2) COMMENTS**2.1) Potential issues or concerns associated with the project?**

Graves of our family which, if the level of water soars, would be drowned. This would be contrary to our belief system and affect our children and future generation.

2.2) Specific requirements in terms of the EIA process?

If possible, the government / Department, whosoever, would assist us financially for the exhumations of these graves.

2.3) Key stakeholders to be engaged with (provide contact details, if possible)?

Mr Neville Keavy, who currently owns the farm. He needs to concede permission for such exhumations and co-operation.

2.4) General Comments

I am looking forward to hear from you, and, please consider my application/request.

Subject: WATER RIGHTS
Attachments: Scan0015.pdf

Dear Donovan

I have scanned the relevant part of the title deeds so you can see that there is both a servitude and water rights for the property. Obviously we will want water rights and some sort of servitude to get water from the dam.

Look forward to hearing your thoughts

Anne

"REGISTRATION OF SERVITUDE.
