ACKNOWLEDGEMENTS

The author is grateful to the many people who have contributed to the compilation of this RHP implementation. Special thanks to Dr Dirk Roux who commissioned the writing of this manual as well as commenting on the initial draft of the manual. His patience and encouragement are much appreciated. Thanks go to Dr Rob Palmer, Ms Christa Thirion, Ms Helen Dallas, Ms Vassie Maharaj and Ms Tisha Greyling for their insightful comments on earlier versions of this manuscript.

Thanks also to Ms Keletso Makgwa for assistance with producing the figures and Ms Elizabeth Kobue for typing the Business Plan.

Dr Jim Cambray is thanked for technical information on fish preservation and sharing ideas about the RHP and aquatic biodiversity (which lies close to the author's heart) and his enthusiastic support. Dr Neels Kleynhans is thanked for providing information on the FAI and IHI.

The author is grateful to all those RHP practitioners who have given advice, shared their RHP experiences and willingly offered gems of useful information. Without your contributions, this piece of work would not have been possible. A big thank you to all of you!
