coast during dry periods	SIP 2	Design	650 000
79 Taung/ Naledi bulk water supply phase 2D	Dr Ruth Mompati, North West	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 4	Construction	733 754
80 Namakwa bulk water supply phase 2	Namakwa, Northern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Construction	648 312
81 Pilanesberg South bulk water supply phase 2	Bojanala Platinum, North West	Bulk Water Supply	Upgrade of existing bulk water scheme and construction of new bulk water scheme.	SIP 4	Construction	796 631
82 Amatola Water: Refurbishment of 6 existing plants and downstream infrastructure ²	Eastern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 6	Construction	500 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
83 Greater Mamusa bulk water supply phase 1 (Refurbishment)	Dr Ruth Mompati, North West	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 4	Construction	444 288
84 Chris Hani district municipality Ncora bulk water supply (cluster 4)	Chris Hani, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 6	Construction	421 727
85 Chris Hani district municipality Ngcobo bulk water supply (cluster 6)	Chris Hani, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme and spring protection	SIP 6	Construction	321 727
86 Xonxa Dam BWS	Chris Hani, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Construction	443 998
87 Mhlabatshane bulk water supply	uGu, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	483 482
88 Greytown BWS Phase 2	Umzinyathi, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 6	Construction	950 000
89 Middledrift BWS	uThungulu, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	340 000
90 Greater Bulwer Donnybrook water scheme phase 2	Harry Gwala, KwaZulu-Natal	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 6	Construction	343 337
91 Nongoma bulk water supply	Zululand, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	529 134

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
92 Dukuduku resettlement bulk water supply	uMkhanyakude, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	266 382
93 Greater Mpofana regional bulk water supply Phase1-3	uMgungundlovu, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Feasibility	469 293
94 Driefontein Phase 3 (Spienkop to Ladysmith) bulk water supply	uThukela, KwaZulu-Natal	Bulk Water Supply	Construction of bulk water scheme	SIP 18	Feasibility	350 000
95 Maphumulo BWS	iLembe, KwaZulu-Natal	Bulk Water Supply	Construction of bulk water scheme	SIP 18	Feasibility	294 621
96 Chris Hani district municipality bulk water supply: Quthubeni (cluster 9) phase 1	Chris Hani, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	208 000
97 Middelburg groundwater supply	Chris Hani, Eastern Cape	Bulk Water Supply	Development of borehole to augment existing bulk water scheme	SIP 6	Construction	32 505
98 Masilonyana bulk water supply phase 1	Lejweleputswa, Free State	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Design	304 941
99 Driefontein Indaka bulk water supply	uThukela, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Construction	378 529
100 Mandlakazi bulk water supply phase 5	Zululand, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Construction	94 000

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
101 Balf/ Siyat/ Grey/ Willem/ Nthor bulk water supply	Gert Sibande, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Various	590 709
102 Msukaligwa regional water supply scheme (phase 1)	Gert Sibande, Mpumalanga	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Design	407 000
103 Empuluzi and Methula bulk water scheme	Gert Sibande, Mpumalanga	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	IRS	291 021
104 Kagisano Molopo bulk water supply	Dr Ruth Mompati, North West	Bulk Water Supply	Upgrade of existing water treatment works and new bulk water scheme	SIP 4	Feasibility	350 000
105 Stellenbosch wastewater treatment works phase 2	Cape Winelands, Western Cape	Wastewater Services	Upgrade of existing wastewater treatment works	SIP 18	Construction	304 256
Small water augmentation projects (total project cost of less than R250 million over the project life cycle)						
106 Graaff-Reinet emergency water supply scheme	Sarah Baartman, Eastern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Construction	50 798
107 Sundays River bulk water supply (Paterson)	Sarah Baartman, Eastern Cape	Bulk Water Supply	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 18	Construction	106 465
108 Steytlerville water supply scheme	Sarah Baartman, Eastern Cape	Bulk Water Supply	Augmentation of existing bulk water scheme	SIP 18	Construction	111 308
109 Ibika water supply	Amathole, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Completed	64 796

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
110 Ikwezi bulk water supply	Sarah Baartman, Eastern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Feasibility	50 557
111 Kirkwood water treatment works	Sarah Baartman, Eastern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Feasibility	22 186
112 Misgund bulk water supply	Sarah Baartman, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme and upgrade of existing bulk water scheme	SIP 18	Feasibility	13 640
113 Matatiele bulk water supply	Alfred Nzo, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	182 344
114 Mount Ayliff bulk water supply	Alfred Nzo, Eastern Cape	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Completed	208 752
115 Jagersfontein/ Fauresmith: Bulk water supply (phases 2)	Xhariep, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	60 695
116 Tokologo regional water supply (phase 1)	Lejweleputswa, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Handed over	223 000
117 Dihlabeng bulk water supply (phase 1)	Thabo Mofutsanyane, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Handed over	96 990
118 Phumelela bulk water supply phase 2	Thabo Mofutsanyane, Free State	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 18	Construction	166 000
119 Moqhaka bulk water supply (Streynrus Kroonstad WTW) phase 1 of 2	Fezile Dabi, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	90 402

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
120 Moqhaka bulk sewer	Fezile Dabi, Free State	Wastewater Services	Construction of bulk sewer	SIP 18	Construction	105 000
121 Nala bulk sewer (Weselbron/Monyakeng)	Lejweleputswa, Free State	Wastewater Services	Construction of bulk sewer	SIP 18	Feasibility	45 999
122 Tswelopele bulk water supply	Lejweleputswa, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Construction	85 000
123 Ratlou bulk water supply phase 1 (Settagole)	Ngaka Modiri Molema, North West	Bulk Water Supply	Upgrade of existing water treatment works and construction of new bulk water scheme	SIP 4	Construction	218 090
124 Maluti-a-Phofung bulk water supply phase 2 and 3 of 4	Thabo Motutsanyane, Free State	Bulk Water Supply	Construction of new bulk water scheme	SIP 3	Construction	240 000
125 Greater Eston water scheme	uMgungundlovu, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Handed over	192 000
126 Driefontein Complex bulk water supply	uThukela, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme to augment existing bulk water scheme	SIP 6	Handed over	196 101
127 Emadlangeni bulk regional scheme	Amajuba, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Handed over	50 301
128 Hlabisa regional bulk water supply	uMkhanyakude, KwaZulu-Natal	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Handed over	166 855
129 Port Nolloth bulk water supply	Namakwa, Northern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Design	44 057

Project name	Location	Output	Project description	SIP category	Current project stage	Total project cost in R'000
130 Colesberg bulk water supply	Pixley ka Seme, Northern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Design	123 765
131 Noupoort bulk water supply	Pixley ka Seme, Northern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 18	Construction	77 742
132 De Aar bulk water supply (borehole development)	Pixley ka Seme, Northern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme (borehole development)	SIP 6	IRS	43 735
133 Hopetown water treatment works bulk water supply (Thembelihle)	Pixley ka Seme, Northern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 6	Handed over	75 000
134 Strydenburg groundwater project	Pixley ka Seme, Northern Cape	Bulk Water Supply	Provision of groundwater development	SIP 6	Handed over	21 018
135 Heuningvlei scheme bulk water supply	Northern Cape	Bulk Water Supply	Construction of new bulk water scheme	SIP 6	Handed over	142 340
136 Kuruman bulk water supply phase1 (reservoir)	John Taolo Gaetsewe, Northern Cape	Bulk Water Supply	Upgrade of existing bulk water scheme	SIP 18	Construction	186 900
137 Kathu wastewater treatment works	John Taolo Gaetsewe, Northern Cape	Wastewater Services	Construction of new wastewater treatment works	SIP 18	Handed over	230 000

9 Conditional grants

Table 1: Regional Bulk Infrastructure Grant

Name of grant	Regional Bulk Infrastructure (RBIG)
Grant schedule	Schedule 5B and schedule 6B
Strategic goal	Facilitate achievement of targets for access to bulk water through successful execution and implementation of regional bulk infrastructure projects or bulk projects of regional significance
Purpose	<ul style="list-style-type: none">• To develop new, refurbish, upgrade and replace ageing water and waste water infrastructure of regional significance that connects water resources to infrastructure serving extensive areas across municipal boundaries or large regional bulk infrastructure serving numerous communities over a large area within a municipality• Implementation of regional Water Conservation and Water Demand Management (WC/WDM) projects or facilitate and contribute to the implementation of local WC/WDM projects that will directly impact on bulk infrastructure requirements
Outcome statement(s)	<ul style="list-style-type: none">• Access to water supply enabled through regional bulk infrastructure• Proper waste water management and disposal enabled through regional wastewater infrastructure
Performance indicator (s)	<ul style="list-style-type: none">• Number of regional bulk and WC/WDM projects initiated• Number of projects completed• Number of people or households benefitting from projects completed• Number of municipalities benefitting• Number of job opportunities created

Table 2: Water Services Infrastructure Grant

Name of grant	Water Services Infrastructure (WSIG)
Grant schedule	Schedule 5B and schedule 6B
Strategic goal	To assist Water Services Authorities (WSAs) to reduce water and sanitation backlogs and sustain water and sanitation infrastructure
Purpose	<ul style="list-style-type: none">• To facilitate the planning and implementation of various water and sanitation projects to accelerate backlog reduction and improve the sustainability of services in prioritised district municipalities, especially in rural municipalities• Provide interim, intermediate water supply that ensure provision of services to identified and prioritised communities, including through spring protection, drilling, testing and equipping of boreholes• Provide on site sanitation solutions• To support drought relief projects in affected municipalities
Outcome statement(s)	An increased number of households with access to reliable, safe drinking water and sanitation services
Performance indicator (s)	<ul style="list-style-type: none">• Number of households provided with water and sanitation through<ul style="list-style-type: none">• reticulated water supply,• on site sanitation,• source identification,• water conservation/ water demand management provisioning• Number of households reached by health and hygiene awareness and end user education• Number of job opportunities created

10 Entities

Various entities report to the Minister through governance arrangements allowing some autonomy to fulfill their mandates and others (as in the WTE) semi-autonomy.

10.1 Water Trading

The Water Trading was established in 1983 as a trading account under the Exchequer Act. When the Public Finance Management Act (PFMA) of 1999 converted trading accounts into trading entities, the Water Trading Entity's (WTE) conversion occurred in 2006 with its financial statements that comply with Generally Accepted Accounting Practices (GAAP) presented at the end of the 2005/06 financial year. The Water Trading Entity has since converted from GAAP to General Recognized Accounting Practices (GRAP). The WTE directly reports to the Accounting Officer of the department and has two components namely the Water Resource Management unit (also known as Proto-Catchment Management Agencies) and the Infrastructure branch.

The Water Resource Management unit is primarily responsible for sustainable and equitable use, conservation and allocation of water resources for the benefit of the people residing in respective water management areas.

The infrastructure branch primarily develops new infrastructure and also operates and maintains existing infrastructure. It comprises of the integrated systems and bulk water systems. The integrated systems primarily transport water from water rich to water scarce catchments through a number of dams and pipelines that are operated as one interlinked system. The bulk water supply schemes on the other hand are operated as stand-alone water schemes comprising of former homeland government schemes and the agriculture sector.

The WTE's funding comes from the revenue generated from water users in respective areas as well as partial augmentation from the fiscus. The fiscus augments the shortfall where the revenue is inadequate to cover the entire operations. The projected revenue for the 2017/18 medium term is tabulated below:

Statement of comprehensive income	Rand thousand	Audited outcome			Revised estimate 2016/17	Medium term estimates	
		2013/14	2014/15	2015/16		2017/18	2018/19
Revenue							
Non-tax revenue	8 197 006	9 919 245	9 632 121	8 667 932	9 694 245	10 605 965	11 042 717
Sale of goods and services other than capital assets	7 811 749	8 965 462	9 160 463	8 606 505	9 579 362	10 479 594	10 903 708
Administrative fees	–	–	–	–	–	–	–
Sales by market establishment	7 811 749	8 965 462	9 160 463	8 606 505	9 579 362	10 479 594	10 903 708
Other sales	–	–	–	–	–	–	–
Other non-tax revenue	385 257	953 783	471 658	61 427	114 883	126 371	139 009
Transfers received	2 377 202	2 399 258	1 522 038	1 499 528	1 236 738	1 888 854	1 991 192
Total revenue	10 574 208	12 318 503	11 154 159	10 167 460	10 930 983	12 494 819	13 033 909

Fifty two percent (52%) of the total budget for the Water Trading is allocated towards making payments to the Trans Caledon Tunnel Authority (TCTA) for debt repayment for completed and operational as well as new projects constructed on its behalf. The budget for this purpose grows at an average of 5% over the medium term. The transfers from the department account for 14.1% of total revenues over the medium term with an average growth rate of 9.9%. This allocation funds the social portion of the national water resources infrastructure, public interest functions in water resources management and supplements the revenues of the Water Trading.

The Water Trading activities over the medium terms are stipulated within the various programmes in the APP as follows:

- Administration (i.e. Financial Management sub-programme)
- Water Planning and Information Management (i.e. Water Information Management sub-programme)
- Water Infrastructure Development (i.e. Strategic Infrastructure Development and Management as well as Operation of Water Resources sub-programmes)

10.2 Trans-Caledon Tunnel Authority (TCTA)

The TCTA was established in 1986 as a state-owned entity specialising in project financing, implementation and liability management. It is responsible for the development of bulk raw water infrastructure and provides an integrated treasury management and financial advisory service to the Department, Water Boards, municipalities and other entities linked to bulk raw water infrastructure. It is listed as a schedule 2 major public entity in the PFMA.

In contribution to the Department's strategic objective of ensuring the availability of / access to water supply for environmental and socio-economic use, the TCTA will focus on:

- Facilitating water security through the planning, and
- Financing and implementation of bulk raw water infrastructure.

10.3 Water Research Commission (WRC)

The WRC was established in 1971 to generate new knowledge and to promote the country's water research. Its mandate includes promoting co-ordination, co-operation and communication in the area of water research and development; establishing water research needs and priorities; stimulating and funding water research according to priority; promoting effective transfer of information and technology; enhancing knowledge and capacity-building within the water sector. The WRC is listed as a schedule 3A entity in the PFMA.

In contribution to the Department's strategic objective of improving, increasing the skills pool and building competencies within the sector the WRC will focus on

- Promoting co-ordination, co-operation and communication in the area of water research and development.
- Establishing water research needs and priorities.
- Stimulating and fund water research according to priority.
- Promoting effective transfer of information and technology.
- Enhancing knowledge and capacity building in the water sector.
- Developing a strategic framework for water research in South Africa.

10.4 Catchment Management Agencies

Catchment Management Agencies (CMAs) are established in terms of Chapter 7 of the National Water Act. They are responsible for managing the water resources at a catchment level in collaboration with local stakeholders (with a specific focus on involving local communities in the decision making) regarding meeting of basic human needs, promoting equitable access to water and facilitating social and economic development. The CMAs are listed as schedule 3A entities in the PFMA. Nine (9) CMAs corresponding with nine (9) Water Management Areas are being established. The Inkomati-Usuthu and Breede-Gouritz CMAs are operational whilst the Limpopo-North West and the Pongola-Mzimkulu CMAs have been gazetted for establishment. The Vaal and Olifants CMAs will be established during 2015/16 year.

In contribution to the Department's strategic objective of improving the protection of water resources and ensure their sustainability the CMAs will focus on

- Finalisation of the catchment management strategies.
- Registering water use.
- Building Catchment Management Forums
- Facilitating transformation of Irrigation Water Boards
- Supporting verification and validation (V & V) process.
- Dealing with pollution incidents

10.5 Water Boards

Water Boards derive their mandate from the Water Services Act (1997) and are categorised as national government business enterprises in terms of schedule 3B of the Public Finance Management Act (1999). Water Boards are separate legal entities that have their own governance structures and assets and are required to be self-funding. The Minister of Water and Sanitation appoints board members and chairpersons.

The nine (9) Water Boards provide bulk potable water services to the municipalities in which they operate, and to other water service institutions and major customers within designated service areas. Water Boards vary considerably in size, activities, customer mix, revenue base and capacity. Botshelo Water; Pelladrift Water and Bushbuckridge Water boards were disestablished during 2013/14 and 2014/15 financial years as part of institutional re-alignment and reform process. Both Botshelo Water and Pelladrift Water have been incorporated to the Sedibeng Water while Bushbuckridge Water has been incorporated to Rand Water.

Most of the older and more established Water Boards are located in areas where there are significant urban development nodes (such as Rand Water, Umgeni Water and Magalies Water), while other boards operate in more demographically diversified areas, where there is an urban and rural mix in the customer base. While providing bulk treated water to municipalities, in some cases the boards also provide retail water and sanitation services on behalf of municipalities.

- In support of the Department's strategic objective of ensuring effective performance of water management and services institutions the Water Board will focus on
- Quality potable bulk water supplied to municipalities, industries and mines;
- Infrastructure development and job creation.

Table 3: List of entities to be evaluated during the period

No	Name of entity	Province	Budget in R'000		Date of next evaluation
			Current 2016/17 budget	Projected 2017/18 budget	
1	Amatola Water	Eastern Cape	351 307	155 178	April
2	Bloem Water	Free State	581 192	654 737	April
3	Breede-Gouritz CMA	Western Cape	47.3 m	82.7 m	October
4	Inkomati-Usuthu CMA	Mpumalanga	82.7 m	109 162 m	October
5	Lepelle Water	Limpopo	591 559	800 169	April
6	Magalies Water	North West	452 171	523 541	April
7	Mhlathuze Water	KwaZulu-Natal	953 853	964 872	April
8	Overberg Water	Western Cape	52 965	69 013	April
9	Rand Water	Gauteng, Mpumalanga, North West and Free State	13 425 331	15 260 421	April
10	Sedibeng Water	Free State, North West and Northern Cape	1 232 840	1 332 407	April
11	Trans Caledon Tunnel Authority	National	7 930 000	8 746 000	November
12	Umgeni Water	KwaZulu-Natal	4 590 553	7 878 790	April
13	Water Research Commission	National	310 494	304 630	November

Their consolidated projected capital expenditure (CAPEX) for the next five years is tabulated below.

Table 4: Entities' consolidated capital expenditure

No	Name of entity	Budget in R' 000			2019/20	Totals
		2015/16	2016/17	2017/18		
1	Amatola Water	189 903	92 353	155 178	346 696	42 298
2	Bloem Water	67 000	82 000	100 000	82 000	266 000
3	Lepelle Water	84 170	309 175	191 218	145 393	91 224
4	Magalies Water	623 000	1 013 000	141 000	489 000	184 000
5	Mhlathuze Water	166 000	122 000	329 000	309 000	123 000
6	Overberg Water	8 699	66 547	30 868	6 457	0
7	Rand Water	2 750 000	4 372 000	4 372 000	4 363 000	4 334 000
8	Sedibeng Water	48 000	140 000	530 000	530 000	690 000
9	Trans Caledon Tunnel Authority	2 498 000	2 677 000	4 880 000	7 638 000	8 205 000
10	Umgani Water	4 370 000	1 976 898	1 475 292	1 340 550	1 009 056
						10 171 796

Appendices

Appendix 1: Changes to the strategic objectives in the strategic plan

2015/16 to 2019/20 Strategic Plan	Revision of strategic objective in 2017/18 to 2019/20 Annual Performance Plan (APP)	2015/16 to 2019/20 Strategic Plan five year targets	Revision of strategic objective targets in 2017/18 to 2019/20 APP	Comments
1.1 Water resources protected through water supply and sanitation services regulation, compliance monitoring and enforcement	1.1 Remains the same	Level of water users' compliance against the regulatory compliance and assessment tool	Sector performance against regulatory requirements	This target was changed to comply with the SMART principle.
1.2 Enhanced management of water and sanitation information	1.2 Remains the same	An Integrated National Water Resources Monitoring network that enhances the reliability of water information in prioritized areas	Achieve 65% compliance level for mines measured against individual water use entitlements	The unit of measurement was added to align with the outcomes approach requirements
1.3 The integrity of freshwater ecosystems protected	1.3 Remains the same	Classifying and determining resource quality objectives for 17 river systems	An Integrated National Water Resources Monitoring network that enhances the reliability of water information in 9 water management areas	This target was reduced to factor in the limited available resources to achieve the planned target (i.e. minimum of about 24 months to complete the classes without the RQOs)
1.4 Enhanced water use efficiency and management of water quality	1.4 Enhanced water use efficiency and management of water quantity	Annually monitor 8 large water supply systems for water losses	Remains the same	The SO and target were revised to align "water use efficiency" with "quantity" as water losses are a component of water use efficiency.
1.5 Freshwater eco-systems protected from Acid Mine Drainage	1.5 Freshwater eco-systems protected from mine water impacts	End of term analysis on the implementation of the National Mine water regulation Programme	National Mine Water Management Strategy implemented in 9 catchments	This target was revised to factor in the implementation of the National Mine Water Management strategy in specific catchment areas

2015/16 to 2019/20 Strategic Plan	Revision of strategic objective in 2017/18 to 2019/20 Annual Performance Plan (APP)	2015/16 to 2019/20 Strategic Plan five year targets	Revision of strategic objective targets in 2017/18 to 2019/20 APP	Comments
2.1 A coordinated approach to water and sanitation infrastructure planning and monitoring and evaluation	2.1 Remains the same	An up-to-date National Water and Sanitation Master Plan (NWSMP) with a 10 year horizon	National Water and Sanitation Master Plan (NWSMP) with a 10 year horizon	This target was changed to comply with the SMART principle
2.2 Targeted and aligned planning for adequate water availability and the enhanced provision of water, supply and sanitation services	2.2 Remains the same	Completed plans for 86 bulk water supply and sanitation services infrastructure projects	Remains the same	-
2.3 Adequate water availability and enhanced provision of sustainable and reliable water supply and sanitation services	2.3 Remains the same	Complete over 600 bulk water supply and sanitation services infrastructure projects	457 153 of households served with bulk water supply and sanitation services infrastructure	The unit of measurement was changed from projects to the number of households to align with the outcomes approach requirements
2.4 Safe, reliable and sustainable water supply and water and sanitation services infrastructure	2.4 Remains the same	Annual assessments on the implementation of the National Asset Management Plan (NAMP)	National Asset Management Plan (NAMP) implemented with unscheduled maintenance kept at 10% and below.	The target was revised to factor the monitoring of unscheduled maintenance
2.5 Enhanced provision of sustainable and dignified basic sanitation	2.5 Remains the same	Eradicate the sanitation backlog in over 26 000 rural households and replacing bucket sanitation systems in formal settlements in over 4 000 households	Eradicate the sanitation backlog in 30 978 rural households	This SO was moved from Water and Sanitation Services to Water Infrastructure Development to align with the revised budget structure. Also the target was revised to comply with the SMART principle
3.1 Equitable water allocation and availability for socio-economic development	3.1 Remains the same	Implementing the revised water allocations within 9 catchments	Water allocations reform implemented within 9 water management areas	The target was revised to replace catchments with water management areas

2015/16 to 2019/20 Strategic Plan	Revision of strategic objective in 2017/18 to 2019/20 Annual Performance Plan (APP)	2015/16 to 2019/20 Strategic Plan five year targets	Revision of strategic objective targets in 2017/18 to 2019/20 APP	Comments
3.2 Targeted rural development initiatives that support smallholder farmers	3.2 Remains the same	Implement targeted rural development initiatives that support smallholder farmers	Implement targeted rural development initiatives that will provide access to 900 million m ³ of water to smallholder farmers	This SO was moved from Water and Sanitation Services to Water Infrastructure Development to align with the revised budget structure. Also, the target was revised to comply with the SMART principle.
3.3 Targeted procurement that supports black entrepreneurs in the sector	3.3 Remains the same	Spend 80% of the procurement budget on BBBEE compliant suppliers	Remains the same	-
3.4 Job opportunities created that expand economic opportunities for historically excluded and vulnerable groups	3.4 Remains the same	Number of job opportunities created through implementing infrastructure projects	Number of full-time equivalent jobs created through implementing infrastructure projects	The unit of measurement was changed to align with the Expanded Public Works Programme requirements
4.1 An enabling environment for the management of water resources and the provision of basic water and sanitation services across the sector	4.1 Remains the same	Water Sanitation Amendment Bill developed	Remains the same	This SO was moved from Water Sector Regulation to Water Planning and Information Management to align with the revised budget structure
4.2 Sound governance and oversight of the DWS Public Entities	4.2 Remains the same	Performance evaluation of the DWS entities against their performance agreement	Remains the same	-
4.3 An efficient, effective and high performing organisation	4.3 Remains the same	An unqualified audit outcome on the financial and non-financial data from 2016/17 onwards	Remains the same	-

2015/16 to 2019/20 Strategic Plan	Revision of strategic objective in 2017/18 to 2019/20 Annual Performance Plan (APP)	2015/16 to 2019/20 Strategic Plan five year targets	Revision of strategic objective targets in 2017/18 to 2019/20 APP	Comments
4.4 Coordinated development of the skills pool across the sector	4.4 Remains the same	To standardise the workplace skills plan for the water sector by 2018/19 and annually monitoring progress from 2019/20 onwards	An evaluation on the effectiveness of the standardised workplace skills plan for the water sector	This SO was moved from Water and Sanitation Services to Administration to align with the revised budget structure. Also the target was revised to comply with the SMART principle.
5.1 Targeted and sustained African and global cooperation in support of the national water and sanitation agenda	5.1 Remains the same	An approved Africa and global International Relations Programme and a 5 year end of term analysis on its implementation	An evaluation on effectiveness of the approved International Relations Programme	This target was changed to comply with the SMART principle
5.2 Informed and empowered communities and responsive government securing integrated and sustainable partnerships to support the W & S development agenda	5.2 Remains the same	5-year strategically aligned programme on Partnerships, Communications and Stakeholder Relations; approved at the start of the MTSF and assessed at the end of term	An evaluation of the Partnerships, Communications and Stakeholder Relations programme	This target was changed to comply with the SMART principle

Appendix 2: Definition of terms

Term	Definition
Adequate sanitation	Sanitation services that is easily accessible to household members, has the necessary operational support for the safe removal of human waste and black and / or grey water from the premises where this is appropriate and necessary, and promotes the communication of good sanitation, hygiene and related practices.
Basic Water Supply	The prescribed minimum standard of water supply services necessary for the reliable supply of a sufficient quantity and quality of water to households, including informal households, to support life and personal hygiene (i.e. RDP standard that requires a tap in the street 200m from households)
Bulk water resource infrastructure	Infrastructure required to store and transfer raw water as part of government schemes. It also referred to as national water resources infrastructure (e.g. dams, canals, major pump stations etc.)
Catchment	A watercourse or watercourses or part of a watercourse, means the area from which any rainfall will drain into the watercourse or watercourses or part of a watercourse, through surface flow to a common point or common points
Compulsory licensing	A mechanism to reconsider all the water use authorisations in an area to <ul style="list-style-type: none"> • Achieve a fair allocation of water from a resource that is under stress or to achieve equity in allocation; • Promote beneficial use of water in the public interest; • Facilitate efficient management of the water resource; • Protect water resource quality.
Conservation	In relation to a water resource means the efficient use and saving of water, achieved through measures such as water saving devices, water-efficient processes, water demand management and water rationing
Consumer	Any end user who receives water services from a water services institution, including an end user in an informal settlement
Conveyance system	It's an infrastructure constructed for the purpose of transferring water from a natural water resource to a point of use (e.g. canal, pipeline, tunnel, siphon etc.)
Cumulative	A value increase by making successive additions of random variables
Feasibility Plan	An evaluation and analysis of the potential of the proposed water resource development project which is based on extensive investigation and research. This may entail water availability analysis, socio-economic viability, environmental impact assessment and geo-technical studies to provide best suitable option for a water resource development or augmentation.
Formal settlement	Permanent housing created in an urban or peri-urban location with official approval
Interim Water Supply	This can be a spring protection or a borehole with a hand pump in a village

Term	Definition
Job opportunity	Paid work created for an individual on a project for any period of time. The same person can be employed on different projects and each period of employment will be counted as a job opportunity.
Large project	A project with a total cost of at least R250 million but less than a R 1 billion over the project life cycle.
Mega project	A project over R400 million per annum for a minimum of three years, or a minimum of R1 billion total project cost.
National Water Resource Strategy	Provides the framework for the protection, use, development, conservation, management and control of water resources for the country as a whole. It also provides the framework within which water will be managed at regional or catchment level, in defined water management areas.
Non-cumulative	Values calculated during the query at a certain period (i.e. actual values during the quarter)
Pollution	The direct or indirect alteration of the physical, chemical or biological properties of a water resource so as to make it less fit for any beneficial purpose for which it may reasonably be expected to be used; or harmful or potentially harmful to the welfare, health or safety of human beings; to any aquatic or non-aquatic organisms; to the resource quality; or to property
Programme	Is the main division within the department's budget that funds a clearly defined set of objectives based on the services or functions within the department's legislative and other mandates
Reserve	The quantity and quality of water required to satisfy basic human needs by securing a basic water supply, as prescribed under the Water Services Act, 1997 (Act No. 108 of 1997), for people who are now or who will, in the reasonably near future, be relying upon; taking water from; or being supplied from the relevant water resource; and to protect aquatic ecosystems in order to secure ecologically sustainable development and use of the relevant water resource;
Resource Poor Farmer	Farmers who are citizens of South Africa and who are members of the historically disadvantaged population groups.
Resource quality	The quality of all the aspects of a water resource including the quantity, pattern, timing, water level and assurance of in-stream flow; the water quality, including the physical, chemical and biological characteristics of the water; the character and condition of the in-stream and riparian habitat; and the characteristics, condition and distribution of the aquatic biota
Resource Quality Objective	The establishment of clear goals relating to the quality of the relevant water resource. In determining resource quality objectives a balance must be sought between the need to protect and sustain water resources on the one hand, and the need to develop and use them on the other.
SIP 1	Unlocking the northern mineral belt with Waterberg as Catalyst
SIP 2	Durban-Free State Gauteng Logistics and Industrial Corridor
SIP 3	South eastern node and corridor development
SIP 4	Unlocking the economic opportunities in the Both West Province
SIP 5	Saldanha-Northern Cape Development Corridor

Term	Definition
SIP 6	Integrated municipal infrastructure project
SIP 11	Agri-logistics and rural infrastructure
SIP 18	Water and sanitation master plan
Small project	A project with a total cost less than R250 million over the project life cycle
Sub-programme	Is a constituent part of a programme that defines the services or activities which contribute to the achievement of the objective(s) of the programme of which it forms a part.
Water Management Area	Is an area established as a management unit in the national water resource strategy within which a Catchment Management Agency will conduct the protection, use, development, conservation, management and control of water resources
Water Management System	This is a computer system designed to support the water resource management function of the Department with emphasis on water and environmental quality
Water Reconciliation Strategy	A study that identifies, evaluates and prioritises interventions to reconcile the future water requirements with the available water resources within a particular area
Water resource	Includes a watercourse, surface water, estuary, or aquifer
Water Service Authority	Any municipality, including a district or rural council as defined in the Local Government Transition Act, 1993 (Act No. 209 of 1993).
Water Services	Water supply services and sanitation services
Water use authorisation	Water use authorisation may be one of the following:
	1 Schedule 1 use - small volumes of water for household use only. No application for a licence needs to be made.
	2 General Authorisations - larger volumes of water may be generally authorised for a specific type of water use or category of water user. These users need to register their use but do not need a licence.
	3 Existing Lawful Use – this allows water use that was lawfully used before the NWA came into effect to continue until it can be converted into a licence using compulsory licensing.
	4 Licensed Water Use – Licences are issued under the NWA, and require approval of an application by the Department of Water and Sanitation.

Appendix 3:

Technical indicator descriptions

Programme 1: Administration

PPI No 3.3.1: Percentage of targeted procurement budget spent on qualifying small enterprises (QSE)

Indicator title	Percentage of targeted procurement budget spent on qualifying small enterprises (QSE)
Short definition	This measures the extent in which the department empowers qualifying small enterprises through the procurement of goods and services in line with the department BBBEE policy.
Purpose / importance	Section 13G(1) of the BBBEE Amendment Act requires government departments to report on their compliance with BBBEE. The departmental policy focuses on procuring goods and services from qualifying small enterprises to support their empowerment.
Source / collection of data	Supply chain database
Method of calculation	If the total procurement from qualifying small enterprises is given the value "x" and the total procurement budget is given the value "y" the formula is as follows: $\gamma\% = \frac{x}{y} \times 100$
Data limitations	Incorrectly categorised / segregated data in SCM system
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	15% targeted procurement budget spent on qualifying small enterprises
Indicator responsibility	Chief Financial Officers: Main Account and Water Trading

PPI No 3.3.2: Percentage of targeted procurement budget spent on exempted micro enterprises (EME)

Indicator title	Percentage of targeted procurement budget spent on exempted micro enterprises (EME)
Short definition	This measures the extent in which the department empowers exempted micro enterprises through the procurement of goods and services in line with the department BBBEE policy.
Purpose / importance	Section 13G(1) of the BBBEE Amendment Act requires government departments to report on their compliance with BBBEE. The departmental policy focuses on procuring goods and services from exempted micro enterprises to support their empowerment.
Source / collection of data	Supply chain database
Method of calculation	If the total procurement from exempted micro enterprises is given the value “x” and the total procurement budget is given the value “y” the formula is as follows: $Y\% = \frac{x}{y} \times 100$
Data limitations	Incorrectly categorised / segregated data in SCM system
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	15% targeted procurement budget spent on exempted micro enterprises
Indicator responsibility	Chief Financial Officers: Main Account and Water Trading

PPI No 4.3.1: Percentage compliance with MPAT standards at the minimum targeted level 3

Indicator title	Percentage compliance with MPAT standards at the minimum targeted level 3
Short definition	This measures the extent in which the department complies with the Management Performance Assessment Tool (MPAT) standards on corporate governance mechanisms.
Purpose / importance	Outcome 12 on “An efficient, effective and development oriented public service and contributes to government’s outcome on service delivery” requires all government departments to comply with all the MPAT standards at level 3.
Source / collection of data	The DPME electronic MPAT system
Method of calculation	If the total number of moderated MPAT standards at level 3 is given the value “x” and the overall number of MPAT standards within a given year is given the value “y” the formula is as follows: $r\% = \frac{x}{y} \times 100$
Data limitations	Data quality / integrity
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	No
Desired performance	100% compliance with MPAT standards at the minimum targeted level 3
Indicator responsibility	Deputy Director-General: Programme Management Unit

PPI No 4.3.2: Percentage expenditure on annual budget

Indicator title	Percentage expenditure on annual budget
Short definition	This measures the extent in which the department spends its appropriated budget within a given financial year.
Purpose / importance	Outcome 12 on “An efficient, effective and development oriented public service and contributes to government’s outcome on service delivery” requires all government departments to spend their appropriated budgets optimally.
Source / collection of data	Financial management system
Method of calculation	If the actual annual budget spent is given the value “x” and the total appropriated budget is given the value “y” the formula is as follows: $r\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	100% expenditure on annual budget
Indicator responsibility	Chief Financial Officer: Main Account

PPI No 4.3.3: Number of debtor days

Indicator title	Number of debtor days
Short definition	This measures the extent in which the department's Water Trading Entity reduces the number of outstanding debt within a given financial year.
Purpose / importance	Outcome 12 on "An efficient, effective and development oriented public service and contributes to government's outcome on service delivery" requires all government departments to address weaknesses in the management.
Source / collection of data	Financial management system
Method of calculation	The formula is as follows: $\text{Debtor days} = \frac{\text{trade debtors}}{\text{Revenue (sales)}} \times \text{number of days in financial year}$
Data limitations	Data accuracy and system availability
Type of indicator	Input
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Reduce the number of debtor days to 100 days
Indicator responsibility	Chief Financial Officer: Water Trading Entity

PPI No 4.3.4: Percentage vacancy rate for engineers and scientists

Indicator title	Percentage vacancy rate for engineers and scientists
Short definition	This measures the extent in which the department maintains the minimum vacancy rate for vacant funded posts in the job category of occupational specific dispensation (OSD) with a particular focus on engineers and scientists
Purpose / importance	Outcome 12 on “An efficient, effective and development oriented public service and contributes to government’s outcome on service delivery” requires all government departments to monitor if their organisational structures are filled with the necessary skills to achieve their mandate.
Source / collection of data	Persal system
Method of calculation	If the number of vacant engineer and scientist positions is given the value “x” and the total number of funded engineer and scientist positions is given the value “y” the formula is as follows: $y\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Achieve and maintain a minimum vacancy rate of 10% in the funded engineer and scientist positions
Indicator responsibility	Deputy Director-General: Corporate Services

PPI No 4.3.5: Percentage of SMS employees attending interventions identified through the DPSA competency assessment

Indicator title	Percentage of SMS employees attending interventions identified through the DPSA competency assessment
Short definition	This measures the extent in which the SMS employees of the department attend the required training interventions that were identified through the DPSA set assessment for SMS levels.
Purpose / importance	Outcome 12 on “An efficient, effective and development oriented public service and contributes to government’s outcome on service delivery” requires all government departments to develop skills and professional ethos by turning every workplace into a training space with a particular focus on on-the-job learning where public servants are adequately supported in order to develop the skills they need during the course of their career.
Source / collection of data	A database of the SMS employees that attended the required training interventions will be maintained
Method of calculation	If the actual number of identified SMS employees that attend is given the value “x” and the total number of identified SMS employees required to attend the training interventions within a given period is given the value “y” the formula is as follows: $Y\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	100% SMS employees attending interventions identified through the DPSA competency assessment
Indicator responsibility	Deputy Director-General: Corporate Services

PPI No 4.4.1: Percentage of the Water and Sanitation Sector Occupations (skills) registered with OFO

Indicator title	Percentage of the Water and Sanitation Sector Occupations (skills) registered with Organising Framework for Occupations (OFO)
Short definition	This monitors the extent in which the standardised Water and Sanitation Sector Occupations (skill) identified in the Water and Sanitation Sector Occupations Framework are registered with the Organising Framework for Occupations (OFO). The registrations can be registered as occupations, or an alternative title or specialisation.
Purpose / importance	Workplace skills plans are developed through Organising Framework for Occupations code system, a sector with clearly defined and code assigned occupations facilitate the availability of such occupations to form part of the water and sanitation sector institutions Workplace Skills Plans and the Sector Skills Plan.
Source / collection of data	A database of the OFO registrations will be maintained
Method of calculation	If the actual number of registered skills with OFO is given the value "x" and the total number of identified skills required for registration is given the value "y" the formula is as follows: $r\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	100% of the Water and Sanitation Sector Occupations (skills) registered with OFO
Indicator responsibility	Deputy Director-General: Corporate Services

PPI No 5.1.1: Number of analyses on progress against the approved annual International Relations Implementation Plan

Indicator title	Number of analyses on progress against the approved annual International Relations Implementation Plan
Short definition	This measures the extent in which the department assesses the implementation of its approved annual International Relations Implementation Plan
Purpose / importance	Outcome 11 on the “Creating a better South Africa, a better Africa and a better world” requires government departments to support the management of international relations and South African foreign policy by developing an international relations programme aligned to the DIRCO priorities.
Source / collection of data	Reports on the progress against the approved annual International Relations Implementation Plan will be developed.
Method of calculation	The document verification includes: <ul style="list-style-type: none">• The approved annual International Relations Implementation Plan (IRIP)• Quarterly analysis reports on the implementation of the annual International Relations Implementation Plan (IRIP)
Data limitations	None
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Conduct 4 analyses on progress against the approved annual International Relations Implementation Plan
Indicator responsibility	Deputy Director-General: International Water Support

PPI No 5.2.1: Annual assessment of the benefits derived from partnership agreement instruments

Indicator title	Annual assessment of the benefits derived from partnership agreement instruments
Short definition	This measures the extent in which the department assesses the benefits derived from partnership agreements
Purpose / importance	To support the department's core business by securing partnerships with private and social partners to further the water and sanitation development agenda whilst also communicating successes, programmes and interventions to address challenges. To further provide platforms for communities to participate in key decisions; voice their concerns and actively contribute to their upliftment, in partnership with government and other key stakeholders.
Source / collection of data	A partnership assessment report will be developed.
Method of calculation	The existence of an annual assessment report of partners and beneficiaries on the benefits derived from the partnership agreement instruments and established partnership working relationships. Minimum requirements of the assessment report: <ul style="list-style-type: none"> • Description of existing and new partnership agreement instruments or partnership relations as well as partnership outputs. • Assessment of the benefits derived, against the objects of the partnership instrument (including the benefits to communities against the benefits to the partner) • Key learnings, scope for improvement, and focus areas for the upcoming period • Planned partnerships for the upcoming period and the benefits sought
Data limitations	None
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	Yes
Desired performance	Conduct a baseline study of benefits derived from partnership agreement instruments
Indicator responsibility	Deputy Director-General: Communications

PPI No 5.2.2: Annual assessment on the implementation of the annual communications programme

Indicator title	Annual assessment on the implementation of the annual communications programme
Short definition	This measures the extent in which the department assesses the implementation of its approved annual communications programme.
Purpose / importance	To support the department's core business by developing and implementing a communications framework in line with the GCIS that covers <i>inter alia</i> media relations, content development, public relations, branding, awareness campaigns, events and conferencing.
Source / collection of data	An annual communications programme will be developed with reports on its implementation developed.
Method of calculation	The document verification includes: <ul style="list-style-type: none">• The approved annual communications framework• Quarterly assessment reports on the implementation of the annual communications framework
Data limitations	None
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Conduct annual assessment on the implementation of the annual communications programme
Indicator responsibility	Deputy Director-General: Communications

PPI No 5.2.3: Assessment of impact of mediated interactions that will deliver meaningful engagements with communities

Indicator title	Assessment of impact of mediated interactions that will deliver meaningful engagements with communities
Short definition	This measures the extent in which the department assesses the impact of mediated interactions that will deliver meaningful engagements with communities
Purpose / importance	To support the department's core business by promoting and facilitating direct communication between government and citizens.
Source / collection of data	Reports assessing the impact of mediated interactions with communities will be developed
Method of calculation	The document verification includes: <ul style="list-style-type: none">• The mediated interactions with communities• Quarterly assessment reports on the impact of mediated interactions with communities
Data limitations	None
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	No
Desired performance	Assess the impact of mediated interactions that will deliver meaningful engagements with communities
Indicator responsibility	Deputy Director-General: Communications

Programme 2: Water Planning and Information Management

PPI No 1.2.1: Adopted water monitoring network implementation plan implemented

Indicator title	Adopted Water Monitoring Network Implementation plan implemented
Short definition	This measures the process of adopting the water monitoring network implementation plan and its subsequent implementation in the nine (9) water management areas. This implementation plan is based on the findings of the review of the existing water monitoring networks that resulted in the development of the water monitoring network strategy.
Purpose / importance	The completed water monitoring network strategy ensures the availability of sufficient information regarding water quality, flow and use by looking at the requirements for monitoring. The implementation plan will be the tool to execute the strategy to achieve optimal monitoring information.
Source / collection of data	Water monitoring network implementation strategy
Method of calculation	The process verification includes: Water monitoring network implementation strategy completed during the 2016/17 financial year Discussion document for consultation in the 9 WMAs Stakeholder consultation in 5 WMAs Stakeholder consultation in 4 WMAs Draft resourced Water Monitoring Network Implementation Plan
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	Complete the draft resourced water monitoring network implementation plan
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 1.2.2: Integrated water quality management strategy

Indicator title	Integrated water quality management strategy
Short definition	This measures the process of developing the integrated water quality management implementation framework.
Purpose / importance	The completed integrated water quality management strategy identified national water quality challenges strategy and recommended mitigation measures. The implementation plan will be the tool to execute the strategy to achieve integrated water quality management nationally.
Source / collection of data	Integrated water quality management strategy
Method of calculation	The process verification includes: <ul style="list-style-type: none">• The completed integrated water quality management strategy completed during the 2016/17 financial year• Monitoring and Evaluation Framework• Integrated Water Quality Management implementation plan
Data limitations	Lack of and / or out-dated information
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	Integrated water quality management strategy implementation plan developed
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 1.3.1: Number of river systems with water resource classes and determined resource quality objectives

Indicator title	Number of river systems with water resource classes and determined resource quality objectives
Short definition	This measures the number of river systems with water resource classes and determined resource quality objectives that provide the status of water quality and quantity, the habitat and biota characteristics of the river.
Purpose / importance	The resource quality objectives are used to balance the need to protect and sustain the water resources with the need to develop and use the water resource.
Source / collection of data	Water resource databases supported by water resource classes gazettes and published resource quality objectives
Method of calculation	This will be the gazetted water resource classes and resource quality objectives for the following river systems: <ul style="list-style-type: none">• Mvoti,• Mzimkulu,• Crocodile (West) Marico,• Mokolo & Matlabas
Data limitations	Lack of and / or out-dated information
Type of indicator	Impact
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	4 river systems with water resource classes and determined resource quality objectives
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 1.3.2: Number of rivers in which the River Eco-status Monitoring Programme is implemented

Indicator title	Number of rivers in which the River Eco-status Monitoring Programme is implemented
Short definition	This monitors the number of river in which the system's ecological health is measured through the implementation of the River Eco-status Monitoring Programme
Purpose / importance	The determination of the eco-status / river health through a number of indicators such as the invertebrates, fish, habitat and vegetation assists in determining areas that need interventions and whose eco-status needs improvement.
Source / collection of data	A database of river eco-status indicators is maintained.
Method of calculation	This will be the number of rivers as specified
Data limitations	Data accuracy / incomplete data
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	71 rivers in which the River Eco-status Monitoring Programme is implemented
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 1.3.3: Number of hydro-climatic zones in which assessments for climate change vulnerability are completed

Indicator title	Number of hydro-climatic zones in which assessments for climate change vulnerability are completed
Short definition	This monitors the hydro-climatic zones that have climate change vulnerability assessments per annum.
Purpose / importance	Subsequent to the completion of the climate change adaptation strategy for the water and sanitation sector in 2014/15, the focus is on assessing the vulnerability of targeted hydro-climatic zones
Source / collection of data	Risk and vulnerability assessment report
Method of calculation	This will be the climate change vulnerability assessments for the following hydro-climatic zones <ul style="list-style-type: none">• Zone 4, the Orange WMA• Zone 1 Northern Interior WMA
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	2 hydro-climatic zones in which assessments for climate change vulnerability are completed
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 1.4.1: Number of large water supply systems assessed for water losses

Indicator title	Number of large water supply systems assessed for water losses
Short definition	This monitors the assessment of water losses in 8 large priority water supply systems.
Purpose / importance	Water conservation and demand management is a key component to the sustainable management of South Africa's scarce water resources and is a key strategic intervention to reconcile water requirements with water availability.
Source / collection of data	Targets for reducing water losses have been set for the major demand centres (e.g. metropolitan and major cities that are mostly the largest water users) within the 8 large water supply systems based on the Municipal Infrastructure Investment Framework (MIIF).
Method of calculation	This will be the large water supply systems assessed for water losses <ul style="list-style-type: none"> • Vaal River, • Umgeni River, • Crocodile West River, • Olifants River, • Algoa, • Amatole, • Bloemfontein and • Western Cape Supply Systems
Data limitations	Non-existence of documents
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	8 large water supply systems assessed for water losses
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.1.1: National Water and Sanitation Master Plan (NWSMP) adopted

Indicator title	National Water and Sanitation Master Plan (NWSMP) adopted
Short definition	This measures the process of developing and adopting National Water and Sanitation Master Plan (NWSMP).
Purpose / importance	National Water and Sanitation Master Plan will support a more coordinated approach to the development of water and sanitation infrastructure (i.e. water resources and water services) planning and monitoring and evaluation.
Source / collection of data	The data source will include but not limited to: <ul style="list-style-type: none"> • National Water Resource Infrastructure strategy • District municipalities (DMs) water and sanitation services master plans • Water Services Development Plans
Method of calculation	The process verification includes: <ul style="list-style-type: none"> • Discussion document for consultation in 4 water management areas (i.e. Mzimvubu-Tsitsikamma, Limpopo, Olifants, and Vaal) • Discussion document for consultation in 5 water management areas (i.e. Orange, Breede-Gouritz, Berg-Olifants, Pongola-Mntamvuna) • Draft national water and sanitation sector agreement • Draft National Water and Sanitation Master Plan
Data limitations	Data accuracy
Type of indicator	Output
Calculation type	Quarterly
Reporting cycle	Non-cumulative
Is it a new indicator?	Amended
Desired performance	Draft National Water and Sanitation Master Plan developed
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.1.2: Number of district municipalities (DMs) with completed 5 year water and sanitation services master plans

Indicator title	Number of district municipalities (DMs) with completed 5 year water and sanitation services master plans
Short definition	This measures the number of district municipalities with completed 5 year water and sanitation services master plans comprising of the following: <ul style="list-style-type: none">• 5 year Reliable Water & Sanitation Service Delivery Implementation Plan framework.• 5 year Reliable Water & Sanitation Service Delivery Implementation Plan.• DM Investment Framework Structure.• DM's Investment frameworks
Purpose / importance	The NDP and MTSF requires that district municipalities should develop Water and Sanitation Service Delivery Master Plans.
Source / collection of data	Water and Sanitation Service Delivery implementation plans
Method of calculation	This will be the listed district municipalities (DMs) with completed 5 year water and sanitation services master plans.
Data limitations	Data accuracy
Type of indicator	Output
Calculation type	Quarterly
Reporting cycle	Non-cumulative
Is it a new indicator?	No
Desired performance	17 district municipalities (DMs) with completed 5 year water and sanitation services master plans
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.1.3: Number of Water Services Authorities (WSAs) audited on water and sanitation delivery performance

Indicator title	Number of Water Services Authorities (WSAs) audited on water and sanitation delivery performance
Short definition	This measures the number of WSAs audited water and sanitation delivery performance against their WSDP delivery standards.
Purpose / importance	Outcome 9 on “Responsive, accountable, effective and efficient local government” requires that society members have access to sustainable and reliable water and sanitation services and through the audit of the 153 WSAs this would ascertained.
Source / collection of data	WSA delivery plans
Method of calculation	This will be the listed of WSAs that will be audited
Data limitations	Data accuracy
Type of indicator	Output
Calculation type	Quarterly
Reporting cycle	Non-cumulative
Is it a new indicator?	No
Desired performance	47 WSAs audited on water and sanitation delivery performance
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.1.4: Number of WSAs assessed for socio-economic impact

Indicator title	Number of WSAs assessed for socio-economic impact
Short definition	This measures the number of WSAs assessed for the socio-economic impact / benefit of the developed infrastructure on the household in line with the CIPD framework approach
Purpose / importance	Outcome 9 on “Responsive, accountable, effective and efficient local government” requires that assess is provided to those with no access or have insufficient access to water supply.
Source / collection of data	Municipal databases on the number of households with access to water supply in terms of the interim or basic water supply.
Method of calculation	This will be the listed WSAs assessed
Data limitations	Data accuracy
Type of indicator	Impact
Calculation type	Quarterly
Reporting cycle	Non-cumulative
Is it a new indicator?	No
Desired performance	127 WSAs assessed for socio-economic impact
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.2.1: Number of completed Record of Implementation Decisions (RID) for bulk raw water planning projects

Indicator title	Number of completed Record of Implementation Decisions (RID) for bulk raw water planning projects
Short definition	This monitors the number of bulk raw water projects under the planning stage with completed Record of Implementation Decisions (RID)
Purpose / importance	This is the final milestone for the planning process before projects are ready for implementation (i.e. design and construction)
Source / collection of data	The existence of a Record of Implementation decision
Method of calculation	These will be the completed Record of Implementation Decisions (RID) for bulk raw water planning projects: <ul style="list-style-type: none">• uMkhomazi Water Project Phase 1• Foxwood Dam Project• Mokolo Crocodile (West) Water Augmentation Project Phase 2A
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	3 completed Record of Implementation Decisions (RID) for bulk raw water planning projects
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.2.2: Number of completed feasibility studies for water and wastewater services projects (RBIG)

Indicator title	Number of completed feasibility studies for water and wastewater services projects (RBIG)
Short definition	This monitors the number of feasibility studies completed for water and wastewater services projects funded through the regional bulk infrastructure
Purpose / importance	This is an essential milestone for the planning of water and wastewater services infrastructure as the project feasibility is assessed.
Source / collection of data	To model different scenarios for the areas data is sourced from various databases inclusive of WMS, HYDSTRA and various departments (e.g. DEA, COGTA, DAFF)
Method of calculation	This will be the number of feasibility studies as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	22 completed feasibility studies for water and wastewater services projects (RBIG)
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 2.2.3: Number of completed implementation readiness studies for water and wastewater services projects (RBIG)

Indicator title	Number of completed implementation readiness studies for water and wastewater services projects (RBIG)
Short definition	This monitors the number of implementation readiness studies completed for water and wastewater services projects funded through the regional bulk infrastructure
Purpose / importance	This is the final milestone for the planning process before projects are ready for implementation (i.e. design and construction)
Source / collection of data	The existence of implementation readiness studies
Method of calculation	This will be the number of implementation readiness studies as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	25 completed implementation readiness studies for water and wastewater services projects (RBIG)
Indicator responsibility	Deputy Director-General: Water Planning and Information Management

PPI No 4.1.1: Approved National Water and Sanitation Resources and Services Strategy (NWSRSS) and implementation plan

Indicator title	Approved National Water and Sanitation Resources and Services Strategy (NWSRSS) and implementation plan
Short definition	This monitors the development National Water and Sanitation Resources and Services Strategy to ensure the integration of the full value chain of water resources, water services and sanitation services.
Purpose / importance	The National Water Act requires a National Water Resources Strategy to be developed every 5-years. The second NWRS edition was approved in 2012; however it excludes much of the sanitation service function. The next edition will thus ensure the full integration of sanitation into the legislated strategy.
Source / collection of data	The existing NWRS and Sanitation Policy and from workshops with various stakeholders
Method of calculation	The means for verification include: <ul style="list-style-type: none">• Draft 1 NWSRSS framework• Stakeholder inputs consolidated into the draft 1 framework• Draft National Water Resources and Services Strategy Framework
Data limitations	None
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Draft National Water Resources and Services Strategy Framework completed
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.1.2: Revised water and sanitation norms and standards for all water and sanitation supply and services

Indicator title	Revised water and sanitation norms and standards for all water and sanitation supply and services
Short definition	This monitors the process of developing and implementing the norms & standards for all level of water supply and sanitation services, to regulate the provision of water supply and sanitation services
Purpose / importance	The revision of norms and standards will provide a framework or model within which the local government can provide efficient, affordable, economical and sustainable access to water supply and sanitation services
Source / collection of data	Existing norms and standards and sanitation policies including draft National Sanitation Policy 2015, Assessment report on Strategic Framework for Water Services, Water Services Act (Act No. 108 of 1997) including the draft Water & Sanitation Bill, National Water Policy 2013 and from workshops with various stakeholders
Method of calculation	This will be the actual output (i.e. approved water supply and sanitation norms and standards published) within the financial year
Data limitations	Stakeholders buy-in
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Approved water supply and sanitation norms and standards published
Indicator responsibility	Deputy Director-General: Water Sector Regulation

Programme 3: Water Infrastructure Development

PPI No 2.3.1: Number of bulk raw water projects ready for implementation

Indicator title	Number of bulk raw water projects ready for implementation
Short definition	This monitors the number of bulk raw water projects packaged as ready for implementation within a given financial year.
Purpose / importance	Subsequent to a RID projects go to the design phase with a number of process issues requiring finalisation prior to construction.
Source / collection of data	<p>The following needs to be in place for a project to be considered as ready for implementation:</p> <ul style="list-style-type: none">• Funding agreements• Guideline for technical implementation• Water use authorization obtained• Mining permit obtained (where relevant)• Tender documents completed and contractor appointments• Project designs
Method of calculation	<p>The following projects will be packaged as ready for implementation:</p> <ul style="list-style-type: none">• Tzaneen• Nwamitwa• Mzimvubu• ORWRDP 2E, 2F• Clanwilliam
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	5 bulk raw water projects ready for implementation
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.2: Number of bulk raw water projects under construction

Indicator title	Number of bulk raw water projects under construction
Short definition	This monitors the number of bulk raw water projects under construction within a given financial year.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained
Method of calculation	The following projects will be under construction: <ul style="list-style-type: none">• Tzaneen• Clanwilliam• Hazelmere• ORWRDP 2D
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	4 bulk raw water projects under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.3: Number of bulk raw water projects completed

Indicator title	Number of bulk raw water projects completed
Short definition	This monitors the number of bulk raw water projects completed within a given financial year.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	When all project construction is finalized the project is handed over for operations and maintenance to deliver water to the targeted recipients. The practical completion certificates that indicate the project is operating will be kept.
Method of calculation	The following project will be completed: • Hazelmere
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	No
Desired performance	1 bulk raw water project completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.4: Number of mega regional bulk infrastructure project phases under construction

Indicator title	Number of mega regional bulk infrastructure project phases under construction
Short definition	This monitors the number of mega water and wastewater services project phases under construction within a given financial year implemented through the regional bulk infrastructure programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the mega regional bulk infrastructure project phases under construction as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	15 mega regional bulk infrastructure project phases under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.5: Number of mega regional bulk infrastructure project phases completed

Indicator title	Number of mega regional bulk infrastructure projects phases completed
Short definition	This monitors the number of mega water and wastewater services project phases completed within a given financial year implemented through the regional bulk infrastructure programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	When all project construction is finalized the project is handed over for operations and maintenance to deliver water to the targeted recipients. The practical completion certificates that indicate the projects are operating will be kept.
Method of calculation	The following projects will be completed: <ul style="list-style-type: none">• Jozini (Pongolapoort) BWS• King Sabata Dalindyebo phase 2 of 2• Sebokeng WWTW phase 1 of 2
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	3 mega regional bulk infrastructure projects phases completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.6: Number of large regional bulk infrastructure project phases under construction

Indicator title	Number of large regional infrastructure project phases under construction
Short definition	This monitors the number of large water and wastewater services project phases under construction within a given financial year implemented through the regional bulk infrastructure programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the large water and wastewater services projects under construction as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	53 regional infrastructure project phases under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.7: Number of large regional infrastructure project phases completed

Indicator title	Number of large regional bulk infrastructure project phases completed
Short definition	This monitors the number of large water and wastewater services project phases completed within a given financial year implemented through the regional bulk infrastructure programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	When all project construction is finalized the project is handed over for operations and maintenance to deliver water to the targeted recipients. The practical completion certificates that indicate the projects is operating will be kept.
Method of calculation	This will be the list as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	26 large regional bulk infrastructure project phases completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.8: Number of small regional bulk infrastructure project phases under construction

Indicator title	Number of small regional bulk infrastructure project phases under construction
Short definition	This monitors the number of small water and wastewater services project phases under construction within a given financial year implemented through the through the regional bulk infrastructure programme
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the small regional bulk infrastructure project phases under construction as specified
Data limitations	None
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	41 small regional bulk infrastructure project phases under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.9: Number of small regional bulk infrastructure project phases completed

Indicator title	Number of small regional bulk infrastructure project phases completed
Short definition	This monitors the number of small water and wastewater services project phases completed within a given financial year implemented through the regional bulk infrastructure programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	When all project construction is finalized the project is handed over for operations and maintenance to deliver water to the targeted recipients. The practical completion certificates that indicate the projects are operating will be kept.
Method of calculation	This will be the small regional bulk infrastructure project phases completed as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	20 regional bulk infrastructure project phases completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.10: Number of small ACIP projects under construction

Indicator title	Number of small ACIP projects under construction
Short definition	This monitors the number of small water and wastewater services projects under construction within a given financial year implemented through the Accelerated Community Infrastructure programme
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the small ACIP projects under construction as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	55 small regional bulk infrastructure projects under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.11: Number of small ACIP projects completed

Indicator title	Number of small ACIP projects completed
Short definition	This monitors the number of small water and wastewater services projects completed within a given financial year implemented through the Accelerated Community Infrastructure programme
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the small ACIP projects completed as specified
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	55 small regional bulk infrastructure projects completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.12: Number of small WSIG projects under construction

Indicator title	Number of small WSIG projects under construction
Short definition	This monitors the number of small water and wastewater services projects under construction within a given financial year implemented through the Water Services Infrastructure Grant
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the small WSIG projects under construction as specified. Due to the misalignment of the financial year between the national and local government spheres, the finalised project list adopted by water service authorities will be provided when the budget is allocated.
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	182 small WSIG projects under construction
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.3.13: Number of small WSIG projects completed

Indicator title	Number of small WSIG projects completed
Short definition	This monitors the number of small water and wastewater services projects completed within a given financial year implemented through the Water Services Infrastructure Grant
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	Subsequent to the design phase the project construction starts with quarterly progress reports maintained.
Method of calculation	This will be the small WSIG projects completed. Due to the misalignment of the financial year between the national and local government spheres, the finalised project list adopted by water service authorities will be provided when the budget is allocated.
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	41 small WSIG projects completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.4.1: Number of dam safety rehabilitation projects completed

Indicator title	Number of dam safety rehabilitation projects completed
Short definition	This monitors the number of dam safety rehabilitation projects completed within a given financial year through the implementation of the dam safety rehabilitation programme.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	When all project construction is finalized the project is handed over for operations and maintenance to deliver water to the targeted recipients. The hand over certificates for completed projects will be kept.
Method of calculation	The following project will be completed: • Roodekoppies dam
Data limitations	None
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	1 dam safety rehabilitation projects completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.4.2: Percentage of projects completed as per AMP aligned maintenance plan (planned maintenance)

Indicator title	Percentage of projects completed as per AMP aligned maintenance plan (planned maintenance)
Short definition	This measures the extent in which the department complies with its planned infrastructure assets maintenance (i.e. civil, electrical and mechanical) as per the asset management plan.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	AMP aligned Maintenance Plan for the financial year
Method of calculation	If the number of completed planned maintenance projects is given the value “x” and the annual number of planned maintenance projects in the AMP is given the value “y” the formula is as follows: $\gamma\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	90% projects completed as per AMP aligned maintenance plan (planned maintenance)
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.4.3: Percentage unscheduled maintenance projects completed as a proportion of planned maintenance projects

Indicator title	Percentage unscheduled maintenance projects completed as a proportion of planned maintenance projects
Short definition	This measures the proportion of unplanned or unscheduled maintenance projects against the planned maintenance projects defined in the AMP, with a view to decrease it over time as the benefits of the planned maintenance schedule are realised.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured. Unplanned or unscheduled maintenance needs will arise as a result of numerous factors beyond the department’s control. However, its proportion against the planned maintenance projects defined in the AMP should decrease over time as the benefits of consistent planned maintenance are realised.
Source / collection of data	AMP aligned Maintenance Plan for the financial year
Method of calculation	If the number of completed unplanned maintenance projects is given the value “x” and the annual number of planned maintenance projects in the AMP is given the value “y” the formula is as follows: $r\% = \frac{x}{y} \times 100$
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	≤10% projects completed
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.4.4: Number of kilometres of conveyance systems rehabilitated per annum

Indicator title	Number of kilometres of conveyance systems rehabilitated per annum
Short definition	This monitors the rehabilitation of water conveyance systems that were identified to be in a state of disrepair.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires that the maintenance and supply availability of the country’s bulk water resources infrastructure, including dams and inter-basin transfers, bulk water reticulation and wastewater systems is ensured.
Source / collection of data	A list of all water conveyance projects (i.e. sections) is maintained and completion reports on maintenance projects by project manager.
Method of calculation	Number of kilometres of conveyance systems that have been rehabilitated during the financial year
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	15 km of conveyance systems rehabilitated
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 3.4.1: Number of job opportunities created through implementing infrastructure projects

Indicator title	Number of job opportunities created through implementing infrastructure projects
Short definition	This monitors the number of direct job opportunities created through implementing water augmentation, water services and dam safety rehabilitation infrastructure projects.
Purpose / importance	Outcome 4 on “Decent employment through inclusive growth” requires that the infrastructure built programmes contribute to the creation of work opportunities to provide short term relief for the unemployed.
Source / collection of data	A list of all created job opportunities is maintained.
Method of calculation	This will be the actual number of job opportunities created. The formula used for targeting the number of job opportunities is as follows: $\text{Direct job opportunities} = \frac{(30\% \text{ of construction budget} - \text{material budget})}{40\,000}$
Data limitations	Data accuracy
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	2 800 job opportunities created through implementing infrastructure projects
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.5.1: Number of existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services per year

Indicator title	Number of existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services per year
Short definition	This monitors the number of existing buckets eradicated in formal settlements and replaced with a basic sanitation facility which is easily accessible to household members, has the necessary operational support for the safe removal of human waste and black and / or grey water from the premises where this is appropriate and necessary, and promotes the communication of good sanitation, hygiene and related practices.
Purpose / importance	Outcomes 8 on “Sustainable human settlements and improved quality of household life” and 9 on “Responsive, accountable, effective and efficient local government” require departments to lay the foundations for sustainable and reliable access to basic services, particularly in weaker municipalities which have the highest unmet demand for basic services.
Source / collection of data	A list of municipalities with existing bucket sanitation systems is maintained
Method of calculation	This will be the number of existing buckets eradicated within the financial year
Data limitations	Data accuracy
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	25 382 existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 2.5.2: Number of rural households served to eradicate sanitation backlogs as per norms and standards

Indicator title	Number of rural households served to eradicate sanitation backlogs as per norms and standards
Short definition	This monitors the number of rural households served through the rural household infrastructure programme to ensure that they have adequate sanitation services that is easily accessible to household members, has the necessary operational support for the safe removal of human waste and black and / or grey water from the premises where this is appropriate and necessary, and promotes the communication of good sanitation, hygiene and related practices.
Purpose / importance	Outcomes 8 on “Sustainable human settlements and improved quality of household life” and 9 on “Responsive, accountable, effective and efficient local government” require departments to lay the foundations for sustainable and reliable access to basic services, particularly in weaker municipalities which have the highest unmet demand for basic services.
Source / collection of data	A list of households served through the rural household infrastructure programme is maintained.
Method of calculation	This will be the number of households served within the financial year
Data limitations	Data accuracy
Type of indicator	Non-cumulative
Calculation type	Quarterly
Reporting cycle	No
Is it a new indicator?	No
Desired performance	10 032 rural households served to eradicate sanitation backlogs as per norms and standards
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 3.2.1: Number of resource poor farmers financially supported to enhance access to water

Indicator title	Number of resource poor farmers financially supported to enhance access to water
Short definition	This monitors the number of resource poor farmers provided with financial subsidies (e.g. for operations and maintenance of waterworks used for irrigation) to implement water related projects within the financial year.
Purpose / importance	This supports outcome 7 on “Vibrant, equitable, sustainable rural communities contributing towards food security for all” by addressing water related and food insecurity challenges especially the emerging black farmers.
Source / collection of data	A list of subsidised resource poor farmers is maintained
Method of calculation	This is the number of resource poor farmers as described in the list that will be consolidated to produce quarterly figures
Data limitations	Data accuracy
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	706 resource poor farmers financially supported to enhance access to water
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 3.2.2: Number of tanks installed to harvest water for food production and other household productive use

Indicator title	Number of tanks installed to harvest water for food production and other household productive use
Short definition	<p>This indicator monitors the number of households in which water tanks will be installed for food production and other household productive uses (e.g. livestock watering, laundry, toilet flushing etc.) per annum.</p> <p>An installed tank should be securely fitted onto a base and have a securely anchored tap that does not leak. In the case where it will be used to harvest rainwater, it is considered installed once it is connected to a gutter with a downpipe.</p>
Purpose / importance	Enhance the provision of water at household level for various household productive uses.
Source / collection of data	A list containing the households where rainwater harvesting tanks are installed is maintained
Method of calculation	This will be the number of households where water tanks are installed.
Data limitations	Data accuracy
Type of indicator	Impact
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	1 500 tanks installed to harvest water for food production and other household productive use
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

PPI No 3.2.3: Number of job opportunities created through the Resource Poor Farmer and Water Harvesting programmes

Indicator title	Number of job opportunities created through the Resource Poor Farmer and Water Harvesting programmes
Short definition	This monitors the number of direct job opportunities created through implementing the resource poor farmer and water harvesting programmes
Purpose / importance	Outcome 4 on “Decent employment through inclusive growth” requires that the infrastructure built programmes contribute to the creation of work opportunities to provide short term relief for the unemployed.
Source / collection of data	A list of all created job opportunities is maintained.
Method of calculation	<p>This will be the actual number of job opportunities created.</p> <p>The formula used for targeting the number of job opportunities is as follows:</p> $\text{Direct job opportunities} = \frac{(30\% \text{ of construction budget} - \text{material budget})}{40\,000}$
Data limitations	Data accuracy
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	247 job opportunities created through the Resource Poor Farmer and Water Harvesting programmes
Indicator responsibility	Deputy Director-General: National Water Resource Infrastructure

Programme 4: Water Sector Regulation

PPI No 1.1.1: Number of wastewater systems assessed for compliance with the Green Drop Regulatory standards

Indicator title	Number of wastewater systems assessed for compliance with the Green Drop Regulatory standards
Short definition	This assesses the performance of wastewater systems owned or managed by water service institutions against the relevant legislations and best practice requirements that have been defined in the Green Drop regulatory standards.
Purpose / importance	Outcome 10 on “Protect and enhance our environmental assets and natural resources” require the protection of water resources. In addition, the intention is to identify and develop the core competencies required by the sector to gradually and sustainably improve the level of wastewater management in the country.
Source / collection of data	Water services databases, water service authorities databases, accredited laboratories
Method of calculation	This will be the number of wastewater systems assessed as specified.
Data limitations	Lack of and / incomplete data
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	No
Desired performance	963 wastewater systems assessed for compliance with the Green Drop Regulatory standards
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.2: Number of non-compliant wastewater systems monitored against the Green Drop Regulatory tool

Indicator title	Number of non-compliant wastewater systems monitored against the Green Drop Regulatory tool
Short definition	This is the monitoring of the wastewater systems owned or managed by water service institutions that were found to be non-compliant.
Purpose / importance	Outcome 10 on “Protect and enhance our environmental assets and natural resources” require the protection of water resources. In addition, the intention is to identify and develop the core competencies required by the sector to gradually and sustainably improve the level of wastewater management in the country.
Source / collection of data	Green Drop system and reports
Method of calculation	This will be the number of wastewater systems assessed as specified.
Data limitations	Lack of and / incomplete data
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	260 non-compliant wastewater systems monitored against the Green Drop Regulatory tool
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.3: Number of water supply systems assessed for compliance with Blue Drop Regulatory standards

Indicator title	Number of water supply systems assessed for compliance with Blue Drop Regulatory standards
Short definition	This assesses the performance of water supply systems owned or managed by water service institutions for compliance with the South African National Standard 241 drinking water quality standards.
Purpose / importance	Enhancing the regulation of water services authorities in the provision of basic water supply.
Source / collection of data	Water services databases, water service authorities databases, accredited laboratories
Method of calculation	This will be the number of water supply systems assessed as specified.
Data limitations	Lack of and / incomplete data
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	No
Desired performance	1 036 water supply systems assessed for compliance with Blue Drop Regulatory standards
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.4: Number of non-compliant water supply systems monitored against the Blue Drop Regulatory tool

Indicator title	Number of non-compliant water supply systems monitored against the Blue Drop Regulatory tool
Short definition	This is the monitoring of the water supply systems owned or managed by water service institutions that were found to be non-compliant
Purpose / importance	Enhancing the regulation of water services authorities in the provision of basic water supply
Source / collection of data	Blue Drop system and reports
Method of calculation	This will be the number of water supply systems assessed as specified.
Data limitations	Lack of and / incomplete data
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	250 non-compliant water supply systems monitored against the Blue Drop Regulatory tool
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.5: Number of dams evaluated for compliance with dam safety regulations by Approved Professional Persons (APPs)

Indicator title	Number of dams evaluated for compliance with dam safety regulations by Approved Professional Persons (APPs)
Short definition	<p>This is the monitoring of the dam safety evaluations by Approved Professional Persons (APP) on behalf of dam owners as required by Dam Safety Regulation 35 (1) of Government Notice R.139 of 24 February 2012.</p> <p>The regulations allow for an interval of between five (5) and ten (10) years depending on the dam condition, with an average interval of 7.5 years deemed acceptable.</p> <p>Dam owners are given a buffer period (i.e. grace period) of nine (9) months from the inspection date to submit the reports to the Department regardless of the financial year. Therefore, the date of receipt is the basis for reporting the number of dams evaluated.</p>
Purpose / importance	Monitoring the safety of dams for the protection of the population, the economy and water resources as they contribute to the equitable provision of water supply in the country.
Source / collection of data	A Dam Safety Office database contains a record of all instructions, target dates, dates received, dates accepted, registration and classification details.
Method of calculation	<p>This will be the number of dam safety evaluations report received from APPs.</p> <p>Although the provided list contains 496 dams that are due for evaluations/inspections, the previous trend is 50% of the identified evaluations occur during a financial year owing to limited number of APPs and very high inspection costs. The department has therefore targeted to receive 32% (i.e. 160 of 496) from the identified list.</p>
Data limitations	Data completeness owing to limited number of APPs and very high inspection costs
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	160 dams evaluated for compliance with dam safety regulations by Approved Professional Persons (APPs)
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.6: Number of water users monitored for compliance

Indicator title	Number of water users monitored for compliance
Short definition	This monitors the compliance of water users (within the public, mining, industrial, agricultural and forestry sectors) with legislation, standards, water use entitlements and regulations.
Purpose / importance	Enhancing the protection of water resources and reducing illegal activities that impact on the health of aquatic ecosystems
Source / collection of data	Water use entitlements and compliance inspection reports
Method of calculation	<p>This is the actual number of water users compliance evaluations conducted within the financial year.</p> <p>Though specific water users are targeted, operational needs may see deviations from water users selected for inspection (i.e. substitutions)</p>
Data limitations	Data completeness and access to water users information
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	384 water users monitored for compliance
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.7: Number of water management institutions monitored for compliance with own water use entitlements and effective monitoring of affiliated water users

Indicator title	Number of water management institutions monitored for compliance with own water use entitlements and effective monitoring of affiliated water users
Short definition	<p>This monitors compliance of water management institutions with their own water use entitlements and how well they perform their regulatory compliance function of ensuring that their affiliated members comply with their water use entitlements.</p> <p>Some water management institutions have water use entitlements issued to themselves in addition to member's water use entitlements.</p>
Purpose / importance	The department has an oversight responsibility to verify that its institutions(e.g. CMAs and water user associations) are performing their compliance function as these WMIs represent a significant number of users.
Source / collection of data	Water use entitlements, inspection reports, 1956 Act and water management institution's constitution.
Method of calculation	This will be the actual number of WMI monitoring reports within the financial year.
Data limitations	One report with multiple users. Report will not reflect in detail individual users performance but will highlight where in-depth auditing might be required
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	31 monitored for compliance with own water use entitlements and effective monitoring of affiliated water users
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.1.8: Percentage of reported non-compliant cases investigated

Indicator title	Percentage of reported non-compliant cases investigated
Short definition	This monitors the actions taken by the department to control unlawful water use through criminal, administrative and civil enforcement.
Purpose / importance	It is essential that actions are taken by the Department to achieve compliance within the regulated community to correct or terminate conditions that put at risk the environment or the public's health.
Source / collection of data	Case Management System, cases reported, compliance monitoring reports and the outcomes of Verification and Validation projects
Method of calculation	If the number of reported cases and routine investigations is given the value "x" and the number of investigated cases is given the value "y" the formula is as follows: $Y\% = \frac{x}{y} \times 100$
Data limitations	Lack of regulations, lack of understanding of the legislation by enforcement agencies.
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	80% of reported non-compliant cases investigated
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.5.1: Number of Water Management Areas assessed for Acid Mine Drainage (AMD)

Indicator title	Number of Water Management Areas assessed for Acid Mine Drainage (AMD)
Short definition	This is an assessment of water management areas with mines having a potential to generate AMD
Purpose / importance	To determine the potential of pollution to water systems emanating from mines in specific WMAs, in support of Outcome 10 that requires ecosystems to be sustained and natural resources are used efficiently. In addition, to mitigate the negative environmental impacts in exploitation of mineral resources.
Source / collection of data	Site inspections conducted by the regional offices or catchment management agencies within a WMA
Method of calculation	The Crocodile (West)-Limpopo WMA (i.e. platinum mines having a potential to generate AMD) will be assessed
Data limitations	Not all mines are on a database and some mines are ownerless
Type of indicator	Output
Calculation type	Cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	1 WMA assessed for Acid Mine Drainage (AMD)
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.5.2: Number of Water Management Areas in which mitigation strategies for potential AMD are developed

Indicator title	Number of Water Management Areas in which mitigation strategies for potential AMD are developed
Short definition	This monitors the development of mitigation strategies for WMAs in which potential AMD has been identified.
Purpose / importance	To protect the environmental critical level (ECL) within the assessed WMA in support of Outcome 10 that requires ecosystems to be sustained and natural resources are used efficiently. In addition, to mitigate the negative environmental impacts in exploitation of mineral resources. The mitigation measures are critical to ensuring water quality standards as set by the Department are achieved.
Source / collection of data	Site inspections conducted by the regional offices or catchment management agencies within a WMA
Method of calculation	This will be the Inkomati-Usutu WMA mitigation strategy
Data limitations	Insufficient water quality data as some mines are ownerless
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	1 WMA in which mitigation strategy for potential AMD developed
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.5.3: Completion of the Witwatersrand AMD long term project

Indicator title	Completion of the Witwatersrand AMD long term project
Short definition	This monitors the completion of the implementation plan for the AMD long term solution in the Witwatersrand
Purpose / importance	The successful implementation of the long term solution of AMD in the Witwatersrand will ensure the protection of the Vaal River system.
Source / collection of data	A project implementation plan will be developed with milestones for completing the project
Method of calculation	This will be the Record of Decision
Data limitations	Data completeness
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	EIA completed (i.e. Record of Decision issued)
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 1.5.4: Mine water management technologies assessed

Indicator title	Mine water management technologies assessed
Short definition	This monitors the assessment of mine water technologies (including innovative technologies) for optimising treatment of mine water.
Purpose / importance	The optimisation and reduction of costs in the treatment of mine water nationally
Source / collection of data	A database of potential mine water treatment technologies
Method of calculation	<p>The following technologies will be assessed</p> <ul style="list-style-type: none">• Ettrimgite process• Pacques process• Savmin process• Electrocoagulation• Biosure process
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Yes
Desired performance	Assessment of 5 AMD treatment technologies
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 3.1.1: Percentage of applications for water use authorisation finalised within 300 days

Indicator title	Percentage of applications for water use authorisation finalised within 300 days
Short definition	This monitors the extent in which the department finalises applications for water authorisations within the 300 days of receipt of a complete application.
Purpose / importance	It is essential to monitor the water use authorisations applications to enable socio-economic development and water resource management.
Source / collection of data	A list of water use licence applications is maintained
Method of calculation	If the actual number of applications for water use authorisation finalized within 300 days is provided the value "x" and the total number of received applications acknowledged as complete that should be finalized within 300 days is given the value "y" the formula is as follows: $Y\% = \frac{x}{y} \times 100$ Water use authorisation applications received from 17 May 2015 form part of the reporting cycle. <i>Exclusion: The period 15 December to 05 January in any given financial year is excluded from the 300 days as the department is inactive.</i>
Data limitations	Data accuracy
Type of indicator	Outcome
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	80% of complete applications for water use authorisation finalised within 300 days
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.1: Number of public entities annually assessed

Indicator title	Number of public entities annually assessed
Short definition	This monitors the number public entities annually assessed for alignment with the department's strategic goals.
Purpose / importance	To enable effective performance across the water and sanitation sector, shareholder compacts are to be developed with each public entity.
Source / collection of data	Shareholder compacts, business / corporate plans
Method of calculation	This is the actual number of performance assessments conducted
Data limitations	None
Type of indicator	Output
Calculation type	Non-cumulative
Reporting cycle	Annual
Is it a new indicator?	Amended
Desired performance	<p>13 annual performance assessments conducted on all public entities</p> <ul style="list-style-type: none"> • 9 water boards • 2 CMAs • TCTA • WRC
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.2: National Water Infrastructure Agency established

Indicator title	National Water Infrastructure Agency established
Short definition	This indicator monitors the process of developing institutional arrangements for the establishment of a National Water Infrastructure Agency
Purpose / importance	Outcome 6 on "An efficient, competitive and responsive economic infrastructure network" requires the establishment of a National Water Resources Infrastructure Agency to coordinate the funding and development of water infrastructure, as well as enhancing the operations and maintenance thereof.
Source / collection of data	A concept note for the establishment of a National Water Infrastructure Agency.
Method of calculation	This will be the actual output (i.e. Due diligence report for the establishment of the National Water Infrastructure Agency) within the financial year
Data limitations	None
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	Due diligence for the establishment of the National Water Infrastructure Agency finalised
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.3: Number of Catchment Management Agencies gazetted for establishment

Indicator title	Number of Catchment Management Agencies gazetted for establishment
Short definition	This indicator monitors the process of establishing that will assist in the management of water resources at catchment level and enhance stakeholder participation.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires finalising the institutional arrangements for the management of water resources.
Source / collection of data	An approved business plan for the establishment of 9 CMAs
Method of calculation	This will be the actual CMAs gazetted for establishment within the financial year
Data limitations	None
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	3 Catchment Management Agencies gazetted for establishment <ul style="list-style-type: none">• Berg Olifants• Mzimvubu-Tsitsikamma• Orange
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.4: Number of regional water and wastewater utilities gazetted for establishment

Indicator title	Number of regional water and wastewater utilities gazetted for establishment
Short definition	This indicator monitors the transitional institutional arrangements between the existing water boards and the proposed regional water utilities.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires finalising the institutional arrangements for the management of water resources. This allows for an interface between the phasing out of existing water boards and the evolution of the regional water utilities.
Source / collection of data	Approved institutional reform and realignment document
Method of calculation	This will be the due diligence report for the KwaZulu-Natal proto-regional water utility
Data limitations	None
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Due diligence for the KwaZulu-Natal proto-regional water utility developed
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.5: Water economic regulator established

Indicator title	Water economic regulator established
Short definition	This monitors the process for establishing an economic regulation institution for the water sector
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires finalising the institutional arrangements for the management of water resources. This institution will regulate water tariffs and thus enhance the country’s economic development and ensure affordable, effective and sustainable water services.
Source / collection of data	Due diligence reports, stakeholder consultation report.
Method of calculation	This will be the actual output (i.e. Business case for the establishment of the independent economic regulator approved) within the financial year
Data limitations	Stakeholder buy-in
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Amended
Desired performance	Approved business case for the establishment of the independent economic regulator
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.6: Water tariffs in the value chain approved

Indicator title	Water tariffs in the value chain approved
Short definition	This measures the process of adopting the raw water charges and bulk water tariffs.
Purpose / importance	Outcome 6 on “An efficient, competitive and responsive economic infrastructure network” requires finalising the institutional arrangements for the management of water resources. This institution will regulate water tariffs and thus enhance the country’s economic development and ensure affordable, effective and sustainable water services.
Source / collection of data	Stakeholder consultation reports.
Method of calculation	The verification process includes <ul style="list-style-type: none">• Approved 2018/19 raw water charges• Approved 2018/19 bulk water tariffs tabling to Parliament
Data limitations	Stakeholder buy-in
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	Yes
Desired performance	Raw water charges and bulk tariffs approved
Indicator responsibility	Deputy Director-General: Water Sector Regulation

PPI No 4.2.7: Water pricing regulations implemented

Indicator title	Water pricing regulations implemented
Short definition	This measures the monitoring of the pricing strategy and norms & standards that will strengthen the water management in the country.
Purpose / importance	The revised water pricing strategy provides for the efficient and cost effective equitable allocation of water in the country. The norms and standards form the basis for the required levels of achievement.
Source / collection of data	Current tariff pricing databases, the existing pricing strategy and consultation with stakeholders.
Method of calculation	The verification process includes <ul style="list-style-type: none">• Awareness campaign on the approved pricing strategy and norms & standard• Monitoring the implementation of the approved revised pricing strategy as well as norms and standards during the determination of the 2018/19 raw water charges and bulk water tariffs• Evaluation of the revised pricing strategy
Data limitations	None
Type of indicator	Process
Calculation type	Non-cumulative
Reporting cycle	Quarterly
Is it a new indicator?	No
Desired performance	Pricing strategy and norms & standards monitored
Indicator responsibility	Deputy Director-General: Water Sector Regulation

Appendix 4:

Additional details for programme performance indicators

Programme 2: Water Planning and Information Management

PPI No 1.3.2: Number of rivers in which the river eco-status monitoring programme is implemented

PROTO-CMA	NO	NAMES	FREQUENCY OF MONITORING

PPI No 2.3.10 and PPI No 2.3.11: Number of small ACIP projects under construction and completed

Water Conservation and Demand Management				
District Munic.	WSA funded.	Project Name	Project Description	Budget
Eastern Cape				
EC1506-Sunday River Valley	Sundays river Local municipality	Sundays River WCDM	The project entails the implementation of water conservation and demand management systems in the Moses Mabida, Emsengeni, Aqua Park and Bergsig township areas in Kirkwood which are currently experiencing massive potable water losses through leaking water reticulation pipework and housing internal fittings and toilets.	5 630 100
SEC1401-Makana	Makana LM	Makana WCDM	The proposed infrastructure investments are aimed at addressing the shortcomings identified by the MLM Waterloss Programme. This will be instrumental in improving the capacity and ability of the Municipality to deliver water and sanitation services. (This project is aimed at addressing the water loss and water demand challenges within the WSA and hence further funding is therefore required to carry on with the work being done on the Grahamstown reticulation system and to repair the ailing network in Aicedale, Riebeeck East, Seven Fountains and Fort Brown in order to significantly reduce the water loss over time and to substantially increase the revenue stream of the MLM.)	5 300 000
EC1416-Ndlambe	Ndlambe Local Municipality	Ndlambe WCDM	The project builds on the initial successful work done by the Ndlambe Municipality towards reducing its high physical water losses and billing losses (together make up 40%). The Project aims to assess and install zonal water infrastructure, consumer , meter replacement, meter reading and billing verification as well as a GIS-based system to facilitate accurate regular Zonal Water Balance calculation in an effort to effectively manage this critical resource. The project further includes the additional utilisation of some of the Community "Barefoot" Plumbers trained under the ACIP Phases 1 to 3 of the Waterloss Programme, to supplement the Municipality's internal resources. This is a phased approach towards effective water resource management.	4 475 000
Sub-Total: Eastern Cape				15 405 100

Water Conservation and Demand Management				
District Munic.	WSA funded.	Project Name	Project Description	Budget
Free State				
FS1608-Mafube	Mafube LM	Mafube WCDM	Water conservation and water demand management (WC/WDM) is concerned with four primary components in the water management cycle, Water Resource Conservation, Water distribution, Consumer Demand Management and return Flow Management. The Municipality does not have a business plan which implies that the municipality does not know its status of water demand management.	4 000 000
Sub-Total: Free State				4 000 000
Gauteng				
GP1604-Lesedi	Lesedi LM	Lesedi WCDM	Zone metering, Sectorisation, Night flow analysis, Pressure Management, Advance pressure management, install Consumer metering audit/ meter replacement, Valve audit/replacement, Leak detection & repair, fixing network leaks & Leak repair on private properties	5 500 000
GP1603-Merfong	Merfong LM	Merfong WCDM	Relocate of midblock water pipelines to road reserves in Kokosi 4km, 90mm HDPE class 12 pipe: 2) Installation of 25mm HDPE pipe & provide approximately 1500 house connection and accessories; 3) Stand Disbursement(Geotechnical services, Surveying, Health & Safety services & full time resident Engineer.	4 000 000
Sub-Total: Gauteng				9 500 000
Northern Cape				
NC1602-Magareng	Magareng LM	Magareng WCDM	WCDM: Magareng Water Conservation and Demand Management intervention	5 000 000
Sub-Total: Northern Cape				5 000 000
TOTAL: Water Conservation and Demand Management (WCDM)				33 905 100

WATER SUPPLY				
District Munic.	Local Munic.	Project Name	Project Description	Budget
Eastern Cape				
Sarah Baartman	Dr. Brewer Naude Municipality	Waterford Community Water Supply	The project will entail the refurbishment of the bulk water supply systems of the towns of Waterford and Wolwefontein.	1 815 000
Sarah Baartman	Blue Crane Route Local Municipality	Blue Crane Route Community Water Supply	Pearston relies entirely on groundwater (borehole) for water supply and four boreholes were recently developed but only two were equipped and connected to the water supply. However, the entire raw water supply is dependent on power for abstraction with gravitational supply to most of Pearston. It is critical that the two boreholes be connected and back-up power is provided to ensure sustainable water supply.	2 361 600
Sarah Baartman	Blue Crane Route Local Municipality	Blue Crane Route Community Water Supply	This project will focus refurbishing the Bestershoek WTW, reservoir and water line to ensure reliable, constant water provision to BCRM households and businesses. This is necessary to also reduce the over reliance on Orange fish WTW which during peak season struggles to keep up with demand. The project will also focus on refurbishing the Somerset East boreholes which will also contribute towards Somerset East water supply system.	2 860 000
Sub-Total: Eastern Cape				7 036 600
Free State				
FS1403-Letsemeng	Letsemeng Local Municipality	Letsemeng Community Water Supply	The project will be focused on elevating the sewer spillage of Jacosdal Town at the hot spot area, The pipeline will be connected also the residence along its route	577 000
FS1403-Letsemeng	Letsemeng Local Municipality	Letsemeng Community Water Supply	The project will be replacing the old AC pipes with the steel pipes, This project has been identified as an emergency project in the master plan, Increasing the pipe size from 200mm to 250mm will be done to accommodate the current and future inflow to the plant	2 856 000
FS1609-Mafube WS (Namahadi)	Mafube Local Municipality	Mafube Community Water Supply	Name of project: Construction of Rising main from Frankfort water purification works to reservoir in Namahadi	3 500 000
FS1505-Vrede	Phumelela Local Municipality	Phumelela Community Water Supply	Phumelela Local municipality in Vrede consists of three sections namely Vrede, Thabalihle and extension 4, Up to 4610 households are using one sewer pump station, causing the downstream manhole to block. It is hygienically unhealthy for the community that lives there to use toilets, streets and yards as waste overflow	5 500 000

WATER SUPPLY				
District Munic.	Local Munic.	Project Name	Project Description	Budget
FS1610- Mafube WS (Tweeling)	Mafube Local Municipality	Mafube Community Water Supply	The project seeks to ensure water supply security and sustainability throughout the three (3) towns of Frankfort , Tweeling and Cornelia. There are currently sporadic interruptions in the water supply and this must be avoided at all cost.	3 530 000
Sub-Total: Free State				15 963 000
Mpumalanga				
	Victor Khanye Local Municipality	Delmas Water supply and Water conservation demand and demand management	Development of a comprehensive and demand strategy , mapping of existing water reticulation networks. Development of an accurate and real time water balance by installing flow meters and electronic loggers in fifteen boreholes and twenty two boreholes located both in rural and urban areas respectively	5 000 000
Sub-Total: Mpumalanga				5 000 000
Northern Cape				
NC1606- Emthanjeni	Emthanjeni Local Municipality	Emthanjeni Community Water Supply	ACWS: Refurbishment of non- functional boreholes in De Aar	5 000 000
NC1601- Siyathemba	Siyathemba	Siyathemba Community Water Supply	ACWS: Water Backlock for Siyathemba Municipality (Priesk WTW)	2 800 000
Sub-Total: Free State				7 800 000
Limpopo				
LP1405- Tshilidzini	Vhembe DM	Tshilidzini Community Water Supply	Installation of borehole pumping main,boreholes pumps, storage and booster pumps.	5 500 000
Sub-Total: Limpopo				5 500 000
North West				
NW1603- Ventersdorp	Ventersdorp	Ventersdorp Water Community Supply	The objection of this project is to refurbish 1. Boreholes equipment and pump houses for villages under Ventersdorp LM, 2. the water supply networks in the villages including communal standpipes and elevated resevoirs , the client is Ventersdorp ton council, the conasultants are Rinka Africa and th contractor is Lese trading and projects.	6 000 000
Sub-Total: North West				6 000 000
Western Cape				
	George	George Community Water Supply	This project involves installing of new water meters in which to more accurate measurements towards various types of water losses.	4 500 000

WATER SUPPLY				
District Munic.	Local Munic.	Project Name	Project Description	Budget
WC1606-Laingsburg	Laingsburg	Laingsburg Community Water Supply	The project involves the replacement of Asbestos Cement pipes and consumer connections in Laingsburg.	330 000
WC1504-Kannaland	Kannaland LM	Kannaland Community Water Supply	This project includes the upgrade of the existing 150mm diameter asbestos cement pipe by replacement with a 315mm diameter PVC-U	4 827 000
	Mossel Bay LM	Mossel Bay Community Water Supply	Replacement of seven reservoir outlet meters found to be defective or in poor condition; installation, commissioning and optimization of 5 new pressure reducing valves; installation and commissioning of 3 new district metering areas; maintenance, refurbishment, commissioning and optimization of 7 existing defective pressure reducing valves and change out of 16 consumer meters listed under the Top 100 consumers found to have anomalies.	5 204 000
Sub-Total: Western Cape				14 861 000
TOTAL FOR WATER SUPPLY				62 160 600

WASTE WATER TREATMENT WORKS				
District Munic.	Local Munic.	Project Name	Project Description	Budget
EC1416-Ndlambe	Ndlambe Local Municipality	Ndlambe WWTW	The project will include refurbishment of various critical sewer pump stations in Ndlambe with the installation of self priming sewer pumps. Critical upgrading of the Marselle Sewer Pumping System is also needed in order to cater for the increased hydraulic load on the pump station.	4 730 000
	Nkonkobela Local Municipality	Nkonkobela WWTW	The project will entail the installation of new and refurbishment of existing aboveground sewerage pumps, electrical equipment and delivery pipe work in four pump stations in Jeffrey's Bay and Hankey. New standby generator will also be installed to accommodate electrical supply interruptions at the Centerton Pump Station and the building infrastructure will be refurbished. Further to this, a section of sewer pipeline in Oceanview township needs to be replaced.	3 253 000
EC1501-Kouga	Kouga Local Municipality	Kouga WWTW	The project will entail the installation of new and refurbishment of existing aboveground sewerage pumps, electrical equipment and delivery pipe work in four pump stations in Jeffrey's Bay and Hankey. New standby generator will also be installed to accommodate electrical supply interruptions at the Centerton Pump Station and the building infrastructure will be refurbished. Further to this, a section of sewer pipeline in Oceanview township needs to be replaced.	5 000 000
	Dr. Beyer Naude Municipality	Dr Beyer Naude WWTW	The non-compliance of the Rietbron WWTW with the requirements of the National Water Act necessitates the refurbishment of the works. The refurbishment will involve the construction of the following: Inlet works with mechanical screens, discharge facility for the waste collection vehicle, flow measurement, anaerobic pond, sludge drying beds, lining of ponds, discharge of final effluent for irrigation and rehabilitation of security fence.	5 000 000
EC1502-Koukamma	Koukamma Local Municipality	Koukamma WWTW	Refurbishment of Tweereviree WWTW project basically aims at restoring the WWTW to its operational stage and redesign of few components to meet the Green Drop requirements. The scope of the project will include redesigning of the inlet works for effective operations; installation of effective flow measuring meters on the inlet and outlet; desludging the non-operational primary settling tank; replacing of the worn-out pumps; desludging of humus tanks & biofilter pumps sump; restoration of the emergency ponds & sludge lagoons; installation of chlorination system.	3 058 000
Sub-Total: Eastern Cape				21 041 000

WASTE WATER TREATMENT WORKS				
District Munic.	Local Munic.	Project Name	Project Description	Budget
Free State				
FS1606-Kopanong	Kopanong Local Municipality	Kopanong WWTW	The Project entails the upgrade of the plant in general and the refurbishment and/or replacement of critical elements in the treatment process i.e installation of mechanical waste screen, water flow meters etc and refurbishment of pump sets , drive drains ,electrical intrument panel board, Bio filter pivot (Centre Column & Spray arms) sedimentation tank inlet Stilling Chamber & Scum baffles chemical dozing plant/ room & equipment , O & M Manuals etc to name but few	5 000 000
FS1611-Moqhaka	Moqhaka Local Municipality	Moqhaka WWTW	The state pum station at Viljoenskroon sewer tranfer pump station is a bad state. The pump station were designed to accommodate less population but since the population has increased then the pump station are not coping with the flow. The small capacity of this pump station needs to be fixed so that the WWTW can get sewege for treatment unlike now where the raw sewer is not reaching WWTW for treatmeent	3 500 000
FS1606-Kopanong	Mantsopa Local Municipality	Mantsopa WWTW	Refurbishment of Exlsior water treatment packeage plant, The plant frequently break resulting in shortage of water supply. The various process unit the plant requires urgent to be fixed and concerrted efforts from all stakeholders is therefore needed to rectify this dire situatio.	2 930 000
FS1502-Theunissen	Masilonyana Local Municipality	Masilonyana WWTW	The istalled equipment needs reticulation in order for the plant to function. The scope of works involved refurbisement of the damaged pumps and motors, repair the mechanical screen, Grit Classifier, bloer snd screw conveyor. replacement of motor control centres and replacements of damaged cables . Supply and installation on the chlorination system and refurbish the sedimentation tanks, repairing and refurbishment the aerator , supplying and installation of inflow and outflow meter.	2 996 500
FS1505-Vrede	Phemelela Local Municipality	Phumelela WWTW	Water Treatment Works in Vrede - Thembalihle and Memel - Zamani need attention for refurbishment as it is th main component of our Municipality to purify the water for the community	5 430 000
	Mohokare Local municipality	Mohokare WWTW	The Project deals with the refurbishment of the wastewater pump sattion that are located in Zastron especially the Matlekeng Township. This project will be implemented on a total number of three (3) Pump stations	2 699 000
Sub-Total: Free State				22 555 500

Notes on changes to 2016/17 indicators

- i The previous 2016/17 indicator was revised from "Minimum percentage vacancy rate for engineers and scientist" to "Percentage vacancy rate for engineers and scientists"
- ii The previous 2016/17 indicator was revised from "Percentage of SMS and MMS employees assessed against DPSA set competencies" to "Percentage of SMS employees attending interventions identified through the DPSA competency assessment" to factor in training interventions.
- iii The previous 2016/17 indicator was revised from "Approved standardised water and sanitation sector occupations framework implemented" to "Percentage of water and sanitation sector occupation (skills) registered with OFO" to factor in the activities after the framework has been finalised.
- iv The previous 2016/17 indicators on "Water monitoring network implementation strategy completed" and "Water monitoring network implementation strategy implemented in prioritised catchment areas" were consolidated to "Adopted water monitoring newtwork implementation plan implemented".
- v The previous 2016/17 indicators on "Integrated water quality management strategy completed" and "Number of prioritised integrated water quality management interventions implemented in catchment areas" have been consolidated to "Integrated Water Quality Management strategy".
- vi The previous 2016/17 indicator on "National Water and Sanitation Master Plan completed" has been amended to factor in the development and addition of the master plan.
- vii The previous 2016/17 indicator on "Number of mega water and wastewater services projects under construction" has been amended to "Number of mega regional bulk infrastructure project phases under construction".
- viii The previous 2016/17 indicator on "Number of mega water and wastewater services projects completed" has been amended to "Number of mega regional bulk infrastructure project phases completed".
- ix The previous 2016/17 indicator on "Number of large water and wastewater services projects under construction" has been amended to "Number of large regional bulk infrastructure project phases under construction".
- x The previous 2016/17 indicator on "Number of large water and wastewater services projects completed" has been amended to "Number of large regional/bulk infrastructure project phases completed".
- xi The previous 2016/17 indicator on "Number of small water and wastewater services projects under construction" has been disaggregated into 3 indicators to align with the new sub-programmes in the revised budget structure namely "Number of small regional bulk infrastructure project phases under construction", "Number of small ACIP projects under construction" and "Number of small WSIG projects under construction".
- xii The previous 2016/17 indicator on "Number of small water and wastewater services projects completed" has been disaggregated into 3 indicators to align with the new sub-programmes in the revised budget structure namely "Number of small regional bulk infrastructure project phases completed", "Number of small ACIP projects completed" and "Number of small WSIG projects completed".
- xiii The previous 2016/17 indicator on "Number of existing bucket sanitation systems in formal settlements replaced with adequate sanitation services per year" has been amended to "Number of existing bucket sanitation backlog systems in formal settlements replaced with adequate sanitation services per year".
- xiv The previous 2016/17 indicator on "Approved National Asset Management Plan" has been incorporated in "Percentage of projects completed as per the AMP aligned maintenance plan (planned maintenance)" as the National Asset management plan was approved during the 2016/17 financial year.

- xv The previous 2016/17 indicator on "Number of water management institutions monitored for effective compliance monitoring of affiliated water users" to "Number of water management institutions monitored for compliance to own water use entitlements and effective monitoring of affiliated water users" as some WMIs have entitlements issued directly to them as corporates with members also having their own entitlements.
- xvi The previous 2016/17 indicator on "Number of catchments assessed for Acid Mine Drainage (AMD)" has been amended to "Number of WMAs assessed for Acid Mine Drainage (AMD)".
- xvii The previous 2016/17 indicator on "Number of catchments in which mitigation strategies for potential AMD are developed" has been amended to "Number of WMAs in which mitigation strategies for potential AMD are developed"
- xviii The previous 2016/17 indicator on "Number of annual performance assessments conducted on all DWS public entities" has been amended to "Number of public entities annually assessed" to change it from an activity to an output.
- xix The previous 2016/17 indicator on "Establishment of a National Water Infrastructure Agency" has been amended to "National Water Infrastructure Agency established" to change it from an activity to an output.
- xx The previous 2016/17 indicator on "Establishment of Water Economic Regulator" has been amended to "Water Economic Regulator established" to change it from an activity to an output.
- xxi The previous 2016/17 indicators on "Inter/intra-governmental structures established for mine water management governance" and "Mine water management coordinating bodies established per catchment" have been moved to the programme operational plan. A new indicator on "Mine water management technologies assessed" has been introduced.
