Water Resource Status

WATER RESOURCE STATUS	MEANING OF CURRENT STATUS
Wise Water Use	'Continued water wise use encouraged as City reviews marginally lower seasonal rainfall volumes, cautioning possible early drought cycle' The City is currently reviewing the water resource status due to lower than normal rainfall in the catchment areas resulting in marginally lower than expected dam levels (as shown on Page 3). There is no immediate reason for concern and no expected restrictions for the next year. The different drought risk levels are discussed in the Water Outlook 2022.

This table shows CCT drinking water quality compliance according to the South African National Standard 241:2015. Compliance, measured against all prescribed chemical and microbiological components, consistently exceeds the very high CCT target of 99%. (Overall compliance percentages of continuous sampling and analysis are released on a monthly basis.
