

Headline Statistics

* The total daily water usage is the total water provided by the City of Cape Town and includes water provided to Stellenbosch and Drakenstein Municipalities

** The average per person water use is the average for the City of Cape Town only and is estimated as Total Water Use / Population. Summer demands are expected to be higher than the yearly average due to the increased use of water for outdoor irrigation. Average water use per person over the last 12 months was approximately 160 l/d

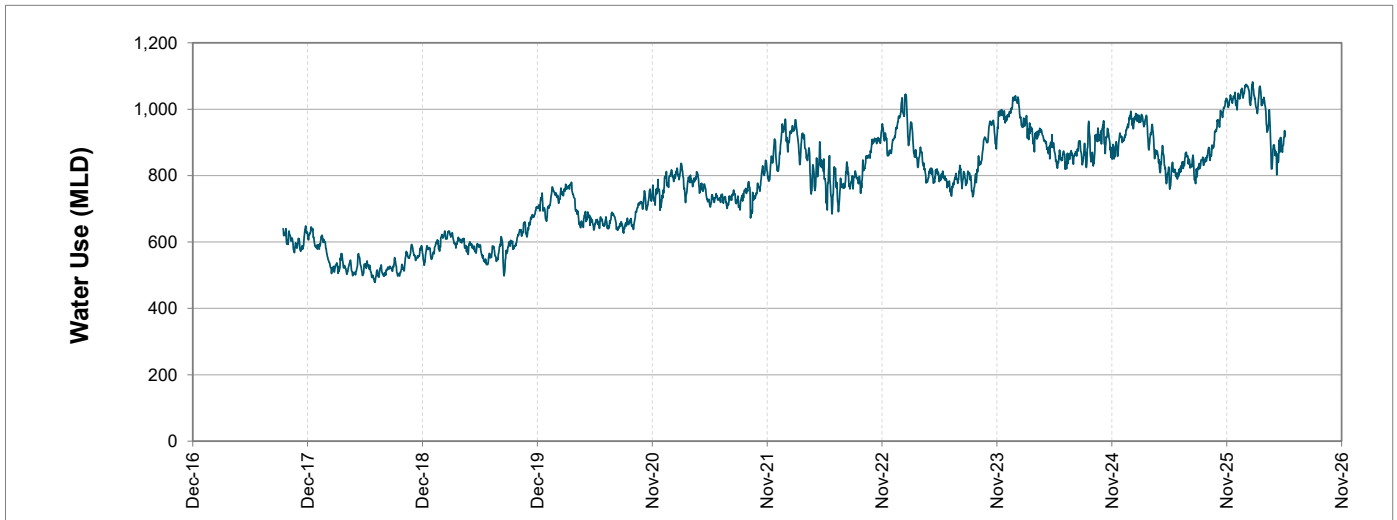

Water Resource Status

| WATER RESOURCE STATUS | MEANING OF CURRENT STATUS |
|-----------------------|--|
| Water Wise Use | <p>Exceptional rainfall during May 2026 resulted in a 20% recovery in Western Cape Water Supply System (WCWSS) storage within one week, increasing the likelihood of the system reaching full supply capacity by November 2026. Rainfall intensities in several catchment areas were extreme and should be regarded as an anomalous event.</p> <p>As rainfall patterns remain unpredictable, it is important to continue to be water wise. Use water responsibly to sustain supply.</p> <p>The next WCWSS Water Resource Status update will be published in July 2026.</p> |

Water Production from Different Sources

Overall Water Usage Trend (2010 - Present)

WCWSS means Western Cape Water Supply System

MLD means million litres per day

More information on Water Saving and Restrictions is available on the City of Cape Town's 'ThinkWater' website

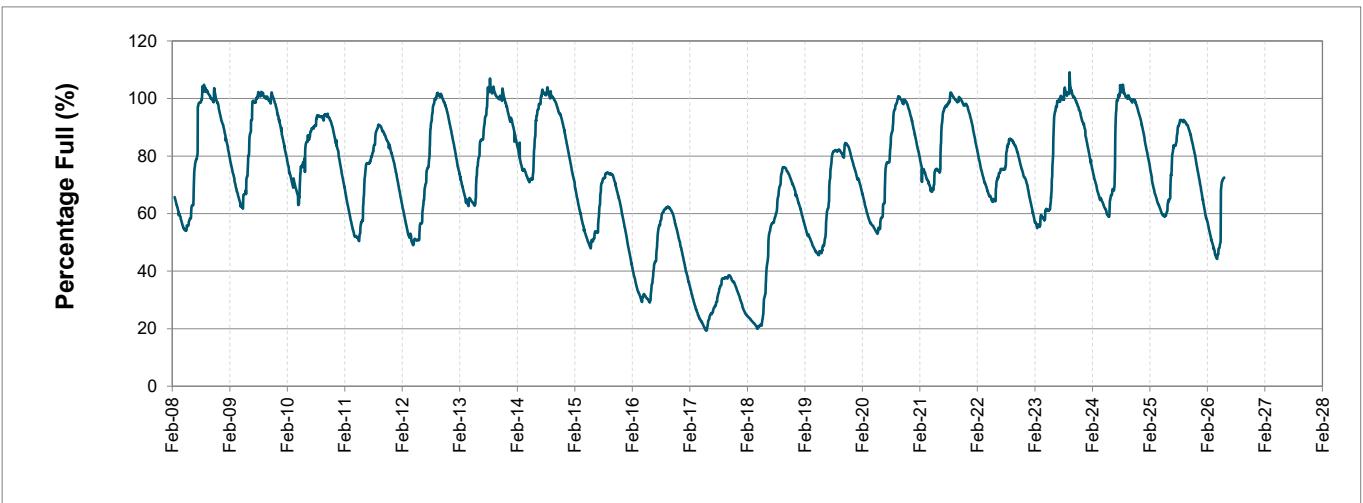

Water Stored in Major Dams (WCWSS)

This table shows CCT drinking water quality compliance according to the South African National Standard 241:2015. Compliance, measured against all prescribed chemical and microbiological components, consistently exceeds the very high CCT target of 99%. (Overall compliance percentages of continuous sampling and analysis are released on a monthly basis.
