CHAPTER 1. INTRODUCTION TO ECOLOGICAL REFERENCE CONDITIONS AND THE SPATIAL FRAMEWORK FOR DELINEATING HOMOGENEOUS REGIONS

1.1	INTRODUCTION.....	1
1.2	WHAT ARE ECOLOGICAL REFERENCE CONDITIONS?	2
1.2.1	Types of reference conditions	2
1.2.2	Biotic components for deriving ecological reference conditions	2
1.2.3	Why riverine macroinvertebrates?	3
1.3	APPROACHES FOR DERIVING ECOLOGICAL REFERENCE CONDITIONS FOR RIVERINE MACROINVERTEBRATES	4
1.3.1	Multimetric approaches	4
1.3.2	Multivariate approaches	4
1.3.2.1	<i>RIVPACS</i>	6
1.3.2.2	<i>AusRivAS</i>	6
1.3.2.3	<i>Model construction in AusRivAS</i>	7
1.3.2.4	<i>The South African approach</i>	8
1.4	A SPATIAL FRAMEWORK FOR DELINEATING HOMOGENEOUS REGIONS	8
1.4.1	Background	8
1.4.2	A hierarchical spatial framework	9
1.4.2.1	<i>Level 1: Ecoregions or bioregions</i>	9
1.4.2.2	<i>Level 2: Sub-regions or geomorphological zones</i>	9
1.4.2.3	<i>Level 3: River types</i>	10
1.5	STRUCTURE OF THIS REPORT	10

CHAPTER 2. SELECTION OF POTENTIAL REFERENCE SITES AND GROUND-TRUTHING OR PRELIMINARY SITE SCREENING

2.1	INTRODUCTION.....	13
2.2	SELECTION OF POTENTIAL REFERENCE SITES.....	13
2.2.1	Identifying homogeneous regions	14
2.2.2	Selection of "least-impacted" sites	14
2.2.3	Ground-truthing and site screening	17
2.3	RESULTS.....	17
2.4	SUMMARY AND CONCLUSIONS	19

CHAPTER 3. DATA COLLECTION, STANDARDISATION AND STORAGE

3.1	INTRODUCTION.....	29
3.2	STANDARDISATION OF DATA COLLECTION.....	29
3.3	TECHNICAL CONSIDERATIONS FOR SAMPLING INVERTEBRATES USING SASS	30
3.3.1	Separate- or combined-biotope sampling	30
3.3.1	Single- versus multiple-season sampling and sampling frequency	34
3.3.3	Habitat assessment as a tool for interpreting SASS Scores	35
3.3.4	Taxonomic resolution.....	36
3.3.5	Using SASS in non-perennial systems	36
3.3.6	Identification of environmental variables for future predictive systems	37
3.4	DATA STORAGE: THE RIVERS DATABASE.....	37

CHAPTER 4. SITE CHARACTERISATION AND DATA ANALYSIS

4.1	INTRODUCTION.....	39
4.2	CHARACTERISATION OF REFERENCE SITES.....	39
4.3	DATA ANALYSIS.....	41
4.3.1	Standardisations	47
4.3.2	Statistical methods	47

4.3.2.1	<i>Classification and ordination of invertebrate data</i>	47
4.3.2.2	<i>Environmental variables</i>	47
4.3.2.3	<i>Univariate statistics</i>	48
4.3.3	<i>Invertebrate data: composite reference communities</i>	48
4.3.4	<i>Environmental variables</i>	49
4.3.5	<i>Separate- versus combined-biotope sampling</i>	50
4.3.6	<i>Seasonal variation in invertebrate communities and SASS Scores</i>	53
4.4	RESULTS	53
4.4.1	<i>Invertebrate data: composite reference communities</i>	53
4.4.1.1	<i>Cluster analysis and multi-dimensional scaling (MDS)</i>	53
4.4.1.2	<i>Identification of distinguishing taxa</i>	56
4.4.1.4	<i>SASS4 Scores, number of taxa and ASPTs for each Reference Group</i>	65
4.4.2	<i>Environmental variables</i>	66
4.4.2.1	<i>Descriptive statistics for environmental variables</i>	67
4.4.2.2	<i>Future predictive modelling</i>	71
4.4.3	<i>Separate- versus combined-biotope sampling</i>	71
4.4.3.1	<i>Separate-biotope site classification versus Reference Group classification</i>	71
4.4.3.2	<i>The frequency of occurrence of each SASS taxon amongst biotope-groups</i>	72
4.4.3.3	<i>SASS Scores, number of taxa and ASPT</i>	81
4.4.3.4	<i>Invertebrate Habitat Assessment System (IHAS)</i>	86
4.4.3.5	<i>Summary</i>	89
4.4.4	<i>Seasonal variation in invertebrate communities and SASS Scores</i>	90
4.4.4.1	<i>Single-season versus multiple-season sampling</i>	90
4.4.4.2	<i>The frequency of occurrence of each SASS taxon amongst seasons</i>	96
4.4.4.3	<i>SASS4 Scores, number of taxa and ASPT</i>	99
4.4.4.3	<i>Summary</i>	103

CHAPTER 5. MPUMALANGA RIVERS: ECOLOGICAL REFERENCE CONDITIONS FOR RIVERINE MACROINVERTEBRATES

5.1	INTRODUCTION	105
5.2	REFERENCE GROUPS, ENVIRONMENTAL VARIABLES, BIOLOGICAL BANDING AND CONSIDERATIONS FOR DATA INTERPRETATION	106
5.2.1	<i>Homogeneous regions and identified river types</i>	106
5.2.1.1	<i>A key for assigning a monitoring site to a Reference Group for rivers in Mpumalanga</i>	107
5.2.2	<i>Characterisation of Reference Groups in terms of environmental variables</i>	108

5.2.3	A biological banding system.....	108
5.2.4	Seasonal considerations	110
5.2.5	Biotope considerations.....	110
5.3	ECOLOGICAL REFERENCE CONDITIONS FOR RIVERINE MACROINVERTEBRATES FOR PARTICULAR RIVER TYPES IN MPUMALANGA.....	111
5.3.1	Reference Group 1: Central Highlands: Mountain Stream and Foothill-cobble Bed sub- regions	112
5.3.1.1	<i>Characterisation in terms of environmental variables.....</i>	112
5.3.1.2	<i>Composite SASS Scores</i>	113
5.3.1.3	<i>Expected SASS taxa.....</i>	113
5.3.1.4	<i>Biotope considerations.....</i>	115
5.3.2	Reference Group 2: Great Escarpment Mountains: Mountain Stream, Foothill-cobble Bed and Rejuvenated Cascade sub-regions.....	116
5.3.2.1	<i>Characterisation in terms of environmental variables.....</i>	116
5.3.2.2	<i>Composite SASS Scores</i>	117
5.3.2.3	<i>Expected SASS taxa.....</i>	118
5.3.2.4	<i>Biotope considerations.....</i>	119
5.3.3	Sub-group 2a: Lowveld: Foothill-cobble Bed and Rejuvenated Cascade sub-regions, with > 60% boulder/cobble substratum type	120
5.3.3.1	<i>Characterisation in terms of environmental variables.....</i>	120
5.3.3.2	<i>Composite SASS Scores</i>	121
5.3.3.3	<i>Expected SASS taxa.....</i>	122
5.3.3.4	<i>Biotope considerations.....</i>	123
5.3.4	Reference Group 3: Lowveld: Foothill-gravel Bed sub-region.....	124
5.3.4.1	<i>Characterisation in terms of environmental variables.....</i>	124
5.3.4.2	<i>Composite SASS Scores</i>	125
5.3.4.3	<i>Expected SASS taxa.....</i>	126
5.3.4.4	<i>Biotope considerations.....</i>	127
5.3.5	Sub-group 3a: Lowveld: mixture of sub-regions including Foothill-cobble Bed, Foothill- gravel Bed and Rejuvenated Cascade sub-regions, with > 60% bedrock substratum type	128
5.3.5.1	<i>Characterisation in terms of environmental variables.....</i>	128
5.3.5.2	<i>Composite SASS Scores</i>	129
5.3.4.3	<i>Expected SASS taxa.....</i>	130
5.3.4.4	<i>Biotope considerations.....</i>	131

CHAPTER 6. CONCLUSIONS, RECOMMENDATIONS AND THE WAY FORWARD
--

6.1	CONCLUSIONS	133
6.2	A PROTOCOL FOR DERIVING ECOLOGICAL REFERENCE CONDITIONS FOR RIVERINE MACROINVERTEBRATES	134
6.2	RECOMMENDATIONS.....	138
7.	REFERENCES	141
