Subject: MCWAP - I&AP with groundwater problems

Hi Ockie / Donovan

Mr Koos Pretorius, a non-resident landowner with water rights downstream of Mokolo dam has contacted me with a complaint that after the ground water investigations by DWAF his borehole with "sweet" water has turned brackish to the point where he can no longer use the water. He indicated that he will now be fully reliant on water released from the dam, and any potential reduction in that would be objected to. He requested to be placed on the I&AP database. His details are:

Koos Pretorius
 Cell 082 324 7502
 Phone 012 429 3467
 Farm Name – Shotbelt 438 LQ

Ockie can you also forward this to the ground water study managers as there may also be an issue related to the drilling done by DWAF.

Regards

Mr Barend H J Smit BL, Pr LArch
