

5. Summary Sheet and data base

A summary of the data collected during the desk top and field surveys is recorded on the summary data sheet (Appendix A). This information must be forwarded to the data manager for entry into the geomorphology data base. It is also requested that a copy of the full field data forms be forwarded for entry into the data base. Dr Wadeson of IWR Environmental and Prof Rowntree of Rhodes University are the current data base managers. This data base will be linked to the national Rivers Data Base.
