## TABLE OF CONTENTS

|           |                                                           |           |
|-----------|-----------------------------------------------------------|-----------|
| <b>1.</b> | <b>PROJECT OVERVIEW</b>                                   | <b>3</b>  |
| 1.1       | Introduction                                              | 3         |
| 1.2       | Design methodology                                        | 3         |
| 1.3       | Target group                                              | 4         |
| <b>2.</b> | <b>PURPOSE OF THIS DOCUMENT</b>                           | <b>4</b>  |
| <b>3.</b> | <b>BACKGROUND</b>                                         | <b>5</b>  |
| 3.1       | The mission of the DWAF                                   | 5         |
| 3.2       | DWAF's water quality management principles and approaches | 5         |
| <b>4.</b> | <b>MANAGEMENT OF AQUATIC ECOSYSTEMS</b>                   | <b>6</b>  |
| 4.1       | Introduction                                              | 6         |
| 4.2       | Aquatic ecosystem concepts                                | 7         |
| 4.2.1     | Biological diversity                                      | 7         |
| 4.2.2     | Biotic integrity                                          | 7         |
| 4.2.3     | "Natural" aquatic ecosystems                              | 8         |
| 4.2.4     | Cause-effect relationships in ecosystems                  | 8         |
| 4.3       | Factors affecting aquatic ecosystem health                | 8         |
| 4.4       | Approaches to management of aquatic ecosystems            | 9         |
| 4.4.1     | Barriers to effective management                          | 9         |
| 4.4.2     | Overseas approaches                                       | 9         |
| 4.4.3     | Aquatic ecosystems management in South Africa             | 10        |
| <b>5.</b> | <b>BIOMONITORING CONCEPTS</b>                             | <b>11</b> |
| 5.1       | The role and purpose of biomonitoring                     | 11        |
| 5.2       | Definition of biomonitoring                               | 12        |
| 5.3       | The use of ecosystem indicators                           | 13        |
| 5.4       | The use of ecosystem indices                              | 13        |
| 5.5       | Assessment of aquatic ecosystem health                    | 13        |
| 5.5.1     | The concept of assessment                                 | 13        |
| 5.5.2     | Assessment relative to a reference point                  | 14        |
| 5.5.3     | Reference site selection                                  | 15        |
| <b>6.</b> | <b>MANAGEMENT REQUIREMENTS</b>                            | <b>15</b> |
| 6.1       | Background                                                | 15        |
| 6.2       | General requirements for biomonitoring programmes         | 16        |
| 6.3       | Scope of the biomonitoring programme                      | 17        |

|                        |                                                                           |           |
|------------------------|---------------------------------------------------------------------------|-----------|
| 6.4                    | Reporting on the biomonitoring programme .....                            | 17        |
| 6.5                    | Use of information .....                                                  | 18        |
| 6.6                    | Management requirements that will be met by the programme .....           | 18        |
| <b>7.</b>              | <b>SPECIFICATION OF A DESIGN FRAMEWORK .....</b>                          | <b>19</b> |
| 7.1                    | Scope of the monitoring programme .....                                   | 19        |
| 7.2                    | Information users .....                                                   | 19        |
| 7.3                    | Geographic coverage .....                                                 | 20        |
| 7.4                    | Assessment end-points of aquatic health .....                             | 20        |
| 7.5                    | Reporting of information .....                                            | 20        |
| 7.5.1                  | Prototype biomonitoring report .....                                      | 21        |
| 7.6                    | Design team composition .....                                             | 21        |
| <b>8.</b>              | <b>TERMS OF REFERENCE FOR TECHNICAL DESIGN .....</b>                      | <b>21</b> |
| <b>9.</b>              | <b>TERMINOLOGY .....</b>                                                  | <b>22</b> |
| <b>10.</b>             | <b>REFERENCES .....</b>                                                   | <b>22</b> |
| <br><b>APPENDIX A:</b> |                                                                           |           |
