711 Public Notices

NOTICE OF THE ENVIRONMENTAL AUTHORISATION PROCESS FOR THE PROPOSED SURFACE WATER DEVELOPMENTS FOR AUGMENTATION OF THE WESTERN CAPE WATER SUPPLY SYSTEM

BACKGROUND

Nemai Consulting was appointed by the Department of Water and Sanitation as the Environmental Assessment Practitioner to undertake the Environmental Impact Assessment (EIA) for the proposed surface water developments for augmentation of the Western Cape Water Supply System (WCWSS). The WCWSS serves the City of Cape Town, surrounding urban centres and irrigators. It consists of infrastructure components owned and operated by both the City of Cape Town and the Department of Water and Sanitation. In 2007, the Western Cape Reconciliation Strategy Study was commissioned by the Department of Water and Sanitation to determine future water requirements for a 25 year planning horizon. The Study investigated a number of options and found that whilst 556 million m³ per annum would be available from 2007, the estimated water requirement in 2011 would be 560 million m³/a, with the implication that the system supply will then be fully utilised and thus additional interventions will then be required.

Based on the above, the Department of Water and Sanitation is planning on augmenting the WCWSS through the transfer of approximately 23 million m³ per annum from the Berg River to the existing Voëlvelei Dam. This would involve the following:

- A crump weir, abstraction works and 4 m³/s raw water pump station on the Berg River;
- A rising main pipeline from the Berg River to Voëlvelei Dam;
- A new summer release connection at the existing Swartlands Water Treatment Works to facilitate summer releases; and
- A new connection to existing outlet infrastructure so that water can be released to the Berg River during the summer months under gravity, thus eliminating the need to utilize the existing canal from which water losses occur.

Notice is hereby given of the joint public participation process in terms of the National Environmental Management Act, 1998 (Act No. 107 of 1998) ("NEMA") in accordance with the EIA Regulations, 2014 (Government Notice No. R.982) and National Water Act (Act No. 36 of 1998). The proposed surface water development for augmentation of the WCWSS trigger activities contained in the 2014 EIA Regulations (GN 983, GN 984 and GN 985 of 4 December 2014) and thus a Scoping and EIA Process is required. Further, as the project occur within regulated area of a watercourse and involves abstraction of water, it triggers activities that are listed under Section 21 (a), (c) and (i) of the National Water Act. As such a Water Use Licence Application (WULA) process will also be undertaken.

REGISTER AS AN INTERESTED AND AFFECTED PARTY

This notice serves to notify all Interested and Affected Parties (IAPs) of the proposed development. In order to register as an IAP, please contact the Consultant below, the closing date to register is **27 June 2016**. All comments may be submitted in writing, via fax, post or email. We would like to urge you to register and look forward to your participation throughout the process.
