

## LUSIKISIKI GROUNDWATER FEASIBILITY STUDY PHASE 2

### Investigating the Potential to Supplement the Lusikisiki Rural Water Supply Scheme (LRWSS)

#### TABLE OF CONTENTS

Surface Water Storage Scheme-Zalu Dam (Fig 4, Appendix 2) .....	vi
Option 1: Zalu Dam, Xura River Rollcrete Dam (Fig 5 & 6 Appendix 2) .....	vi
Option 2: Zalu Dam, Xura River, Embankment Dam .....	vi
Option 2A: Zalu Dam, Xura River, Rockfill Dam (Fig 9 & 10, Appendix 2) .....	vi
Option 2B: Zalu Dam, Xura River, Earthfill Dam (Fig 12, 13 & 14, Appendix 2) .....	vii
Conjunctive Use of Surface and Groundwater Resources .....	vii
Option 3: Lusikisiki Weir in conjunction with groundwater (98% assurance of supply) .....	vii
Immediate Augmentation Measures: Lusikisiki Weir in conjunction with Groundwater (95% assurance of supply) .....	vii
Development Options/Schemes .....	viii
Water Source .....	ix
Bulk Supply System .....	x
Recommendations .....	x
1. INTRODUCTION .....	1
2. GENERAL AND BASIC INFORMATION .....	2
2.5.1 Natal Group Sandstone .....	4
2.5.2 Dwyka Formation .....	6
2.5.3 Eccra Group .....	7
3. REVIEW AND UPDATE OF EXISTING POPULATION INFORMATION .....	9
3.1 Update Population Based on 2001 Census .....	9
3.1.1 Eastern Cape's demographic development indicators .....	9
3.1.2 The Eastern Cape's labour and employment profile .....	10
3.1.3 EC economy compared to other provinces .....	12
3.1.4 Census 2001 for the Project Area .....	12
3.1.5 Population .....	13
3.1.6 Population Projections for Different Phases of Development .....	14
4. WATER REQUIREMENTS .....	16
4.1 Methodology .....	16
Water requirements methodology (DWAF 2001) .....	16
4.2 Population data .....	18
4.2.1 Urban and rural population division .....	18
Final calculation of water requirements .....	18
4.3 Domestic and Industrial Water Requirements .....	18
4.4 Agricultural, Stock Watering and Afforestation Requirements .....	24
4.4.1 Agricultural Requirements .....	24
4.4.2 Stock Watering Requirements .....	25
4.4.3 Afforestation Requirements .....	26
4.4.4 Summary of Consumptive Water Requirements .....	26
5. LUSIKISIKI REGIONAL WATER SUPPLY SCHEME (LRWS) .....	28
5.1 Historical overview and proposed development .....	28

5.2	Water Source .....	28
5.3	Bulk Water Supply Infrastructure.....	28
5.4	Current Status of the Scheme.....	29
5.5	Sources for Augmentation of LRWS .....	29
6.	groundwater .....	31
6.4.1	Background.....	34
6.4.2	Yield of existing boreholes .....	34
6.4.3	Springs.....	34
6.4.4	Location of the villages that formed part of the hydrocensus .....	35
6.4.5	Correlation between NGDB, Desk Study and Hydrocensus.....	36
6.6.1	Natal Group Sandstone (NGS) .....	38
6.6.2	Dwyka Formation.....	41
6.6.3	Ecca.....	43
6.8	Groundwater targets for further drilling.....	45
7.	Zalu Dam.....	49
7.1.1	Introduction and Catchment Characteristics.....	49
7.1.2	Catchment rainfall .....	49
7.1.3	Catchment Mean Annual Precipitation .....	49
7.1.4	Point Rainfall at Zalu Dam site.....	49
7.1.5	Evaporation.....	50
7.1.6	Afforestation.....	50
7.1.7	Irrigation.....	50
7.1.8	WRSM2000 model setup .....	50
7.1.9	Model Calibration / Model parameters .....	50
7.1.10	Results.....	51
7.2.1	Monthly Inflow Record .....	51
7.2.2	Point Rainfall.....	51
7.2.3	Evaporation.....	52
7.2.4	Stage / area / capacity relationship .....	52
7.2.5	Environmental Flow requirements.....	52
7.2.6	Silt Volume.....	52
7.2.7	Historical firm yield analysis .....	52
	Catchment characteristics .....	55
	Rainfall .....	55
	Historical floods .....	56
	Previous calculations.....	56
	Revised flood peak determination .....	58
	Zalu Dam Hydraulic Assessment.....	62
	Design floods for Zalu Dam spillway.....	63
	Hydraulics of Zalu Dam spillway.....	64
7.7.1	Methodology .....	71
7.7.2	Results and discussion .....	72
	Surface water users .....	72

Surface water quality .....	72
8. RECONCILIATION OF WATER REQUIREMENTS AND AVAILABILITY .....	77
9. SUMMARY OF FINDINGS.....	78
10. CONCLUSIONS.....	80
11. RECOMMENDATIONS.....	81
11.1 Springs .....	81
11.2 Areas or aspects that should be considered for further investigation.....	81
12. DESCRIPTION OF THE REGIONAL DEVELOPMENT OPTIONS.....	84
12.1 Surface Water Storage Scheme-Zalu Dam (Fig 4, Appendix 2) .....	84
12.1.1 Option 1: Zalu Dam, Xura River Rollcrete Dam (Fig 5 & 6 Appendix 2) .....	84
12.1.2 Option 2: Zalu Dam, Xura River, Embankment Dam.....	84
12.1.3 Option 2A: Zalu Dam, Xura River, Rockfill Dam (Fig 9 & 10, Appendix 2).....	85
12.1.4 Option 2B: Zalu Dam, Xura River, Earthfill Dam (Fig 12, 13 & 14, Appendix 2) .....	85
12.2 Conjunctive Use of Surface and Groundwater Resources .....	85
12.2.1 Option 3: Lusikisiki Weir in conjunction with groundwater (98% assurance of supply) .....	85
12.2.2 Immediate Augmentation Measures: Lusikisiki Weir in conjunction with Groundwater (95% assurance of supply).....	85
13. FACTORS AFFECTING DEVELOPMENT .....	87
13.1 GEOLOGY AND MATERIALS .....	87
13.1.1 Zalu Dam Site .....	87
13.2 Environmental Impact Assessment of Zalu Dam Site .....	88
13.3 Social Impact Assessment .....	89
Table 33: Summary of Negative Social Impacts for Zalu dam site .....	90
13.4 Water Quality Issues .....	91
Table 34: Site sources of urban runoff and sewerage treatment works.....	91
13.5 Institutional Arrangements for O&M .....	92
14. RECONNAISSANCE SIZING AND COSTING .....	93
14.1 General Sizing Criteria: Design Capacities and Flows.....	93
Table 35: Design capacities and flow rates for sizing of infrastructure components .....	93
14.2 Zalu Dam.....	94
Table 36: Design and Extreme Floods for Sizing of Dam Spillways .....	94
Table 37: Sizing Parameters for Dam.....	95
14.3 Groundwater Development .....	95
14.4 Primary Distribution System .....	96
14.5 Summary of Capital Costs.....	97
Table 38: Capital Cost Reconnaissance Phase March 2006.....	97
15. FEASIBILITY INVESTIGATIONS FOR ZALU DAM.....	98
15.1 Topographical Surveys.....	98
15.2 Geological and Materials Investigations.....	98
15.3 Stochastic Yield Analysis .....	98
16. PRE-FEASIBILITY CONCEPTUAL DESIGN AND COSTING .....	99
16.1 Zalu Dam.....	99
16.2 Primary Distribution System.....	100
16.3 Summary of Capital Costs.....	100
Table 40: Capital Cost Pre-Feasibility Phase (R million) .....	100
17. EVALUATION OF DEVELOPMENT OPTIONS .....	101
17.1 Economic Analysis Model .....	101
Table 41: O&M costs as a percentage of the capital costs.....	101
Table 42: Results of the Economic Analysis (for reconnaissance phase) .....	102
17.2 Evaluation of Development Options .....	102
17.2.1 Surface Water Storage Scheme Zalu Dam Options.....	102
17.2.2 Conjunctive run of river plus groundwater option .....	103

17.3	Summary of Preferred Options.....	103
Table 44:	Summary of recommended schemes per source category .....	103
18.	CONCLUSIONS .....	104
18.1	Development Options/Schemes.....	104
18.2	Water Source .....	105
18.3	Bulk Supply System .....	105
19.	RECOMMENDATIONS.....	106
	Appendices .....	107
	Appendix 1: Rainfall Data .....	108
	Appendix 2: Layouts and Typical Details .....	109
	Appendix 3: Surface Sampling Protocol .....	119
	Appendix 4: Certificate of Water Analysis.....	126
	Appendix 5: Cost Estimates.....	128
	Appendix 6: Economic Analysis.....	149
