

## Decision Support System for the Umgeni Water Middle South Coast System

(EJ Smith and Umzintoriver dams)

### Progress

- A meeting was held with Umgeni Water on 24 June 2011
- Final draft report was discussed
- Discussion points:
  - Assurance of supply
  - Use of groundwater

### Progress

- Additional runs will be executed for Umgeni Water
- Water requirements to be split into different water user groups (assurance of supply)
- Detailed feedback will be given at the SSC Meeting scheduled for 16 November 2011
- Final report to be compiled for approval by DWA and Umgeni Water

### Points of Discussion

- Using of water from the new extension of the South Coast pipeline as soon as the two reservoirs drop below full supply level
- Measure releases downstream of Umzintoriver Dam to quantify the river losses.
- Determine the impact of future implementation of EWR on the availability in the system.

### End Thank You
