

# Department of Water and Sanitation

## Weekly State of the Reservoirs on

2026-06-08

### ABBREVIATIONS:

- FSC** Nett Full Supply Capacity  
**#** Latest available data  
**~** Balancing dam (See notes on last page)
- \*\*\*** No data available  
**\*** Water available to RSA from Lesotho  
**^** Water available to RSA from E-Swatini
- &** Error detected in current survey, reverted back to the original survey  
 (For a historical update of this dam go to verified data at <https://www.dws.gov.za/Hydrology/Verified/hymain.aspx>)

<b>WMA = Water Management Areas / Countries sharing Water Resources with South Africa</b>	
Number	Name
1	Limpopo-Olifants
2	Inkomati-Usuthu
3	Pongola-Mtamvuna
4	Vaal-Orange
5	Mzimvubu-Tsitsikamma
6	Breede-Olifants

## Balancing Dams

Unlike a storage dam where the primary purpose is the long term storage of water, a balancing dam is designed to act as a multi-purpose facility. Commonly it would serve as a distribution point from where water is diverted into pipelines, canals or power generating turbines or to serve as a pumping station. In some instances the balancing dam may have no natural catchment of its own. Water is usually fed into the dam from one or more outside sources in such a way that a **balance** is struck between the water entering at one end and being distributed at the other. Depending on the size of the dam, it may happen that the volume of water passing through the dam in the course of a day may exceed the capacity of the dam. The constant in and outflow of water will cause the water level in the dam to fluctuate, and the smaller the balancing dam the larger and more rapid such fluctuations will be.

Dams marked with a ~ in the Weekly Bulletin fall under the above description and water levels at these dams can therefore be expected to vary considerably from week to week.
